Images That Injure Paul Martin Lester,2011-04-19 This expanded collection of new and fully revised explorations of media content identifies the ways we all have been negatively stereotyped and demonstrates how careful analysis of media portrayals can create more beneficial alternatives. Not all damaging stereotypes are obvious. In fact, the pictorial stereotypes in the media that we don't notice could be the most harmful because we aren't even aware of the negative, false ideas they perpetrate. This book presents a series of original research essays on media images of groups including African Americans, Latinos, women, the elderly, the physically disabled, gays and lesbians, and Jewish Americans, just to mention a few. Specific examples of these images are derived from a variety of sources, such as advertising, fine art, film, television shows, cartoons, the Internet, and other media, providing a wealth of material for students and professionals in almost any field. Images That Injure: Pictorial Stereotypes in the Media, Third Edition not only accurately describes and analyzes the media's harmful depictions of cultural groups, but also offers creative ideas on alternative representations of these individuals. These discussions illuminate how each of us is responsible for contributing to a sea of meaning within our mass culture.

Abomination: Devil Worship and Deception in the West Memphis Three Murders William Ramsey,2013-12-06

Abomination: Devil Worship and Deception in the West Memphis Three Murders provides a detailed, time-lined analysis of the murder that shocked the nation: the heinous killing of three eight year old boys in West Memphis, Arkansas on May 5th, 1993. A wall of deception has led the American public to erroneously believe that the three men were falsely accused and convicted for the crime. Unfortunately, this is not true. William Ramsey, author of Prophet of Evil: Aleister Crowley, 9/11 and the New World Order, provides shocking insights into the lives of the convicted murderers and their involvement with witchcraft. Relying on actual court and police records, William Ramsey shows that the evidence abundantly points to the guilt of the West Memphis Three.

New Worlds: Before the New Wave, 1960-1964 John Boston,Damien Broderick,2013-04-30 In the mid-1960s, British science fiction and fantasy were convulsed by the New Wave. This movement emerged from the SF magazines edited by John Carnell. Such brilliant NEW WORLDS and SCIENCE FANTASY writers as J. G. Ballard, Brian W. Aldiss, John Brunner, and Michael Moorcock heralded the rise of this new kind of fantastic fiction. John Boston and Damien Broderick's concluding volume of their critical trilogy examines the history and development of these important magazines--and the fiction that they championed. By the end of this period (1964), Carnell had set the stage for that major development in UK science fiction--the new wave adventures of the transformed NEW WORLDS, under the editorship of Moorcock--and had himself shifted gear into the next mode of SF publishing as editor of the paperback anthology series, New Writings in SF. Boston and Broderick's series will become the definitive critical histories of these important British magazines. Complete with indices of names and titles cited.

Envisioning the Dream Through Art and Science Robert G. Kuzendorf,James Veatch,2016-11-03 This monograph is the product of an interdisciplinary experiment--an artistic experiment and a psychological experiment--focused on dreams. Inspired by the prevalence of dream imagery and dream logic in surrealist art, the authors asked 100 art students to create digital images representing critical scenes from one of their dreams, then to create a surrealist collage from the digital images. The resulting collages tend to capture the surreality envisioned in actual works of surrealist art, as two collages included in the book illustrate. Inspired also by the psychological problem of studying other minds, the authors asked the 100 art students to describe their dream in writing, to interpret their dream, and to complete two personality measures: the Short Form of the Boundary Questionnaire and the Brief Symptom Inventory. The art students' scores on particular personality scales were found to be statistically associated with particular dream aspects, many of which are visually observable in the digitized dream images created by art students with particular personalities but are not verbally discernible in the dream descriptions written by those same students. The appendix contains, for each art student, the digitally imaged dream, the written description and written interpretation of the dream, and scores on the Boundary Questionnaire and on the depression, anxiety, hostility, and somatization scales of the Brief Symptom Inventory. The book concludes with a bibliography and an index to some of the visual elements in the 100 digitized dream images.
