The Enigmatic Netherworld Books of the Solar-Osirian Unity John Coleman Darnell, 2004 In Egypt, from the Old to the New Kingdom, enigmatic texts were created on the basis of non-standardized lists of characters and phonetic signs, the exact principles of which are still unclear to this day. For the first time, this study examines in detail the three most comprehensive known inscription texts from the New Kingdom, which were discovered in the tombs of Tutenchamun, Ramses VI and Ramses IX. Darnell shows that these three texts have a theological, iconographic and formal connection, and calls them collectively the Book of the Solar-Osirian Unity. Differentiated and lively, he presents the content and theological peculiarities of these texts that deal with the afterlife with each other and in relation to other enigmatic texts of the new as well as the Middle and Old Kingdom.

The Politics of Research E. Ann Kaplan, George Lewis Levine, 1997 Eloquent, provocative, and timely, these essays provide a thoughtful, undogmatic defense of the centrality of the humanities to higher education--and society--at the millennium.--Cora Kaplan, University of Southampton The crisis in the humanities and higher education intensifies daily. The partisan din drowns out the voices of those thinkers who have resisted the seductions of strong ideology. Against the tendencies of the extreme attacks on higher education from the right and the counterattacks from the left, many academics would prefer to get beyond critical fashions and easy

slogans. In this collection, leading scholars demonstrate how the current furor threatens the critical analysis of culture, so vital to a healthy society. They explore the historical sources of the crisis, the relations between politics and research, the responsibilities and possibilities of the academic intellectual, the structure of the institution of the university, the functions and achievements of the humanities, and the development of interdisciplinarity as a catalyst for change. This volume is a necessary resource for understanding the current crisis and for transforming the academy as we approach the twenty-first century. The contributors are Jonathan Arac, Lauren Berlant, Peter Brooks, Roman de la Campa, Myra Jehlen, Stanley Katz, Richard Kramer, Dominick LaCapra, George Levine, Ellen Messer-Davidow, Helene Moglen, Bill Readings, and Bruce Robbins. E. Ann Kaplan is the director of The Humanities Institute at the State University of New York at Stony Brook

Body Science Dave Champion, 2019-11-15 Body Science is a groundbreaking book on health, nutrition, physiology, and prevention of chronic disease, providing new revelations about how the human body reacts to various macronutrients and how diet impacts the operation of certain critical systems of the body, and how those systems operate, and in some cases, deteriorate or rebel, resulting in the onset of chronic disease. Body Science provides names for critical physiological sequences, which has been left unnamed by the medical industry. Body Science reveals the politics and financial motivations that have led Big Gov, Big Med, Big Pharma, and Big Food to conceal physiological truths from the American public for 60 years, thereby creating the worst

health crisis the world has ever known. Body Science explores nutritional anthropology and settles the question of what our bodies are genetically coded to eat. It details how mankind has drifted away from nutrient consumption in accordance with man's genetic coding, over what period of time that separation has occurred, and the physiological consequences of that separation. Body Science provides a clear path to correct the errant direction mankind has taken and in so doing stop the worst health crisis the world has ever known dead in its tracks.

60 Robert Khayat, 2021-06-09 In 1960, 22-year-old Robert Khayat experienced a year in which his own life, the nation, and the state of Mississippi were forever changed. The same spring that four college students in North Carolina refused to move from a segregated lunch counter, Khayat's SEC champion Ole Miss baseball team was denied the right to play in the NCAA tournament because they might encounter a Black opponent. At the same time that young John F. Kennedy became a household name, Khayat's dark-skinned father was making an unlikely ascent to become one of the most politically powerful men in Mississippi. And two high-profile segregationists - Redskins owner George Preston Marshall and Mississippi Governor Ross Barnett - would impact Khayat's life in ways he could never have imagined. The events of 1960 set the stage for a revolution . . . and Robert Khayat was living in the midst of it all. **60: A Year of Sports, Race & Politics** is the story of the year that changed everything for a nation, its

culture, and a promising young man from Mississippi.

The Ancient Egyptian Netherworld Books John Coleman Darnell, Colleen Manassa Darnell, 2018-11-07
The first, complete English translation of the ancient Egyptian Netherworld Books The ancient Egyptian Netherworld Books, important compositions that decorated the New Kingdom royal tombs in the Valley of the Kings, present humanity's oldest surviving attempts to provide a scientific map of the unseen realms beyond the visible cosmos and contain imagery and annotations that represent ancient Egyptian speculation (essentially philosophical and theological) about the events of the solar journey through the twelve hours of the night. The Netherworld Books describe one of the central mysteries of Egyptian religious belief—the union of the solar god Re with the underworldly god Osiris—and provide information on aspects of Egyptian theology and cosmography not present in the now more widely read Book of the Dead. Numerous illustrations provide overview images and individual scenes from each Netherworld Book, emphasizing the unity of text and image within the compositions. The major texts translated include the Book of Adoring Re in the West (the Litany of Re), the Book of the Hidden Chamber (Amduat), the Book of Gates, the Book of Caverns, the Books of the Creation of the Solar Disk, and the Books of the Solar-Osirian Unity. Features: Accessible presentations of the main concepts of the Netherworld Books and the chief features of each text Notes and commentary address major theological themes within the texts as well as

lexicographic and/or grammatical issues An overview of later uses of these compositions during the first millennium BCE

Her Dior Maria Grazia Chiuri, 2021-03-02 A powerful collection of photographs and essays by trailblazing women that celebrates Maria Grazia Chiuri's feminine and feminist spirit within the House of Dior. Since being appointed the first female creative director of Dior in 2016, Maria Grazia Chiuri has infused the illustrious fashion brand with a strong current of feminism. Her approach is at once refreshing and needed, while still paying homage to the avant-garde ethos that has been at the heart of the house since its founding by Christian Dior in 1947. This beautifully produced volume presents 160 images by leading female photographers such as Nan Goldin, Sarah Moon, Brigitte Niedermair, Coco Capitán, Vanina Sorrenti, Julia Hetta, Katerina Jebb, Zoë Ghertner, and Bettina Rheims. The women creators featured among these pages represent the breadth

of style and diversity upheld by the Maison Dior. Thought-provoking quotes and poems from inspirational women--Chimamanda Ngozi Adichie, Linda Nochlin, Claire Fontaine, Judy Chicago, and Tomaso Binga, to name a few--accompany the striking photographs. Showcasing Chiuri's haute couture and ready-to-wear collections from 2017 to 2021, Her Dior captures the creative director's innovations at the house--where, for the past five years, she's reclaimed the narrative creating Dior fashions for women, by women.
