**Cartography and Art** William Cartwright, Georg Gartner, Antje Lehn, 2009-02-26 This book is the fruition of work from contributors to the Art and Cartography: Cartography and Art symposium held in Vienna in February 2008. This meeting brought together cartographers who were interested in the design and aesthetics elements of cartography and artists who use maps as the basis for their art or who incorporate place and space in their expressions. The outcome of bringing together these like minds culminated in a wonderful event, spanning three evenings and two days in the Austrian capital. Papers, exhibitions and installations provided a forum for appreciating the endeavors of artists and cartographers and their representations of geography. As well as indulging in an expansive and expressive occasion attendees were able to reflect on their own work and discuss similar elements in each other's work. It also allowed cartographers and artists to discuss the potential for collaboration in future research and development. To recognise the significance of this event, paper authors were invited to further develop their work and contribute chapters to this book. We believe that this book marks both a significant occasion in Vienna and a starting point for future collaborative efforts between artists and cartographers. The editors would like to acknowledge the work of Manuela Schmidt and Felix Ortig, who undertook the task of the design and layout of the chapters.

*Pocahontas, 1595-1617* Liz Sonneborn, 2003-09 From leading the Underground Railroad to heading the Confederate Army, readers will learn about the courageous women and men who shaped the Civil War and helped America define the meaning of freedom.

The Enclosure Maps of England and Wales 1595-1918 Roger J. P. Kain, John Chapman, Richard R. Oliver, 2004-07 This book offers the first comprehensive study of the enclosure mapping of England and Wales. Enclosure maps are fundamental sources of evidence in many types of historical inquiries. Although modern historians tend to view these large-scale maps essentially as sources of data on past economies and societies, this book argues that enclosure maps had a much more active role at the time they were compiled. Seen from this perspective of their contemporary society, enclosure maps are not simply antiquarian curiosities, cultural artefacts, or useful sources for historians but instruments of land reorganisation and control which both reflected and consolidated the power of those who commissioned them. The book is accompanied by a fully searchable, descriptive and analytical web catalogue of all parliamentary and non-parliamentary enclosure maps extant in public archives and libraries and offers an essential research tool for economic, social and local historians and for geographers, lawyers and planners.

**Early Modern Others** Peter C. Herman, 2023-10-25 *Early Modern Others* highlights instances of challenges to misogyny, racism, atheism, and antisemitism in the early modern period. Through deeply historicizing early modern literature and looking at its political and social contexts, Peter C. Herman explores how early modern authors challenged the biases and prejudices of their age. By examining the works of Thomas More, William Shakespeare, Christopher Marlowe, John Fletcher, and Philip Massinger amongst others, Herman reveals that for every “-ism” in early modern English culture there was an “anti-ism” pushing back against it. The book investigates “others” in early modern literature through indigenous communities, women, religion, people of color, and class. This innovative book shows that the early modern period was as complicated and as contradictory as the world today. It will offer valuable insight for anyone studying early modern literature and culture, as well as social justice and intersectionality.

**Celtic Warfare 1595–1763** James Hill, James Michael Hill Ph D, 2018-05-25 Since earliest times the strategy and tactics of the Celts in battle has exhibited a continuity over the centuries that is quite surprising. This book provides a comprehensive study of the way in which the Celtic people fought and the weapons that they used. After an introduction which sets the background, the book concentrates on the Irish Wars, the civil war in Scotland, the campaigns of Graham of Claverhouse, Bonnie Dundee, the Jacobite uprisings of 1715 and 1745, and the North American War against the French and the Indians. Battles which are analyzed in detail include Clontibret, Yellow Ford, Moyry Pass, Kinsale, Tippermuir, Aberdeen, Inverlochy, Auldearn, Kilsyth, Killiecrankie, Preston, Sheriffmuir, Prestonpans, Falkirk, and Culloden. The author of this volume provides a sound, factual, and analytical base that identifies the continuity in Gaelic warfare from the 1590s to the 1760s which will interest all concerned with the study of the military history of Ireland, Scotland, England, and North America.

*The Economy of the Mughal Empire, C.1595* Shireen Moosvi, 2015 Originally presented as the author's thesis (doctoral)--Centre of Advanced Study in History, Aligarh Muslim University, Aligarh.

**In Search Of Shakespeare** Michael Wood, 2015-06-30 Almost 400 years after his death, William Shakespeare is still acclaimed as the world's greatest writer, and yet the man himself remains shrouded in mystery. In this absorbing historical detective story, the acclaimed broadcaster and historian Michael Wood takes a fresh approach to Shakespeare's life, brilliantly recreating the turbulent times through which the poet lived: the age of the Reformation, the Spanish Armada, the Gunpowder Plot and the colonization of the Americas. Drawing on an extensive range of sources, Michael

Wood takes us back into Elizabethan England to reveal a man who is the product of his time - a period of tremendous upheaval that straddled the medieval and modern worlds. Using a wealth of unexplored archive evidence the author vividly conjures up the neighbourhoods of the Elizabethan London where Shakespeare lived and worked during his glittering career. Full of fresh insights and fascinating new discoveries, this book presents us with a Shakespeare for the twenty-first century: a man of the theatre, a thinking artist, playful and cunning who held up a mirror to his age, but who was also, as his friend Ben Jonson said, 'not of an age, but for all time'.

*Misadventures in Nature's Paradise* Graeme Henderson, Andrew Viduka, Robert de Hoop, 2022-12-01 The book provides a pre-settlement historical account of the Cocos (Keeling) Islands and Christmas Island in their Indian Ocean context. The project began as a search for clues to locations of two 18th century Dutch shipwrecks, and was expanded into a general account of the early island histories and associated mythological Indian Ocean islands and creatures.

*Flour* Joanne Chang, 2011-03-25 Every day 1,500 Bostonians can't resist buying sweet, simple treats such as Homemade Pop-Tarts, from an alumna of Harvard with a degree in economics. From Brioche au Chocolat and Lemon Raspberry Cake to perfect croissants, Flour Bakery-owner Joanne Chang's repertoire of baked goods is deep and satisfying. While at Harvard she discovered that nothing made her happier than baking cookies leading her on a path that eventually resulted in a sticky bun triumph over Bobby Flay on the Food Network's Throwdown. Almost 150 Flour recipes such as Milky Way Tart and Dried Fruit Focaccia are included, plus Joanne's essential baking tips, making this mouthwatering collection an accessible, instant classic cookbook for the home baker.

*Underwater Dogs* Seth Casteel, 2012-10-23 The exuberant, exhilarating photographs of dogs underwater that have become a sensation From the water's surface, it's a simple exercise: a dog's leap, a splash, and then a wet head surfacing with a ball, triumphant. But beneath the water is a chaotic ballet of bared teeth and bubbles, paddling paws, fur and ears billowing in the currents. From leaping Lab to diving Dachshund, the water is where a dog's distinct personality shines through; some lounge in the current, paddling slowly, but others arch their bodies to cut through the water with the focus and determination of a shark. In more than eighty portraits, award-winning pet photographer and animal rights activist Seth Casteel captures new sides

of our old friends with vibrant underwater photography that makes it impossible to look away. Each image bubbles with exuberance and life, a striking reminder that even in the most loveable and domesticated dog, there are more primal forces at work. In *Underwater Dogs*, Seth Casteel gives playful and energetic testament to the rough-and-tumble joy that our dogs bring into our lives.

*Clamouring for Legal Protection* Robert F Barsky, 2021-06-17 In this novel approach to law and literature, Robert Barsky delves into the canon of so-called Great Books, and discovers that many beloved characters therein encounter obstacles similar to those faced by contemporary refugees and undocumented persons. The struggles of Odysseus, Moses, Aeneas, Dante, Satan, Dracula and Alice in Wonderland, among many others, provide surprising insights into current discussions about those who have left untenable situations in their home countries in search of legal protection. Law students, lawyers, social scientists, literary scholars and general readers who are interested in learning about international refugee law and immigration regulations in home and host countries will find herein a plethora of details about border crossings, including those undertaken to flee pandemics, civil unrest, racism, intolerance, war, forced marriage, or limited opportunities in their home countries.

Intelligent Data Communication Technologies and Internet of Things Jude Hemanth,Robert Bestak,Joy long-Zong Chen,2021-02-12 This book solicits the innovative research ideas and solutions for almost all the intelligent data intensive theories and application domains. The proliferation of

various mobile and wireless communication networks has paved way to foster a high demand for intelligent data processing and communication technologies. The potential of data in wireless mobile networks is enormous, and it constitutes to improve the communication capabilities profoundly. As the networking and communication applications are becoming more intensive, the management of data resources and its flow between various storage and computing resources are posing significant research challenges to both ICT and data science community. The general scope of this book covers the design, architecture, modeling, software, infrastructure and applications of intelligent communication architectures and systems for big data or data-intensive applications. In particular, this book reports the novel and recent research works on big data, mobile and wireless networks, artificial intelligence, machine learning, social network mining, intelligent computing technologies, image analysis, robotics and autonomous systems, data security and privacy.

*Accelerating MATLAB Performance* Yair M. Altman, 2014-12-11 The MATLAB® programming environment is often perceived as a platform suitable for prototyping and modeling but not for serious applications. One of the main complaints is that MATLAB is just too slow. *Accelerating MATLAB Performance* aims to correct this perception by describing multiple ways to greatly improve MATLAB program speed. Packed with thousands of helpful tips, it leaves no stone unturned, discussing every aspect of MATLAB. Ideal for novices and professionals alike, the book describes MATLAB performance in a scale and depth never before published. It takes a comprehensive approach to MATLAB performance, illustrating numerous ways to attain the desired speedup. The book covers MATLAB, CPU, and memory profiling and discusses various tradeoffs in performance tuning. It describes both the application of standard industry techniques in MATLAB, as well as methods that are specific to MATLAB such as using different data types or built-in functions. The book covers MATLAB vectorization, parallelization (implicit and explicit), optimization, memory management, chunking, and caching. It explains MATLAB's memory model and details how it can be leveraged. It describes the use of GPU, MEX, FPGA, and other forms of compiled code, as well as techniques for speeding up deployed applications. It details specific tips for MATLAB GUI, graphics, and I/O. It also reviews a wide variety of utilities, libraries, and toolboxes that can help to improve performance. Sufficient information is provided to allow readers to immediately apply the suggestions to their own MATLAB programs. Extensive references are also included to allow those who wish to expand the treatment of a particular topic to do so easily. Supported by an active website, and numerous code examples, the book will help readers rapidly attain significant

reductions in development costs and program run times.

The Sugar Trade Daniel Strum,2013 This book provides a thoroughly researched and richly illustrated account of a key element of the early modern Atlantic world: the sugar trade linking Brazil, Portugal, and the Netherlands. The study seeks to illuminate the economic, social, political, and cultural dimensions of this commerce. Indeed, trade supported Brazil's rise as the world's leading producer of sugar and the first great plantation colony. Likewise, the sugar trade boosted the economy of Portugal and contributed to the upsurge of the Dutch market. The increasing availability of sugar transformed the European diet (along with some medical theories); and sweets came to play an important part in a variety of social practices. In the political arena, sugar and sugar-producing areas became strategic targets in global conflicts. Furthermore, as this trade expanded, it figured centrally in the evolution of a wide range of financial techniques, business strategies, and institutions of governance--which merchants exploited in order to make their transactions more efficient. The book provides a clear examination of these increasingly sophisticated practices, and shows how they had much in common with today's business operations.

**A New Imperial History of Northern Eurasia, 600-1700** Marina B. Mogilner,Ilya V. Gerasimov,Sergey Glebov,Alexander Semyonov,2023-10-19 A New Imperial History of Northern Eurasia, 600-1700 proposes a new language for studying and conceptualizing the spaces, societies, and institutions that existed on the territory of today's Northern Eurasia. This is not the story of a certain present-day state or people evolving through consecutive historical stages. Rather, the book is a modern analytical approach to the problem of human diversity as a fundamental social condition. Through cooperation and confrontation, various attempts to manage diversity fostered processes of societal self-organization, as new ideas, practices, and institutions were developed virtually from scratch or radically altered. Essentially, this is the story of individuals and societies creatively responding to their natural and social environments in unique historical circumstances. This volume explores how the mutual interactions of several local socio-political

arrangements, and attempts to integrate with one of the universal cultures of the time, caused a string of unintended consequences. As a result, the enormous landmass from the Carpathian Mountains in the west to the Pacific Ocean in the east, from the Polar Circle in the north to the steppe belt in the south was divided among several regional powers. Ultimately unable to overtake each other by military force, they were locked in a zero-sum game until the uneven development of modern state institutions tilted the balance in favor of one of them – Russia.
