**Dharma** Alf Hiltebeitel, 2011-08-17 Between 300 and 200 BCE, the concept and practice of dharma attained prominence across India. Both Buddhist and Brahmanical authors sought to clarify and classify their central concerns, and dharma proved a means of thinking through and articulating those concerns. Alf Hiltebeitel shows the different ways in which dharma is interpreted over time. His insightful study explores the diverse and changing significance of dharma in classical India in nine major dharma texts, as well as two pieces of writing that have traditionally been considered minor.

**Consecration of Images and Stûpas in Indo-Tibetan Tantric Buddhism** Yael Bentor, 2023-08-14 The present work is an investigation of the Indo-Tibetan ritual for consecrating images, stûpas, books and temples. It is based on a thorough examination of the relevant Tibetan textual material contained in Tantras, commentaries, ritual manuals and explanatory works on consecration. As rituals are meant to be performed, this textual study is combined with observations of performances and interviews with performers. The book opens with a general discussion of certain principles of tantric rituals and the foundations of Indo-Tibetan consecration. The main part focuses on a specific performance of the ritual in a Tibetan monastery located in the Kathmandu Valley. This volume contributes to the often neglected field of Indo-Tibetan Buddhist rituals. It is concerned with the sacred nature of objects for worship as well as with the main Buddhist tantric transformation into a chosen tantric Buddha.

**The Lotus Sutra and Its Opening and Closing Sutras** Burton Watson, 2023-08-06 The Lotus Sutra clearly and definitively reveals the buddha nature that is an integral part of the lives of all people. And it makes clear that the Buddha desires and acts so that all people, by opening up this buddha nature inherent within themselves, may attain the state of buddhahood for themselves. The

sutra further stresses that the continued observance of such action is the true mission of the bodhisattva, and never ceases to praise the observance of this practice.

The volume brings to life the theory and practice of this ancient healing art. 2015 Best Art Book Accolade, ICAS Book Prize in the Humanities Category *Bodies in Balance: The Art of Tibetan Medicine* is the first comprehensive, interdisciplinary exploration of the triangular relationship among the Tibetan art and science of healing (Sowa Rigpa), Buddhism, and arts and crafts. This book is dedicated to the history, theory, and practice of Tibetan medicine, a unique and complex system of understanding body and mind, treating illness, and fostering health and well-being. Sowa Rigpa has been influenced by Chinese, Indian, and Greco-Arab medical traditions but is distinct from them. Its focus on a holistic approach to health has influenced Western medical thinking about the prevention, diagnoses, and treatment of illness. Generously illustrated with more than 200 images, *Bodies in Balance* includes essays on contemporary practice, pharmacology and compounding medicines, astrology and divination, history and foundational treatises. The volume brings to life the theory and practice of this ancient healing art.

**Tara** Rachael Wooten, Ph.D., 2020-04-28 A practical guide for invoking the power and blessings of Tara, the beloved female buddha of Tibet Known as the female Buddha in Tibet and India, Tara connects us to the archetypal Divine Feminine—an energetic force that exists within us and all around us, and has been available to all humans since our earliest origin. While there are many books on Tara, this practical guide shows us how those of any tradition can directly access her, through clear instruction and authentic Tibetan Buddhist teachings. Jungian analyst, scholar, and spiritual practitioner Dr. Rachael Wooten combines the ancient Tara tradition with depth psychology to help us connect with each of Tara's manifestations and access her blessings within ourselves and in the external world. In her myriad forms, Tara has the power to protect us from inner and outer negativity, illuminate our self-sabotaging habits, cleanse mental and physical poisons, address emotional trauma, open us to abundance, give us strength and peace, help us fulfill our life purposes, and more. Here, you will explore all 22 manifestations of Tara. Each chapter begins with an epigraph that captures the spiritual and psychological essence of the emanation, explains her purpose, and teaches you specific visualizations, praises, mantra chants, and other ways of invoking her presence in yourself and the world. If ever the voice of wisdom and compassion was needed in the form of an awakened female figure such as Tara, writes Dr. Wooten, that time is now. This book illuminates the way to her healing, blessings, and aid.

**Biosurfactants** Catherine N. Mulligan, Sanjay K. Sharma, Ackmez Mudhoo, 2014-02-10 Microbially derived surfactants, called biosurfactants, provide a promising alternative to synthetic surfactants, displaying better availability and being generally nontoxic and biodegradable. Biosurfactants also have the advantage of diverse chemical properties and the potential to be less expensive. They

demonstrate properties such as reducing surface tension, stabilizing emulsions, and promoting foaming. With many promising research results, a consolidated resource of biosurfactant knowledge is needed to build a framework for further development of applications. *Biosurfactants: Research Trends and Applications* fills this need, covering the latest research and development on relevant aspects of biological, biochemical, and physical processes and applications of biosurfactants. This book reviews current knowledge and the latest advances, strategies for improving production processes, and the status of biosynthetic and genetic regulation mechanisms for microbial surfactants. Chapters present research findings on specific biosurfactants, such as high surface activity rhamnolipids, yeast-derived sophorolipids, lipopeptides, and trehalose lipids that have potential for environmental, industrial, and medical uses. The book also describes sources and characteristics of marine microbial biosurfactants, biosurfactants made from food processing by-products and biosurfactants used in the food industry, and biosurfactants for green synthesis of nanoparticles. The text presents applications of biosurfactants in environmental industries and examines interactions between metals and various classes of biosurfactants and related metal remediation technologies. The final chapter reviews the state of the art of biosurfactants and their applications, and proposes approaches to overcome any challenges.

**Developmental Immunology** Edwin Lowell Cooper, Eric Nisbet-Brown, 1993 This timely, comprehensive volume draws on recent advances in molecular, cellular and organismal biology to provide a detailed analysis of the phylogeny and ontogeny of the immune system. This first book to provide broad coverage of this field gives a clear description of cellular and molecular interactions in the development of immune function. Although most of this work is based on studies in vertebrates, the intriguing observations of cytokine-like molecules in invertebrates are discussed. In a final section,

the contributors deal with abnormalities in the development and regulation of the immune system, including primary immunodeficiency diseases, and with the normal aging of the immune system. Throughout the book, an effort has been made to compare and integrate information from studies in diverse systems, and to discuss the limitations of such comparisons. This work will be of special interest to immunologists and theoretical, cell and developmental biologists, and much of the book will be useful to physicians working in pediatrics, internal medicine and reproductive medicine.

The Shaolin Monastery Meir Shahar, 2008-01-10 This meticulously researched and eminently readable study considers the economic, political, and religious factors that led Shaolin monks to disregard the Buddhist prohibition against violence and instead create fighting techniques that by the 21st century have spread throughout the world.

The Lotus Sutra , 1993 Since its appearance in China in the third century, The Lotus Sutra has been regarded as one of the most illustrious scriptures in the Mahayana Buddhist canon. The object of intense veneration among generations of Buddhists in China, Korea, Japan, and other parts of the world, it has had a profound impact on the great works of Japanese and Chinese literature, attracting more commentary than any other Buddhist scripture. As Watson notes in the introduction to his remarkable translation, The Lotus Sutra is not so much an integral work as a collection of religious texts, an anthology of sermons, stories, and devotional manuals, some speaking with particular force to persons of one type or in one set of circumstances, some to those of another type or in other circumstances. This is no doubt why it has had such broad and lasting appeal over the ages and has permeated so deeply into the cultures that have been exposed to it.

*Tibetan Astrology* Philippe Cornu, 2002-12-10 Astrology is one of the traditional arts and sciences

of Tibet, where it is known as the science of calculation, used by monks and lamas in the study of the rhythms and cycles of time, for divination, for choosing auspicious times for rituals and life-cycle events such as marriages and funerals, and as an adjunct to the practice of traditional medicine. This comprehensive introduction to the topic includes: • Historical roots and influences from China and India as well as the Buddhist Kalachakra teachings and the ancient Bön religion of Tibet • The two main branches of Tibetan astrology: Nagtsi, or black astrology, based on the Chinese system, and Kartsi, or white astrology, derived from Indian astrology • The twelve- and sixty-year cycles and the twelve animals and five elements associated with them • The mewa, or magical squares, which are numerological factors used to calculate the auspiciousness of days or years • The parkha, or eight trigrams of the I Ching, representing the elements, directions, seasons, and fundamental universal forces • How to analyze the character of hours, days, months, and years, so as to determine auspicious times for various activities • How to cast and interpret a Tibetan horoscope Also included are numerous diagrams and charts that are indispensable to the practice of Tibetan astrology, including tables for converting Western dates to dates on the Tibetan calendar.

**Masters of Mahamudra** Keith Dowman, 2010-03-31 In Tibetan Buddhism, Mahamudra represents a perfected level of meditative realization: it is the inseparable union of wisdom and compassion, of emptiness and skillful means. These eighty-four masters, some historical, some archetypal, accomplished this practice in India where they lived between the eighth and twelfth centuries. Leading unconventional lives, the siddhas include some of the greatest Buddhist teachers; Tilopa, Naropa, and Marpa among them. Through many years of study, Keith Dowman has collected and translated their songs of realization and the legends about them. In consultation with contemporary teachers, he gives a commentary on each of the Great Adepts and culls from available

resources what we can know of their history. Dowman's extensive Introduction traces the development of tantra and discusses the key concepts of the Mahamudra. In a lively and illuminating style, he unfolds the deeper understandings of mind that the texts encode. His treatment of the many parallels to contemporary psychology and experience makes a valuable contribution to our understanding of human nature. Keith Dowman's many publications include: *Sky Dancer: The Secret Life and Songs of the Lady Yeshe Sogyel* (Routledge & Kegan Paul) and *The Legend of the Great Stupa* (Dharma Publishing). He lives and practices in Kathmandu, Nepal.

*Tibetan Histories* Dan Martin, 1997 Over 700 items are featured in this bibliography which attempts to provide a comprehensive listing in chronological sequence of Tibetan-language works belonging to the typical historical genres that have evolved between the 11th century and the present. As well as dates and details of composition or publication, authorship and title, there are also references to the secondary literature in other languages.

*Natural Great Perfection* Nyoshul Khenpo, Lama Surya Das, 2009-01-16 Dzogchen is the consummate practice of Tibetan Buddhism. A pure awareness practice applicable to any circumstance and readily integrated into modern life, Dzogchen directly introduces us to the inherent freedom, purity, and perfection of being that is our true nature. Natural Great Perfection is an inspiring collection of teachings providing the deepest possible insight into the practice of the Dzogchen path. The teachings are followed by a collection of spontaneous vajra songs composed in the tradition of Milarepa as the delightful play of wisdom consciousness.
