Suresh Chandra Satapathy,Amit Joshi

Information and Communication Technology for Intelligent Systems Suresh Chandra Satapathy, Amit Joshi, 2018-12-30 The book gathers papers addressing state-of-the-art research in all areas of Information and Communication Technologies and their applications in intelligent computing, cloud storage, data mining and software analysis. It presents the outcomes of the third International Conference on Information and Communication Technology for Intelligent Systems, which was held on April 6–7, 2018, in Ahmedabad, India. Divided into two volumes, the book discusses the fundamentals of various data analytics and algorithms, making it a valuable resource for researchers' future studies.

Proceedings of the International Conference on Soft Computing Systems L. Padma Suresh, Bijaya Ketan Panigrahi, 2015-12-28 The book is a collection of high-quality peer-reviewed research papers presented in International Conference on Soft Computing Systems (ICSCS 2015) held at Noorul Islam Centre for Higher Education, Chennai, India. These research papers provide the latest developments in the emerging areas of Soft Computing in Engineering and Technology. The book is organized in two volumes and discusses a wide variety of industrial, engineering and scientific applications of the emerging techniques. It presents invited papers from the inventors/originators of new applications and advanced technologies.

Inherited Metabolic Epilepsies Phillip L. Pearl, MD, 2012-10-04 The

explosion of information in neurogenetics and metabolism mandates increasing awareness of appropriate diagnostic and therapeutic strategies in the setting of certain epilepsies, especially those of very early onset. There are over 200 inherited disorders that are associated with seizures and prompt identification and intervention is crucial for a positive outcome. This text brings together leading authorities presenting state-of-the-art clinical reviews covering the science, recognition, and treatment of the inherited metabolic epilepsies and related disorders. Inherited Metabolic Epilepsies opens with a section on general principles for diagnosis and targeted intervention including screening protocols, laboratory testing, neuroimaging, seizure patterns and EEG findings, new technologies, and the ketogenic diet in metabolic epilepsies. The next two sections are devoted to the cohort of specific small molecule disorders (aminoacidopathies, organic acidopathies, mitochondrial disorders, urea cycle disorders, neurotransmitter disorders, and glucose-related disorders) and large molecule disorders (lysosomal storage disorders, peroxisomal diseases, glycosylation defects, and leukodystrophies) that are treatable yet can be so vexing to clinicians and investigators. The book concludes with a clinical algorithm designed to be a resource for the physician in search of direction when considering an inherited metabolic disorder as the explanation for a patient with epilepsy. Inherited Metabolic Epilepsies Key Features: Presents the latest scientific thinking and clinical wisdom for a poorly understood group of disorders that have devastating

consequences if unrecognized or not promptly treated Expert authorship from both the genetic-metabolic and epilepsy communities provides state-of-the-art guidance for understanding and managing these disorders A readable text for clinicians highlighting the relation between metabolic errors and epilepsy Concludes with a practical algorithm for evaluating a patient with a possible metabolic epilepsy

Soil pollution: a hidden reality Food and Agriculture Organization of the United Nations, 2018-04-30 This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially S01, S02, S04 and S05 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO₂ and N₂O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning

more about sources and effects of soil pollution.

Computing and Network Sustainability Sheng-Lung Peng, Nilanjan Dey, Mahesh Bunde, 2019-05-02 This book offers a compilation of technical papers presented at the International Research Symposium on Computing and Network Sustainability (IRSCNS 2018) held in Goa, India on 30–31st August 2018. It covers areas such as sustainable computing and security, sustainable systems and technologies, sustainable methodologies and applications, sustainable networks applications and solutions, user-centered services and systems and mobile data management. Presenting novel and recent technologies, it is a valuable resource for researchers and industry professionals alike.

Solid Waste Engineering and Management Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, 2022-01-01 This book is the first volume in a three-volume set on Solid Waste Engineering and Management. It provides an introduction to the topic, and focuses on legislation, transportation, transfer station, characterization, mechanical volume reduction, measurement, combustion, incineration, composting, landfilling, and systems planning as it pertains to solid waste management. The three volumes comprehensively discuss various contemporary issues associated with solid waste pollution management, impacts on the environment and vulnerable human populations, and solutions to these problems.

Emerging Issues in Fish Larvae Research Manuel Yúfera, 2018-01-22 This book deals with the fundamentals of key physiological mechanisms involved in the

development and growth of fish larvae. Chapters included show how the environmental and nutritional conditions are affecting the developmental process from its molecular basis and how these same conditions also influence the final characteristics of late larvae and fry. This volume provides recent findings on the importance of environmental rhythms, some specific nutrients and the adequate microbial environment in the developmental processes including recent results of current research projects.

Land Plants - Trees ,2015-06-26 Advances in Botanical Research publishes in-depth and up-to-date reviews on a wide range of topics in plant sciences. Currently in its 74th volume, the series features several reviews by recognized experts on all aspects of plant genetics, biochemistry, cell biology, molecular biology, physiology, and ecology. This volume features reviews on the advances in knowledge for the main traits important in fruit trees and forest trees, the advances in tools and resources for genetics and genomics in these species, and the knowledge developed in three rather separated communities of researchers: forest, fruit trees, and grapevines. Provides an update of the knowledge related to plant biology for the main traits for forest and fruit trees Provides an update about the tools available for the study of this category of plants Gives a general view of research results obtained in two separate research communities, fruit trees and forest trees

Microalgal Production for Biomass and High-Value Products Stephen P.

Slocombe, John R. Benemann, 2017-12-19 Microalgae are a particularly interesting source of products that range from currently marketed human nutritionals and food ingredients, to potential sources of biofuels and animal feeds. Rapid advances in technology and commercial development are taking place worldwide. Importantly, algal cultivation does not compete with agriculture for land, water, and in some cases, fertilizer resources. Microalgal Production for Biomass and High-Value Products covers the field from a variety of perspectives with 14 chapters contributed by recognized academic experts and industrial practitioners. The book presents the latest technologies and innovations in algal biomass production, from cultivation in open ponds and photobioreactors, to strain selection, synthetic biology, pest control, harvesting, and processing. It explores novel algal products and addresses key issues, including markets, supply chains, business strategies, legal issues, current products, and future prospects. This book brings together the latest advances of interest to those already working in the field while providing an introduction to those beginning to learn about the promise of microalgae as a sustainable source of both specialty and commodity products. It gives stimulating overviews from many different perspectives that describe how laboratory and applied research are creating advances in commercial microalgae production. It also addresses the still many open questions and challenges in this field.

Positioning and Power in Academic Publishing: Players, Agents and Agendas

F. Loizides, B. Schmidt, 2016-05-26 The field of electronic publishing has grown exponentially in the last two decades, but we are still in the middle of this digital transformation. With technologies coming and going for all kinds of reasons, the distribution of economic, technological and discursive power continues to be negotiated. This book presents the proceedings of the 20th Conference on Electronic Publishing (Elpub), held in Göttingen, Germany, in June 2016. This year's conference explores issues of positioning and power in academic publishing, and it brings together world leading stakeholders such as academics, practitioners, policymakers, students and entrepreneurs from a wide variety of fields to exchange information and discuss the advent of innovations in the areas of electronic publishing, as well as reflect on the development in the field over the last 20 years. Topics covered in the papers include how to maintain the quality of electronic publications, modeling processes and the increasingly prevalent issue of open access, as well as new systems, database repositories and datasets. This overview of the field will be of interest to all those who work in or make use of electronic publishing.

Wireless Communications Systems Design Haesik Kim, 2015-08-06 em style=mso-

Wireless Communications Systems Design provides the basic knowledge and methodology for wireless communications design. The book mainly focuses on a broadband wireless communication system based on OFDM/OFDMA system because it is widely used in the modern wireless communication system. It is divided into three parts: wireless communication theory (part I), wireless communication block design (part II), and wireless communication block integration (part III). Written by an expert with various experience in system design (standards, research and development)

Matrixing Chi Al Case, 2020-09-16 Matrixing is the first and only science of the martial arts. Matrixing has been used to resolve martial arts both common and rare, bringing new lights to ancient disciplines. In this book the science of matrixing is used to define chi power. Chi is a type of energy that permeates the universe. Actually, the universe is made of chi, thus, it is impossible for science and physics to define or measure chi in any way. With matrixing, however, it is possible to define, and measure, chi power. Further, in this book the author shares his most scientific methods for generating chi, and manipulating it. He does this through a profound study of the martial arts. About the author: Al Case began the martial arts in 1967. Since that time he has studied Kenpo, classical Karate, Wing Chun, Aikido, Northern Shaolin Ton Toi, Southern Shaolin Fut Ga, Tai Chi Chuan, Pa Kua Chang, Indonesian weapons and more. He was a writer for the martial arts magazines, including a column in Inside Karate. He has written over 40

martial arts training manuals, and is the webmaster of MonsterMartialArts.com.

Structural and Functional Aspects of Transport in Roots B.C.

Anthocyanins as Food Colors Pericles Markakis, 2012-12-02 Anthocyanins as Food Colors aims to assemble scattered information on anthocyanins pertinent to food coloration. Both basic and applied aspects of these pigments are discussed. Organized into nine chapters, this book begins with a discussion of the chemical structure of anthocyanins, followed by its copigmentation and biosynthesis. It then discusses the distribution of anthocyanin in food plants, as well as the compounds' stability in food. This work also looks into the analysis of anthocyanins and their presence in grapes and wine. Utilization of anthocyanins as food additives is addressed in the last chapter. This book will provide additional information in order to maximize the visual appeal of these pigments both in products in which they are naturally present and in products to which they may be added as colorants.

Linking People, Place, and Policy Stephen J. Walsh, Kelley A. Crews-Meyer, 2012-12-06 Linking People, Place, and Policy: A GIScience Approach describes a breadth of research associated with the study of human-environment interactions, with particular emphasis on land use and land cover dynamics. This book examines the social, biophysical, and geographical

drivers of land use and land cover patterns and their dynamics, which are interpreted within a policy-relevant context. Concepts, tools, and techniques within Geographic Information Science serve as the unifying methodological framework in which landscapes in Thailand, Ecuador, Kenya, Cambodia, China, Brazil, Nepal, and the United States are examined through analyses conducted using quantitative, qualitative, and image-based techniques. Linking People, Place, and Policy: A GIScience Approach addresses a need for a comprehensive and rigorous treatment of GIScience for research and study within the context of human-environment interactions. The human dimensions research community, land use and land cover change programs, and human and landscape ecology communities, among others, are collectively viewing the landscape within a spatially-explicit perspective, where people are viewed as agents of landscape change that shape and are shaped by the landscape, and where landscape form and function are assessed within a space-time context. This book articulates some of these challenges and opportunities.

Foams Isabelle Cantat, Sylvie Cohen-Addad, Florence Elias, François Graner, Reinhard Höhler, 2013-07-11 In this book, beginners, engineers, and researchers entering the field can easily find clear, up-to-date answers to their questions regarding the physical and physico-chemical properties of aqueous foams, as well as their numerous industrial applications, explained using current knowledge of their structure, their stability, and their rheology.

Alien Gene Transfer in Crop Plants, Volume 2 Aditya Pratap, Jitendra Kumar, 2016-08-23 Genetic engineering and biotechnology along with conventional breeding have played an important role in developing superior cultivars by transferring economically important traits from distant, wild and even unrelated species to the cultivated varieties which otherwise could not have been possible with conventional breeding. There is a vast amount of literature pertaining to the genetic improvement of crops over last few decades. However, the wonderful results achieved by crop scientists in food legumes' research and development over the years are scattered in different journals of the World. The two volumes in the series 'Alien Gene Transfer in Crop Plants' address this issue and offer a comprehensive reference on the developments made in major food crops of the world. These volumes aim at bringing the contributions from globally renowned scientists at one platform in a reader-friendly manner. The second volume entitled, "Alien Gene Transfer in Crop Plants: Achievements and Impact" will deal more with the practical aspects. This volume will cover achievements of alien gene transfer in major food crops of the world and their impact on development of newer genetic variability and additional avenues for selection; development of superior cultivars for increased yield, resistance to biotic and abiotic stresses, improved nutritional and industrial quality; innovation of new techniques and positive as well as negative environmental implications. This volume has been divided into four groups with an aim to cover all major cereals, pulses,

oilseeds and other crops (vegetable and horticultural crops) which are of economic importance.

The Physiology of Microalgae Michael A. Borowitzka, John Beardall, John A. Raven, 2016-03-21 This book covers the state-of-the-art of microalgae physiology and biochemistry (and the several -omics). It serves as a key reference work for those working with microalgae, whether in the lab, the field, or for commercial applications. It is aimed at new entrants into the field (i.e. PhD students) as well as experienced practitioners. It has been over 40 years since the publication of a book on algal physiology. Apart from reviews and chapters no other comprehensive book on this topic has been published. Research on microalgae has expanded enormously since then, as has the commercial exploitation of microalgae. This volume thoroughly deals with the most critical physiological and biochemical processes governing algal growth and production.
