101 Things I Learned in Architecture School Matthew Frederick,2007-08-31 Concise lessons in design, drawing, the creative process, and presentation, from the basics of “How to Draw a Line” to the complexities of color theory. This is a book that students of architecture will want to keep in the studio and in their backpacks. It is also a book they may want to keep out of view of their professors, for it expresses in clear and simple language things that tend to be murky and abstruse in the classroom. These 101 concise lessons in design, drawing, the creative process, and presentation—from the basics of How to Draw a Line to the complexities of color theory—provide a much-needed primer in architectural literacy, making concrete what too often is left nebulous or open-ended in the architecture curriculum. Each lesson utilizes a two-page format, with a brief explanation and an illustration that can range from diagrammatic to whimsical. The lesson on How to Draw a Line is illustrated by examples of good and bad lines; a lesson on the dangers of awkward floor level changes shows the television actor Dick Van Dyke in the midst of a pratfall; a discussion of the proportional differences between traditional and modern buildings features a drawing of a building split neatly in half between the two. Written by an architect and instructor who remembers well the fog of his own student days, 101 Things I Learned in Architecture School provides valuable guideposts for navigating the design studio and other classes in the architecture curriculum. Architecture graduates—from young designers to experienced practitioners—will turn to the book as well, for inspiration and a guide back to basics when solving a complex design problem.

The Hospitable Leader Terry A. Smith,2022-08-30 Successful leaders today don't dictate; they invite. They don't dismiss; they welcome. They don't neglect; they care. Now more than ever we must pay attention to the soft side of leadership if we want hard results. As leaders--from parents to CEOs--we must learn gracious leadership to truly, positively, change our spheres of influence. In this passionate, powerful book, pastor and leadership mentor Terry Smith fleshes out five vital principles you need to become a hospitable leader. He shows that this type of leadership is not superficial niceness or allowing people to do whatever they want. Hospitable leadership is result-oriented because it's motivated by genuine love. It's how you create environments where people and dreams can thrive, where vision turns to action, and where great things happen regularly. Here is everything you need to become the type of leader people want to follow.

Thomas A. Edison and His Kinetographic Motion Pictures Charles Musser,1995 Much controversy has surrounded Thomas A. Edison's role in the birth of motion pictures. His earliest biographers gave all honor to him;

later historians gave credit to his assistants or to foreign inventors whose recognition Edison stole. Charles Musser provides a balanced assessment, arguing that while Edison left the day-to-day experimentation to his talented employees, he provided the ideas and encouragement as well as financial support. Without him, the technical hurdles would not have been overcome so quickly. As time went on, and innovations in the motion picture business shifted from improving machines to improving the moving pictures themselves and the methods of exhibiting them, Edison's Laboratory lost its advantage. After three decades of patent wars and attempted monopolization of cameras and projectors, the battle moved away from the inventor and toward the producers and nickelodeon owners. Edison briefly experimented with a home movie projector, to steal a march on his rivals, but he was way ahead of his time. After thirty years, he closed down his movie studio and moved on to other projects. This brief, informative story of Edison's key contributions to the invention of motion pictures is heavily illustrated and beautifully designed.
