Integration of the Armed Forces, 1940-1965 Morris J. MacGregor, 2020-06-18

In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy.

Moscow Rules Daniel Silva, 2009-06-30 The death of a journalist leads Israeli spy Gabriel Allon to Russia, where he finds that, in terms of spycraft, even he has something to learn in this #1 New York Times bestseller. Moscow is no longer the gray, grim city of Soviet times. Now it is awash with oil wealth and choked with bulletproof Bentleys. But in the new Russia, power once again resides behind the walls of the Kremlin. Critics of the ruling class are ruthlessly silenced. And a new generation of Stalinists plots to reclaim an empire—and challenge the United States. One of those men is Ivan Kharkov, ex-KGB, who built a financial empire on the rubble of the Soviet Union. Part of his profit comes from arms dealing. And he is about to deliver Russia's most sophisticated weapons to the United States' most dangerous enemy, unless Israeli foreign intelligence agent Gabriel Allon can stop him. Slipping across borders from Vatican City to St. Petersburg, Jerusalem to Washington, DC, Allon is playing for time—and playing by Moscow rules.

Stitches to Riches? Gladys Lopez-Acevedo, Raymond Robertson, 2016-03-28 South Asia is in the midst of a demographic transition. For the next three decades, the growth of the region's working age population will far outpace the growth of dependents. Close to one million individuals will enter the workforce every month. This large, economically active population can increase the region's capacity to save and make crucial investments in physical capital, job training, and technological advancement. But for South Asia to realize these dividends, it must ensure that its working-age population is productively employed. As one of the most prominent labor-intensive industries in developing countries, apparel manufacturing is a prime contender. With around 4.7 million workers in the formal sector and another estimated 20.3 million informally employed (combined with textiles), apparel already constitutes close to 40 percent of manufacturing employment. And given that much of apparel production continues to be labor-intensive, the potential to create more and better jobs is immense. There is a huge window of opportunity now for South Asia, given that China, the dominant producer for the last ten years, has started to cede some ground due to higher wages.

But the region faces strong competition from East Asia—with Cambodia, Indonesia, and Vietnam already pulling ahead. Plus the sector suffers from production inefficiencies and policy bottlenecks that have prevented it from achieving its potential. Against this backdrop, this report hopes to inform the debate by measuring the employment gains that the four most populous countries in South Asia—Bangladesh, India, Pakistan and Sri Lanka (hereafter ‘SAR countries’)—can expect in this new environment of increased competition and scrutiny. Its main message is that it is important for South Asian economies to remove existing impediments and facilitate growth in apparel to capture more production and create more employment as wages rise in China. The successful manufacturers will be those who can supply a wide range of quality products to buyers rapidly and reliably—not just offer low costs.

Indra's Pearls David Mumford, Caroline Series, David Wright, 2002-04-25 Felix Klein, one of the great nineteenth-century geometers, rediscovered in mathematics an idea from Eastern philosophy: the heaven of Indra contained a net of pearls, each of which was reflected in its neighbour, so that the whole Universe was mirrored in each pearl. Klein studied infinitely repeated reflections and was led to forms with multiple co-existing symmetries. For a century these ideas barely existed outside the imagination of mathematicians. However in the 1980s the authors embarked on the first computer exploration of Klein's vision, and in doing so found many further extraordinary images. Join the authors on the path from basic mathematical ideas to the simple algorithms that create the delicate fractal filigrees, most of which have never appeared in print before. Beginners can follow the step-by-step

instructions for writing programs that generate the images. Others can see how the images relate to ideas at the forefront of research.

Global Bioethics Van Rensselaer Potter,2012-01-01 Van Rensselaer Potter created and defined the term bioethics in 1970, to describe a new philosophy that sought to integrate biology, ecology, medicine, and human values. Bioethics is often linked to environmental ethics and stands in sharp contrast to biomedical ethics. Because of this confusion (and appropriation of the term in medicine), Potter chose to use the term Global Bioethics in 1988. Potter's definition of bioethics from Global Bioethics is, Biology combined with diverse humanistic knowledge forging a science that sets a system of medical and environmental priorities for acceptable survival.
