Global Geographical Heritage, Geoparks and Geotourism R.B. Singh, Dongying Wei, Subhash Anand, 2020-10-31 This book explores the geographical, geomorphological, ecological, touristic and socioeconomic aspects of natural heritage, argues for the dynamic conservation of that heritage and explains its key characteristics, promotion, conservation and management to achieve sustainable development goals. Emerging concepts such as geodiversity, geographical heritage sites, geomonuments, geoparks and geotourism are increasingly being used by conservationists. At present, the development of geoparks is a major global theme involving the application of geosciences to promote the inclusive growth of society and the protection and conservation of our unique geoheritage. Currently, there are 147 UNESCO global geoparks across 41 countries, in addition to a number of national-level geoparks. Pursuing a holistic approach towards such sites will sensitise the general public to the need for geoconservation of significant geosites and promote it through geotourism. It is a crucial issue, as various countries around the world are eager to develop their geoparks and are working for the conservation of geoheritage sites at the national level. This unique book gathers contributions from 15 countries in the form of case studies analysing the realities on of geographical heritage, geoparks and geotourism. The respective chapters address the role of geoparks as essential tools for education, recreation and nature conservation. Given its scope, the book

offers a valuable guide for geoscientists, planners, policymakers, civil society and anyone concerned about the conservation of geoheritage sites and geoparks for a sustainable future Earth.

Landscapes and Landforms of Austria Christine Embleton-Hamann, 2022-05-20
This book intends to identify and publicize the unique features of Austrian geomorphology. In a country, which stretches from the core of the European Alps to the Hungarian plain, there is huge variety of landforms and landscapes. This book reveals that variety. Part 1 sets the context of the Austrian landscape as a whole. Part 2 is the core of the volume and comprises a careful selection of the most outstanding landscapes in Austria. Each of the chapters results from detailed research conducted by an author over many years. Austria's landscapes are especially attractive because of the great variety of topographic slopes, geologic foundations and the special landscape legacy from the Quaternary period. Glacial and Karst landscapes dominate, but there are superb examples of granite weathering landscapes and geologically recent volcanism. The book is lavishly illustrated with about 350 color images and is securely based on scientific scholarship.

The Geotourism Industry in the 21st Century Bahram Nekouie Sadry, 2020-11-01
Here is an engaging overview of the development of, definition of, and approach to modern geotourism, a growing movement to help sustain and

showcase the distinctive geographical characteristics of many places around the world. This volume provides a clear conceptual framework with illustrative examples from all corners of the world to better understand abiotic nature-based tourism. The volume looks at the establishment and effective management of the over 140 UNESCO geoparks around the world and other travel and tourism destinations of interest for their significant historical, cultural, and frequently stunning physical attributes. With studies from a selection of geotourist areas, the volume explores urban geotourism, mining heritage, geomorphological landforms, geoheritage (based on cultural and historical interest), roadside geology of the U. S., community engagement and volunteer management programs, and much more. There is even a chapter on space and celestial geotourism.

Jeju Island Geopark - A Volcanic Wonder of Korea Kyung Sik Woo, Young Kwan Sohn, Seok Hoon Yoon, Ung San Ahn, Andy Spate, 2013-07-01 This book will deal with geological as well as cultural, historical, archaeological and biological aspects in Jeju Global Geopark. Geotourism in the Middle East Mamoon Allan, Ross Dowling, 2023-05-24 The geotourism industry has grown rapidly in recent years. This book introduces

the geotourism industry, its attractions, activities and developments, in selected countries of the Middle East. A number of publications and studies have investigated the nature and scope of the phenomenon of geotourism (tourism which starts from geology) and geotourists worldwide. However, despite the breadth of these studies, few publications have investigated the phenomena in the Middle Eastern countries. Consequently, this book seeks to shed light on the different aspects of geotourism and geo-diversity in the Middle East and provides a number of case studies from this region. It assists in bridging the lacuna in the tourism and geology literature and helps planners, marketers, managers, scholars and researchers to enhance their knowledge about such issues. It outlines opportunities for, as well as barriers to, geotourism development in the Middle East as well as providing recommendations for the advancement of geotourism in the region.

El Hierro Island Global Geopark Javier Dóniz-Páez, Nemesio M. Pérez, 2022-11-28 This open access book explores El Hierro Island, which is geologically the youngest of the Canary Islands (Spain). Having registered its latest volcanic eruption in 2011-2012, it is an oceanic subtropical island with low population pressure and a largely unchanged natural landscape. Accordingly, a great geodiversity of volcanic morphologies and erosion processes has been preserved. In addition, half of the land is protected as a Biosphere Reserve and as a UNESCO Global Geopark, and the island is pursuing energy self-sufficiency. Local tourism is a sustainable

activity, as the main attractions are either diving or hiking through the island's various volcanic landscapes. Covering these and other aspects, and using accessible language, the book will appeal to scientists specialized in geotourism, active leisure entrepreneurs, and members of the general public interested in volcanic geoheritage and geotourism.

Outdoor Recreation David Huddart, Tim Stott, 2019-10-25 This textbook presents a comprehensive overview of the environmental impacts of various types of outdoor recreation, and how these can be best managed. As a field of study, recreational ecology is both multidisciplinary and interdisciplinary, and the authors seek to develop a deeper understanding of both the role and function of the factors that influence visitor numbers and their impact. An accessible and comprehensive textbook, it features numerous types of outdoor recreational activities including hill walking, rock climbing, mountain marathons, skiing, scuba diving and more. Drawn from several global case studies, the authors estimate the current and future numbers involved in outdoor recreation, and how best these numbers can be managed. Effective visitor impact management actions arise from collaboration between recreation ecologists, social scientists, experienced recreation managers, recreation stakeholders and the recreationalists themselves: as such, this book will be multi-disciplinary in scope. This practical and engaging textbook will be invaluable to students and scholars of outdoor recreation and adventure tourism as well as practitioners and managers working in the field.

Semeniuk,2015-01-13 This unique book is dedicated to helping promote geoheritage, geoconservation, and geoparks in Africa and the Middle East. Local, regional, global and thematic case studies including a geoheritage toolkit are used to illustrate the scope and depth of geoheritage and highlight some current geoparks and aspiring candidates in Africa, the Middle East, China , Europe,and Australia. This special issue mainly consists of the proceedings of the First International Conference on Geoparks in Africa and Middle East (FICGAME) held in, El Jadida, Morocco in 2011. The conference, hosted by the Faculty of Sciences of Chouaib Doukkali University, was organized by the African Geoparks Network and the African Association of Women in Geosciences incollaboration with the UNESCO Cairo Office.

Danxiashan Global Geopark Hua Peng,Franz Wolfgang Eder,2012-08-28 This book presents of the most outstanding and beautiful red bed landscapes in the world, which in 2004 were included in UNESCO'sGlobal Geoparks Network, Danxiashan. Located in the Chinese Province of Guangdong, it is composed of natural elements such red rocks mainly from the Cretaceous age, green subtropical vegetation and blue waters. Furthermore, it is the name-giving region of the Danxia landforms, a term which has gained scientific and popular acceptance in the past 80 years. Danxia, meaning red cloud glow, is an absolutely wonderful name for a geological and geomorphic phenomenon that is based on a long record of geological history, a distinct development of landscapes and landforms, as well as on the presence of beautiful natural and

cultural sites, demonstrating the harmonious coexistence between mankind and nature.

Lanzarote and Chinijo Islands Geopark: From Earth to Space Elena Mateo, Jesús Martínez-Frías, Juana Vegas, 2019-04-25 This volume comprises a selection of papers describing the main features of the Lanzarote and Chinijo Islands Geopark (Canary Archipelago, Spain). The identification and characterization of terrestrial sites that can be used as planetary analogues are currently considered vital study areas of planetary geology and astrobiology. Written by experts in the various fields, this multidisciplinary book is a unique resource for graduate students and professionals alike.

The Iveragh Peninsula John Crowley, John G. Sheehan, 2009 The Iveragh Peninsula, often referred to as the 'Ring of Kerry', is one of Ireland's most dramatic and beautiful landscapes. In the Footsteps of Darwin: Geoheritage, Geotourism and Conservation in the Galapagos Islands Daniel Kelley, Kevin Page, Diego Quiroga, Raul Salazar, 2019-01-18 This book provides the first-ever overview of and guide to the geological setting and related features of the famous, volcanically

active Galapagos Islands, as well as an in-depth analysis of the setting's relationship to the region's unique and iconic ecology, and its conservation. Further, it provides an introduction to human settlement and activity on the islands, including the transition from subsistence to a fishing economy and more recently tourism, all in the context of increasingly restrictive conservation regulations. Importantly, the book also explores the development of the concept and practice of sustainable development across the islands as a framework for future economic development, pursuing an approach that reconciles the needs of the resident population with conservation of this fragile environment. The book is intended for a broad readership, from those engaged in geological and ecological studies, college and university educators and conservation practitioners, to more general visitors to the islands.

Les géoparcs mondiaux UNESCO Yves Girault, 2019-04-01 Depuis vingt ans, on assiste à la reconnaissance progressive des géoparcs mondiaux par l'UNESCO. Ce sont des espaces territoriaux qui présentent un héritage géologique d'importance internationale. Cette classification présente de véritables défis. Des stratégies de développement conformes aux recommandations successives prônées par diverses ONG doivent être mises en place. Il faut aussi impliquer les acteurs locaux tant dans la préparation du dossier de candidature que dans la mise en oeuvre d'un plan de gestion adapté suivant un développement global durable. La gestion des tensions et asymétries qui

existent entre les différents groupes d'acteurs (politiques, gestionnaires, scientifiques, représentants des populations locales) constitue également un enjeu majeur. C'est dans ce contexte et à travers des études de cas variées que cet ouvrage interroge les finalités des géoparcs mondiaux UNESCO, en termes d'inventaire et de conservation du patrimoine, de participation des populations locales, de développement local d'un territoire et de sa mise en valeur par l'interprétation du patrimoine.
