Gone in the Night Alan Brown, Brian Brown, 2023-06-26 Art imitates life in Springfield, Missouri, as former reporter Brian Brown visits his hometown in the early days of the pandemic to interview private investigator Booger McClain for a possible book about the area's most famous missing person's case. Nearly 30 years earlier, two young women who had just graduated from Kickapoo High School, along with the mother of one of the girls, disappeared without a trace. The search for the three missing women consumed the psyche of the community in the latter half of 1992 and garnered attention from the national press, but it was all for naught. The women were never found, and no one was ever charged with their disappearance. Soon after meeting Detective McClain, Brown quickly learns that this case he was familiar with has haunted the quirky private investigator for three decades. What unfolds are the unnerving details of what are known and heartbreaking speculations of what must have happened. In the end, the investigators find reasons for hope as they grapple with their own limitations in an unforgiving world. Included is an exclusive interview with Janis McCall thirty one-years after the disappearance of her daughter, Stacy.

Keeper'n Me Richard Wagamese, 2018-10-02 When Garnet Raven was three years old, he was taken from his home on an Ojibway Indian reserve and placed in a series of foster homes. Having reached his mid-teens, he escapes at the first available opportunity, only to find himself cast adrift on the streets of the big city. Having skirted the urban underbelly once too often by age 20, he finds himself thrown in jail. While there, he gets a surprise letter from his long-forgotten native family. The sudden communication from his past spurs him to return to the reserve following his release from jail. Deciding to stay awhile, his life is changed completely as he comes to discover his sense of place, and of self. While on the reserve, Garnet is initiated into the ways of the Ojibway--both ancient and modern--by Keeper, a friend of his grandfather, and last fount of history about his people's ways. By turns funny, poignant and mystical, *Keeper'n Me* reflects a positive view of Native life and philosophy--as well as casting fresh light on the redemptive power of one's community and traditions.

Black Holes and Time Warps Kip S Thorne, 1994 In this masterfully written and brilliantly informed work, Dr. Rhorne, the Feynman Professor of Theoretical Physics at Caltech, leads readers through an elegant, always human, tapestry of interlocking themes, answering the great question: what principles control our universe and why do physicists think they know what they know? Features an introduction by Stephen Hawking.

A Course in Behavioral Economics Erik Angner, 2020-11-27 This textbook looks at decisions – how we make them, and what makes them good or bad. In this bestselling introduction, Erik Angner clearly lays out the theory of behavioral economics and explains the intuitions behind it. The book offers a rich tapestry of examples, exercises, and problems drawn from fields such as economics, management, marketing, political science, and public policy. It shows how to apply the principles of behavioral economics to improve your life and work – and to make the world a better place to boot. No advanced mathematics is required. This is an ideal textbook for students coming to behavioral economics from various fields. It can be used on its own in introductory courses, or in combination with other texts at advanced undergraduate and postgraduate levels. It is equally suitable for general readers who have been captivated by popular-science books on behavioral economics and want to know more about this intriguing subject. New to this Edition: - An updated chapter on behavioral policy and the nudge agenda. - Several new sections, for example on the economics of happiness. - Updated examples and exercises, with an expanded answer key - Refreshed ancillary resources make for a plug and play experience for instructors teaching behavioral economics for the first time.

Prospects of Renewable Bioprocessing in Future Energy Systems Ali Asghar Rastegari, Ajar Nath Yadav, Arti Gupta, 2019-04-03 This book discusses various renewable energy resources and technologies. Topics covered include recent advances in photobioreactor design; microalgal biomass harvesting, drying, and processing; and technological advances and optimised production systems as prerequisites for achieving a positive energy balance. It highlights alternative resources that can be used to replace fossil fuels, such as algal biofuels, biodiesel, bioethanol, and biohydrogen. Further, it reviews microbial technologies, discusses an immobilization method, and highlights the efficiency of enzymes as a key factor in biofuel production. In closing, the book outlines future research directions to increase oil yields in microalgae, which could create new opportunities for lipid-based biofuels, and provides an outlook on the future of global biofuel production. Given its scope, the book will appeal to all researchers and engineers working in the renewable energy sector.

The Labor Day Murder Lee Harris, 2015-09-16 MURDER BURNS ON FIRE ISLAND Island old-timers are stunned by the shooting death of Blue Harbor's popular fire chief, followed by the mysterious torching of his house. Rumors soon begin to flare up about the chief's rumored affairs with a vacationing lady lawyer and a girl half his age. But when former nun (now sleuth) Christine Bennett and her police detective husband start asking questions, a thick fog of evasiveness closes in. For this is not the first fire to scorch Blue Harbor. Nor, Chris suspects, is it the first murder--as she soon discovers that the passions that turn good people bad run long and deep and deadly. . . .

Bioeconomy for Beginners Joachim Pietzsch,2020-03-06 This book provides an interdisciplinary and comprehensible introduction to bioeconomy. It thus provides basic knowledge for understanding a transformation process that will shape the 21st century and requires the integration of many disciplines and industries that have had little to do with each other up to now. We are talking about the gradual and necessary transition from the age of fossil fuels, which began around 200 years ago, to a global economy based on renewable raw materials (and renewable energies). The success of this transition is key to coping with the challenge of climate change. This book conceives the realization of bioeconomy as a threefold task – a scientific, an economic and an ecological one. · Where does the biomass come from that we need primarily for feeding the growing world population but also for future energy and material use? How can it be processed in biorefineries and what role does biotechnology play in this regard? · Which aspects of innovation economics need to be considered, which economic aspects of value creation, competitiveness and customer acceptance are important? · What conditions must a bioeconomy fulfil in order to enable a sustainable development of life on earth? May it be regarded as a key to further economic growth or shouldn't it rather orient itself towards the ideal of sufficiency? By dealing with these questions from the not necessarily consistent perspectives of proven experts, this book provides an interdisciplinary overview of a dynamic field of research and practice that raises more questions than answers and thus may nurture the motivation of many more people to seriously engage for the realization of a bioeconomy.

The MIT Dictionary of Modern Economics, fourth edition David W. Pearce,1992-08-12 an up-to-date authoritative reference designed primarily for students of economics but invaluable also to students of business and other social sciences and ideal for anyone who wants a brief explanation of an economic concept or institution The MIT Dictionary of Modern Economics is an up-to-date, authoritative reference designed primarily for students of business and other social sciences and ideal for anyone who wants a brief explanation of an economic concept or institution. In this fourth edition one entry in ten has been revised and one entry in twenty is new. Whereas the third edition increased the coverage of American institutions, this edition breaks new ground by including entries considered important from an Eastern European perspective. It also supplies comparative statistics on major economic variables for selected countries, describes the origins of widely used acronyms, and includes bibliographic references at the end of

featured entries. The dictionary answers in a clear and concise way the enduring questions, which economists have considered for two centuries or more, as well as the issues of the moment, such as economic change in Europe, the problems of pollution, or the prospects for greater freedom of trade. With close to 2,800 entries it is comprehensive in its coverage of theory, national and international institutions, schools of thought, and important economists, including recent Nobel Prize winners. The dictionary was compiled initially by an experienced team of economists at Aberdeen University in the United Kingdom, and new authors have been recruited to provide international expertise, reflecting changes in the structure of the international economy. This fourth edition was prepared by John Cairns, Robert Elliott, Ian McAvinchey, and Robert Shaw, all of the Economics Department, University of Aberdeen.
