Flying Across America Daniel L. Rust, 2012-11-20

Americans who now endure the inconveniences of crowded airports, packed airplanes, and missed connections might not realize that flying was once an elegant, exhilarating adventure. In this colorful history, Daniel L. Rust traces the evolution of commercial air travel from the first transcontinental expeditions of the 1920s, through the luxurious airline environments of the 1960s, to the more hectic, fatiguing experiences of flying in the post-9/11 era. In the beginning, flying coast-to-coast was an exciting yet uncomfortable journey of nearly forty-eight hours that required numerous stops and overnight travel by train. With time and technical innovation, passengers became increasingly removed both physically and psychologically from the raw experience of flying. Faster planes, pressurized cabins, onboard amenities, and stronger safety precautions made flying more convenient and predictable—but also less evocative and sensational. Prior to the 1980s, Americans dressed for air travel in their formal best and enjoyed such luxurious onboard amenities as delicious meals and ample cabin space. What made air travel glamorous, however, also made it more expensive. With deregulation in 1978, cost reductions reduced flying to a more tedious and, after 9/11, more regimented experience. Rust's narrative brims with firsthand accounts from such celebrities as Will Rogers and from ordinary Americans. Enlivened by more than 100 illustrations, including vintage brochures, posters, and photographs, *Flying Across America* reminds today's airline passengers of what they have gained—and what they have lost—in the transcontinental flying experience.

passengers to personal planes.

Jet Age Sam Howe Verhovek, 2010-10-14 The captivating story of the titans, engineers, and pilots who raced to design a safe and lucrative passenger jet. In *Jet Age*, journalist Sam Howe Verhovek explores the advent of the first generation of jet airliners and the people who designed, built, and flew them. The path to jet travel was triumphal and amazingly rapid—less than fifty years after the Wright Brothers' first flight at Kitty Hawk, Great Britain led the world with the first commercial jet plane service. Yet the pioneering British Comet was cursed with a tragic, mysterious flaw, and an upstart Seattle company put a new competitor in the sky: the Boeing 707 Jet Stratoliner. *Jet Age* vividly recreates the race between two nations, two global airlines, and two rival teams of brilliant engineers for bragging rights to the first jet service across the Atlantic Ocean in 1958. At the center of this story are great minds and courageous souls, including Sir Geoffrey de Havilland, who spearheaded the development of the Comet, even as two of his sons lost their lives flying earlier models of his aircraft; Sir Arnold Hall, the brilliant British aerodynamicist tasked with uncovering the Comet's fatal flaw; Bill Allen, Boeing's deceptively mild-mannered president; and Alvin Tex Johnston, Boeing's swashbuckling but supremely skilled test pilot. The extraordinary airplanes themselves emerge as characters in the drama. As the Comet and the Boeing 707 go head-to-head, flying twice as fast and high as the propeller planes that preceded them, the book captures the electrifying spirit of an era: the Jet Age. In the spirit of Stephen Ambrose's *Nothing Like It in the World*, Verhovek's *Jet Age* offers a gorgeous rendering of an exciting age and fascinating technology that permanently changed our conception of distance and time, of a triumph of

engineering and design, and of a company that took a huge gamble and won.

The Fascinating World of Aviation Jaime

Fernandez, 2020-08-13 This is an entertainment book with real facts and history concerning about these aluminum birds with big wings we see every day in the sky. After doing many surveys and talking to people in airports worldwide, I found out that people do not have much knowledge about the fascinating world of aviation. I felt that I had to tell them with simple words, a little bit of my personal traveling experience, and with all my research done with books of different languages like Portuguese, Italian, Spanish, and English. I will tell facts and history of the airplanes. We all take flight in some point of our life. Buying a ticket, first thing is to check the price and compare it with all the different airlines to get the best bargain. Timeframe, documents and visas if you are going out of the country. Check the weather, clothes to wear, seat in the plane (window or corridor), etc. Do you know what manufacturer is the airplane you are going to be when you are 35,000 feet in the air? How the huge plane with more than 300,000 lb. of weight can stay in the air? How safe are they? The difference between one and another. This book will answer these questions and many more about aviation. My book *The Fascinating World of Aviation* describe in an enjoyable way with the following five chapters: 1. History of Aviation 2. What Is an Airplane and How Safe Is It? 3. What is an Airport? 4. The Boeing Company and Their Airplane 737 Max 8 5. Tips and Suggestions for Passengers

More Than a Ticket Argie Ella Hoskins, 2014-08-07

Cover: The new Boeing 707 Jet. This book welcomes the reader with snapshots during the golden age of flying from carrying mail to a time when excited passengers were treated as guests and everyone dressed in their Sunday

best to board American Airlines. It is engaging and appreciated. We served the flying public with much, much More Than a Ticket. We had time to hang coats, learn names, have a conversation, serve a delicious meal and hold babies. You will feel the excitement of times gone by and get a glimpse of how the atmosphere of air travel has changed through the years. The drama of time has created a different picture. Part one: My Life as a Stewardess, takes the reader on a journey with a shy country girl to the city, but she is still a country girl as she becomes a confident stewardess serving all passengers, including the rich and famous, making everyone feel at home. How did she do it? Part two: On Wings of Time, features short stories from AA stewardesses, pilots, flight engineers, and passengers. The young and old, casual readers and aviation enthusiasts will be delighted with memoirs. Stewardess Argie, Am I cut out for this job? They say I am Dyslexic. Make friends with your cognitive gifts. (Stewardess on Boeing 707 jet inaugural flight and also did public relations for AA.) Jon, son of pilot Heath Proctor, My father was a pioneer airmail pilot, Dad's AA retiree ID card, with employee number 02 on it! (Father deceased.) Curt, son of AA mechanic and later a Flight Engineer Roy Jacobson, I'll never forget the smell of jet fuel. We would go through the hangars and look at the planes. (Father deceased.) Stewardess MaryLou, A secretarial job opened a few miles from home with AA engineering office. I never wanted to leave. (MaryLou was on the Electra team and subsequently became an AA stewardess.) Stewardess Audrey, Once a stewardess, always a stewardess. (Flew as a stewardess and then flight attendant.) Stewardess Gerry, I was really nervous when I arrived because the other girls waiting to be interviewed were wearing business suits, high heels, gloves, and some were wearing hats. I was wearing a broomstick skirt and sandals. (Friend who flew on Boeing

707s with me.) Stewardess Polly, Interviews are over, and besides, you aren't the type. (Polly became an outstanding Stewardess.) Stewardess Joan, Important faces stood out in the crowd. (Face in the crowd was a younger man who become her husband.) Passenger Margaret, now age 97, I thought he was getting a little too friendly (Taxi cab driver.) Passenger Bob, I don't know what I mumbled, but when the plane started to roll forward to take off, she sat down beside me, smiled, and one of her soft hands covered my gripping knuckles, and we were off and flying. (Bob had been a passenger in two near misses before this flight.) Stewardess Diane, I told him that I would meet him at the gate. After we finished deplaning, I thought to myself, 'Did I do the right thing?' (Passenger without a ride to his home near where Diane lived.) Stewardess Judi, ... meeting President Kennedy and then my husband are hard to top! (Husband was a famous singer/actor.) Engineer to Captain Tony, There were no real flight simulators in those Pleistocene days, so all of the flight training was done in the airplane. (Tony was responsible for training AA jet pilots.) I have dedicated these words with love and respect to my flying friends. An expression of appreciation for the community of American Airlines. Somewhere in the clouds of time, we met, embraced, and parted. Moments remembered from here to eternity. -Argie Charities to receive % of profit: The National MPS Society, Acacia Shade, Children with Disabilities in Ghana (Africa), Orton Dyslexia Society, National Kiwi Fund, LDS Humanitarian Fund No one has ever become poor by giving. - Anne Frank

Leaving on a Jet Plane William L. Ippolito, 2003 The Captain's airline career is the story of the remarkable period in the 20th century we call The Jet Age, one filled with adventure, tragedy, humor, good fortune and bad passengers. We learn of the adventures of Apple Core

Annie, whose nickname Hardcore reveals much. There is the food fight at 35,000 feet, as 40 summer camp bound youths nearly destroy a Boeing 727, and the Christmas Eve riot as 200 New York bound passengers duke it out over no smoking seats. Never to be forgotten are the tragic events where close friends are killed in senseless training accidents and innocent passengers lives are lost in sometimes-inexplicable circumstances. Bankruptcies, deregulation, hijackings and famous people are all part of the memories of the veteran captain whose career spanned the era when the jet plane became mass transportation.--From cover

AIR CRASH INVESTIGATIONS GHOSTS? The Crash of Eastern Air Lines Flight 401 Pete Collins,

Editor, 2012-11-01 On December 29, 1972 an Eastern Air Lines' Lockheed L-1011, as Flight 401 on its way from John F. Kennedy International Airport, New York, to Miami International Airport, Miami, Florida, crashed at 2342 eastern standard time in the Everglades, approximately 18 miles west northwest of Miami International Airport. The aircraft was destroyed. There were 163 passengers and a crew of 13 aboard the aircraft, 99 people died in the crash. The flight was diverted because of problems with the nose landing gear. The aircraft climbed to 2,000 feet while the crew attempted to correct the problem. Surviving passengers and crewmembers stated that the flight was routine and operated normally before impact with the ground. The National Transportation Safety Board determines that the probable cause of this accident, was preoccupation with a malfunction of the nose landing gear position indicating system distracted the crew's attention from the instruments and allowed the descent to go unnoticed.

Colorful Aircraft Norbert Andrup, 2010 Who has not been astonished at an airport when he sees a particularly

eye-catching airplane with an extremely elaborate paint job? More and more often, airlines make use of special painting whether to celebrate an anniversary, advertise a certain product, or just to attract attention. In this book, the author uses superb, detailed color images to portray, for the first time, nearly all the special paintings of international airlines, along with background information on their history. Among others, the following airlines are presented: Lufthansa, Germanwings, Germania, LTU, British Airways, Virgin Atlantic, BMI, Ryanair, Air France, Alitalia, SAS, Finnair, KLM, Iberia, SAA, Cathay Pacific, All Nippon, JAL, Korean Air, Asiana, China Airlines, Singapore, Quantas, Air China, PIA, Qatar, Etihad, Emirates, El Al, Southwest, Northwest, Delta, United, American, America West, Braniff, US Air, Air Canada, Varig, TAM, Star Alliance.

The Airliner Cabin Environment and the Health of Passengers and Crew National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Air Quality in Passenger Cabins of Commercial Aircraft, 2002-02-03 Although poor air quality is probably not the hazard that is foremost in peoples' minds as they board planes, it has been a concern for years. Passengers have complained about dry eyes, sore throat, dizziness, headaches, and other symptoms. Flight attendants have repeatedly raised questions about the safety of the air that they breathe. **The Airliner Cabin Environment and the Health of Passengers and Crew** examines in detail the aircraft environmental control systems, the sources of chemical and biological contaminants in aircraft cabins, and the toxicity and health effects associated with these contaminants. The book provides some recommendations for potential approaches for improving cabin air quality and a surveillance and research program.
