The Life of Jesus, Critically Examined David Friedrich Strauss,1860 David Friedrich Strauss's Das Leben Jesu kritisch bearbeitet (1835) brought about a new dawn in Biblical criticism by applying the 'myth theory' to the life of Jesus. Strauss treated the Gospel narrative like any other historical work, and denied all supernatural elements in the Gospels. Das Leben Jesu created an overnight sensation and Strauss became embroiled in fierce controversy. This earliest English version of 1846 was translated by the novelist George Eliot, and was her first published book.

Caesarism, Charisma and Fate Peter Baehr,2017-12-02 How do writers, marginalized by the authoritarian state in which they live, intervene in the political process? They cannot do so directly because they are not politicians. Other modes of engagement are possible, however. A writer may take up arms and become a revolutionary. Or, as Max Weber did, he may try to influence politics by playing the role of constitutional advisor, or by seeking to shape the dominant language in which his contemporaries think. Weber sought to reconstitute the political and social vocabulary of his day.Part I of Caesarism, Charisma and Fate examines a great writer's political passions and the linguistic creativity they generated. Specially, it is an analysis of the manner in which Weber reshaped the nineteenth century idea of Caesarism, a term traditionally associated with the authoritarian populism of Napoleon III and Bismarck, and transmuted it into a concept that was either neutral or positive. The coup de grace of this alchemy was to make Caesarism reappear as charisma. In that transformation, a highly contentious political concept, suffused with disapproval and anxiety, was naturalized into an ideal type of universal value-free sociology.Part II augments Weber's ideas for the modern age. A recurrent preoccupation of Weber's writings was human fate, a condition that evokes the pathos of choice, the political meaning of death, and the formation of national solidarity. Peter Baehr, marrying Weber and Durkheim, fashions a new concept, community of fate, for sociological theory. Communities of fate--such as the Warsaw Ghetto or Hong Kong dealing with the Severe Acute Respiratory Syndrome (SARS) crisis--are embattled social sites in which people face the prospect of collective death. They cohere because of an intense and broadly shared focus of attention on a common plight. Weber's work helps us grasp the nature of such communities, the mechanisms that produce them, and, not least, their dramatic consequences.

Dictionary of the Old Testament Bill T. Arnold,Hugh Godfrey Maturin Williamson,2005 The Dictionary of the Old Testament: Historical Books presents articles on numerous historical topics as well as major articles focused on the books of Joshua, Judges, Samuel, Kings, Chronicles, Ezra and Nehemiah. Other articles focus on the Deuteronomistic History as well as the Chronicler's History, the narrative art of Israel's historians, innerbiblical exegesis, text and textual criticism, and the emergence of these books as canonical. One feature is a series of eight consecutive articles on the periods of Israel's history from the settlement to the postexilic period, which forms a condensed history of Israel within the DOTHB.. Syro-Palestinian archaeology is surveyed in one article, while significant archaeological sites receive focused individual treatment. Other articles delve into the histories and cultures of the great neighboring empires - Egypt, Assyria, Babylonia and Persia - as well as lesser peoples, such as the Ammonites, Edomites, Moabites, Philistines and Phoenicians. In addition there are articles on architecture, agriculture and animal husbandry, roads and highways, trade and travel, and water and water systems.--Dust jacket.

The Sea and the Marsh Gillian Draper,Frank M. Meddens,Philip Armitage,2009 Today New Romney sits a couple of miles inland from the sea but, in common with many towns along this stretch of coast, was once a thriving seaport. Archaeological excavations here by Pre-Construct Archaeology identified evidence for medieval occupation, fishing and seafaring on the foreshore at the northeastern end of the town. This strand area was ravaged

by storms, particularly during the 13th century and this is clearly demonstrated in the archaeological record. This publication presents the findings of these excavations but also provides a much broader historical background to the town and an exploration of its role as a Cinque Port, and its relationship with the strand area investigated, through contemporary sources and standing building evidence.
