Computational Interaction Antti Oulasvirta, Per Ola Kristensson, Xiaojun Bi, Andrew Howes, 2018 This book presents computational interaction as an approach to explaining and enhancing the interaction between humans and information technology. Computational interaction applies abstraction, automation, and analysis to inform our understanding of the structure of interaction and also to inform the design of the software that drives new and exciting human-computer interfaces. The methods of computational interaction allow, for example, designers to identify user interfaces that are optimal against some objective criteria. They also allow software engineers to build interactive systems that adapt their behaviour to better suit individual capacities and preferences.00This book introduces computational interaction design to the reader by exploring a wide range of computational interaction techniques, strategies and methods. It explains how techniques such as optimisation, economic modelling, machine learning, control theory, formal methods, cognitive models and statistical language processing can be used to model interaction and design more expressive, efficient and versatile interaction.

Ngaju Religion Hans Schärer, 2013-03-09 Hans Scharer was born at Wadenswil (near Zurich), Switzerland, in 1904. After his school years, he was trained for (Protestant) missionary work at the Missionshaus in BiHe. For seven years, 1932-1939, he lived among the Ngaju in southern Borneo; first with the Ngaju speaking people of the Katingan river area, later, for a shorter period. with those living along the Barito. He was granted European leave in 1939, and spent the years 1939-1944 studying Ethnology (as it then was called) under Professor J.P.B. de Josselin de Jong at Leiden University. He

went home to Switzerland in 1944, but returned to Leiden in 1946 to complete his studies and defend his Ph. D. thesis on Die Gottesidee der N gadju Dajak in Sud-Borneo. It is this thesis which. published by E.J. Brill, Leiden, in 1946, is now being re-issued in English translation. Soon after, he left once more for the Ngaju territory, as Praeses of the Baseler Mission in south Borneo. He died there suddenly on December 10th, 1947, of blood-poisoning. These few biographical data are not merely of some slight historical interest: they help us to understand the man and his work. The present book is Scharer's only major work to have been published, and for Scharer himself it was, in a way, an experiment.

The Purple Rain The Mockingjay,2021-07 The important thing is that we find the courage to get our stories out into the world. In The Purple Rain the author tried to mirror an important part of her life story, a journey through past four years. Death of her father, and everything in between. A feeling she probably would never be able to explain...like a directionless whirlwind. At once, this book is a depiction of Hope, Survival, and Determination.

High Efficiency Video Coding (HEVC) Vivienne Sze,Madhukar Budagavi,Gary J. Sullivan,2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding

(HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

Twitter Jean Burgess,Nancy K. Baym,2020-04-28 The sometimes surprising, often humorous story of the forces that came together to shape the central role Twitter now plays in contemporary politics and culture Is Twitter a place for sociability and conversation, a platform for public broadcasting, or a network for discussion? Digital platforms have become influential in every sphere of communication, from the intimate and everyday to the public, professional, and political. Since the scrappy startup days of social media in the mid-2000s, not only has the worldwide importance of platforms grown

exponentially, but also their cultures have shifted dramatically, in a variety of directions. These changes have brought new opportunities for progressive communities to thrive online, as well as widespread problems with commercial exploitation, disinformation, and hate speech. Twitter's growth over the past decade, like that of much social media, has far surpassed its creators' vision. Twitter charts this trajectory in the format of a platform biography: a new, streamlined approach to understanding how platforms change over time. Through the often surprising, fast-moving story of Twitter, it illuminates the multiple forces—from politics and business to digital ideologies—that came together to shape the evolution of this revolutionary platform. Jean Burgess and Nancy K. Baym build a rich narrative of how Twitter has evolved as a technology, a company, and a culture, from its origins as a personal messaging service to its transformation into one of the most globally influential social media platforms, where history and culture is not only recorded but written in real time.

Playing to the Crowd Nancy K. Baym, 2018-07-10 Explains what happened to music—for both artists and fans—when music went online. *Playing to the Crowd* explores and explains how the rise of digital communication platforms has transformed artist-fan relationships into something closer to friendship or family. Through in-depth interviews with musicians such as Billy Bragg and Richie Hawtin, as well as members of the Cure, UB40, and Throwing Muses, Baym reveals how new media has facilitated these connections through the active,

and often required, participation of the artists and their devoted, digital fan base. Before the rise of social sharing and user-generated content, fans were mostly seen as an undifferentiated and unidentifiable mass, often mediated through record labels and the press. However, in today's networked era, musicians and fans have built more active relationships through social media, fan sites, and artist sites, giving fans a new sense of intimacy and offering artists unparalleled information about their audiences. However, this comes at a price. For audiences, meeting their heroes can kill the mystique. And for artists, maintaining active relationships with so many people can be both personally and financially draining, as well as extremely labor intensive. Drawing on her own rich history as an active and deeply connected music fan, Baym offers an entirely new approach to media culture, arguing that the work musicians put in to create and maintain these intimate relationships reflect the demands of the gig economy, one which requires resources and strategies that we must all come to recognize and appreciate.
