The Hospitable Leader Terry A. Smith, 2022-08-30

Successful leaders today don't dictate; they invite. They don't dismiss; they welcome. They don't neglect; they care. Now more than ever we must pay attention to the soft side of leadership if we want hard results. As leaders--from parents to CEOs--we must learn gracious leadership to truly, positively, change our spheres of influence. In this passionate, powerful book, pastor and leadership mentor Terry Smith fleshes out five vital principles you need to become a hospitable leader. He shows that this type of leadership is not superficial niceness or allowing people to do whatever they want. Hospitable leadership is result-oriented because it's motivated by genuine love. It's how you create environments where people and dreams can thrive, where vision turns to action, and where great things happen regularly. Here is everything you need to become the type of leader people want to follow.

The XX Brain Lisa Mosconi PhD, 2022-11-08 The instant New York Times bestseller! In The XX Brain, Lisa meticulously guides us in the ways we can both nourish and protect ourselves, body and

mind, to ensure our brains remain resilient throughout our lives. --from the foreword by Maria Shriver

The first book to address cognitive enhancement and Alzheimer's prevention specifically in women--and to frame brain health as an essential component of Women's Health. In this revolutionary book, Dr. Lisa Mosconi, director of the Women's Brain Initiative at Weill Cornell Medical College, provides women with the first plan to address the unique risks of the female brain. Until now, medical research has focused on bikini medicine, assuming that women are essentially men with breasts and tubes. Yet women are far more likely than men to suffer from anxiety, depression, migraines, brain injuries, and strokes. They are also twice as likely to end their lives suffering from Alzheimer's disease, even when their longer lifespans are taken into account. But in the past, the female brain has received astonishingly little attention and was rarely studied by medical researchers-- resulting in a wealth of misinformation about women's health. The XX Brain confronts this crisis by revealing how the two powerful X chromosomes that distinguish women from men impact the brain first and foremost and by focusing on a key brain-protective hormone: estrogen. Taking on all aspects of women's health, including brain fog, memory lapses, depression, stress, insomnia, hormonal imbalances, and the increased risk of dementia, Dr. Mosconi introduces cutting-edge, evidence-based approaches to protecting the female brain, including a specific diet proven to work for women, strategies to reduce stress, and useful

tips for restorative sleep. She also examines the controversy about soy and hormonal replacement therapy, takes on the perils of environmental toxins, and examines the role of our microbiome. Perhaps best of all, she makes clear that it is never too late to take care of yourself. The XX Brain is a rallying cry for women to have full access to information regarding what is going on in their brains and bodies as well as a roadmap for the path to optimal, lifelong brain health.

Covenant Medicine DAVID H. BEYDA MD, 2015-09-11
Covenant Medicine Written for healthcare providers and patients, Covenant Medicine refocuses the therapeutic relationship between physician and patient onto mutual trust, honesty, and integrity. After identifying the changes in medical culture, David H. Beyda, MD, asks fellow doctors to fix what's broken with the system, being accountable, intentional, and committed to and for the good of the patient. He discusses the physician/patient relationship as a covenant, which allows the physician to consciously agree to be truly present when working with a patient and for the patient to demand such quality, thoughtful, compassionate care. Interested in the importance of the interplay between physical and spiritual health, Beyda suggests that a covenant relationship can contain transformational aspects such as faith. This allows the physician and the patient to transcend the confining definitions of illness and come to a greater understanding of the nuances of caregiving.

Cracked Open T.L. Christianson, 2020-08-19
Dragons, bonded mates, and irreversible decisions.

After a car accident left my only parent – my father in the hospital, I was swept away to the Dragon Born Academy by my estranged grandmother. If I had to be there, I'd be an observer of this place with its rituals and superstitions... After all, everyone's made it clear I don't belong. But then it happened...and Ashe Carrick – my impossibly irresistible bond-mate happened. Being Cracked Open changed everything... Who I thought I was, WHAT I thought I was... DRAGON BORN. The words alone bring to mind monsters and princesses in castles. I am the princess and the monster they locked away. However, my story has no damsels in distress, waiting to be rescued. It's self-rescue time, and I'm done playing nice. "the chemistry, the romance, the anger, the betrayal just wow!... in my top 5 2020 reads!!" – Goodreads reviewer "Wonderfully written... impossible to put down." – Goodreads reviewer "Wow! Absolutely loved this book, cannot wait for the next in the series." – Goodreads reviewer The Dragon Born Academy Series: Cracked Open Over Easy Hard Boiled Frying Night Sunny Side Up For extras and sneak peeks visit www.tlchristianson.com

Hospital-Based Health Technology Assessment

Laura Sampietro-Colom, Janet Martin, 2017-01-23 A timely work describing how localized hospital-based health technology assessment (HB-HTA) complements general, 'arms-length' HTA agency efforts, and what has been the collective global impact of HB-HTA across the globe. While HB-HTA has gained significant momentum over the past few years, expertise in the field, and information on the operation and organization of HB-HTA, has been scattered. This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital, regional, national or global level. In addition, this book is intended for decision-makers and policy-makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting. HTA has traditionally been performed at the National/Regional level by HTA Agencies, typically linked to governments. Yet hospitals are the main entry door for most health technologies (HTs). Hospital decision-makers must undertake multiple high stakes investment and disinvestment decisions annually for innovative HTs, usually without adequate information. Despite the existence of arms-length HTA Agencies, inadequate information is available to hospital decision-makers either because relevant HTA reports are not yet released at the time of entry of new

technologies to the field, or because even when the report exists, the information contained is insufficient to clarify the contextualized informational needs of hospital decision makers. Therefore, there has recently been a rising trend toward hospital-based HTA units and programs. These units/programs complement the work of National/Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context, and within required decision-making timelines. The emergence of HB-HTA is creating a comprehensive HTA ecosystem across health care levels, which creates better bridges for knowledge translation through relevance and timeliness.

The Penguin Book of Victorian Verse ,1998-10-19
Daniel Karlin has selected poetry written and published during the reign of Queen Victoria, (1837-1901). Giving pride of place to Tennyson, Robert Browning, and Christina Rossetti, the volume offers generous selections from other major poets such as Arnold, Emily Bronte, Hardy and Hopkins, and makes room for several poem-sequences in their entirety. It is wonderful, too, in its discovery and inclusion of eccentric, dissenting, un-Victorian voices, poets who squarely refuse to 'represent' their period. It also includes the work of Elizabeth Barrett Browning, George Meredith, James Thomson and Augusta Webster.

Integration of the Armed Forces, 1940-1965
Morris J. MacGregor,2020-06-18 In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to

their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy.

x000D Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America. He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical

Division of the Joint Chiefs of Staff.
