Bronze Age Military Equipment Dan Howard, 2011-11-30 "A very valuable piece of work, providing a splendid overview" of the weapons, armor, shields and chariots used in warfare from 3000 BC to 1200 BC (HistoryOfWar.org). This book is a fascinating discussion of the development of the military equipment of the earliest organized armies. Dan Howard describes the development of weapons, armor and chariots, how they were made and their tactical use in battle. Spanning from the introduction of massed infantry by the Sumerians (c. 26th century BC) through to the collapse of the chariot civilizations (c. 12th century BC), this is the period of the epic struggles described in the Old Testament and Homer's Iliad, the clashes of mighty empires like those of the Babylonians, Egyptians and Hittites. In Bronze Age Military Equipment, Howard provides "an able and readable review that is supported in the text by drawings and sketches, but there is also an excellent full color photographic section that shows replica weapons and armor created in bronze" (Firetrench).

The Painted Medallions in the Sainte-Chapelle in Paris Robert Branner, 1968

The Sainte-Chapelle and the Construction of Sacral Monarchy Meredith Cohen, 2015 This book offers a novel perspective on one of the most important monuments of French Gothic architecture, the Sainte-Chapelle, constructed in Paris by King Louis IX of France between 1239 and 1248 especially to hold and to celebrate Christ's Crown of Thorns. Meredith Cohen argues that the chapel's architecture, decoration, and use conveyed the notion of sacral kingship to its audience in Paris and in greater Europe, thereby implicitly elevating the French king to the level of suzerain, and establishing an early visual precedent for the political theories of royal sovereignty and French absolutism. By setting the chapel within its broader urban and royal contexts, this book offers new

insight into royal representation and the rise of Paris as a political and cultural capital in the thirteenth century.

The Normans in South Wales, 1070-1171 Lynn H. Nelson, 2014-02-04 A frontier has been called an area inviting entrance. For the Norman invaders of England the Welsh peninsula was such an area. Fertile forested lowlands invited agricultural occupation; a fierce but primitive and disunited native population was scarcely a formidable deterrent. In *The Normans in South Wales*, Lynn H. Nelson provides a comprehensive history of the century during which the Normans accomplished this occupation. Skillfully he combines facts and statistics gleaned from a variety of original sources—The Anglo-Saxon Chronicle, the Domesday Book, Church records, charters of the kings and of the marcher lords, and more imaginative literary sources such as the *chanson de geste* and the frontier epic—to give a vivid picture of a century of strife. He describes the fluctuating conflict between Norman invaders in the lowlands and Welsh tribesmen in the highlands; the hard struggle of medieval frontiersmen to take from the new land a profit commensurate with their labors; the development of a Cambro-Norman society distinct and quite different from the Anglo-Norman culture which engendered it; and the attempt of the frontiersman to prevent the Anglo-Norman authorities from taking control of the lands he had won. The turbulent Welsh tribes provided an ever present harassment along the frontier, and Nelson begins his presentation with an account of the failure of the Saxons to control them. He examines the methods adopted by William the Conqueror to cope with the problem—the creation of the great marcher lordships and the subsequent problems in controlling these lordships—and the weakness of some Anglo-Norman kings and the strength of others. By 1171 the conquest of the Welsh frontier was complete; but as Nelson points out, this conquest was strangely limited. The frontier, which extended throughout the lowlands of Wales, stopped at the 600-foot

contour line in the mountains. In his final chapter Nelson speculates upon the curious fact that large areas of seemingly inviting moorlands lying above this line remained closed to the Cambro-Norman, and his speculations lead him to some interesting inferences about the nature of the frontier's influence upon the civilization which moves in to occupy it.

Relics from the Crucifixion J. Charles Wall, 2016-01-04 The Jews usually burned the crosses used by the Romans after executions but following Jesus' crucifixion they quickly threw the Cross in a ditch to get it out of sight before the feast of Passover. That preserved the True Cross, and memory of the events preserved its location. Disgusted with continued Christian veneration of the spot, pagan Roman Emperor Hadrian erected on the Cross's burial site a statue to Venus, hoping thereby to obliterate their memory. It didn't work. Indeed, because of the statue, when the Empire became Christian, St. Helena knew the exact spot where she would find the very Cross on which Christ died. All relics from Christ's crucifixion have a similarly fascinating story, all of which are told here in this 1910 work by the enterprising Catholic investigator Charles Wall. Among the things you'll discover in these pages: The miracle that revealed to St. Helena which of the three discovered crosses was that of Jesus The horse's bit made from a nail of the True Cross, and the successes it brought the horse's rider The nails — and why there are so many in existence today A history of the fortunes the Crown of Thorns to those who held them, and a list of towns where thorns are found Where, in 1492, workman accidentally discovered again the actual board on which "King of the Jews" was written The modest Frenchman who saved a holy nail from profanation during the French Revolution Drawings of the spear of Longinus, and reports of its later use in battles Relics of Jesus's actual blood from the Crucifixion: and why it makes sense that some still exists The veil of Veronica, Christ's seamless robe, and much more!

French Gothic Architecture of the Twelfth and Thirteenth Centuries Jean Bony, 2023-11-15

Gothic architecture is the most visible and striking product of medieval European civilization. Jean Bony, whose reputation as a medievalist is worldwide, presents its development as an adventure of the imagination allied with radical technical advances—the result of a continuing quest for new ways of handling space and light as well as experimenting with the mechanics of stone construction. He shows how the new architecture came unexpectedly to be invented in the Paris region around 1140 and follows its history—in the great cathedrals of northern France and dozens of other key buildings—to the end of the thirteenth century, when profound changes occurred in the whole fabric of medieval civilization. Rich illustrations, including comprehensive maps, enhance the text and themselves constitute an exceptionally valuable documentation. Despite its evident scholarly intention, this book is not meant for specialists alone, but is conceived as a progressive infiltration into the complexities of history at work, revealing its unpredictable vitality to the uninitiated curious mind.

A Companion to Medieval Genoa, 2018-03-12 A Companion to Medieval Genoa introduces recent scholarship on the vibrant and source-rich medieval history of Genoa, with thematic chapters positioning the city and its people within the broader history of Italy and the Mediterranean ca. 1100–1500.

St. Louis and the Court Style in Gothic Architecture Robert Branner, 1965

Deceptions and Myths of the Bible Lloyd M. Graham, 2012-07-16 Lloyd M. Graham is out to show that the Bible, both the Old and New Testaments as we know them, are not “holy” nor are they the “word of God” revealed. The stories of the Bible were set down by power-seeking priests eager to inspire awe and to gather flocks who would take part in their rites and rituals, and they weren’t very

original, either. In *Deceptions and Myths of the Bible*, Graham reintroduces us to the true origins of Adam and Eve, who were derived from a Babylonian account; to the story of Noah's flood, which was the result of over four hundred years of flood accounts from various ancient civilizations; to the man named Moses who was fashioned after the Syrian story of Mises; and even to the laws of the Bible, which were patterned after the Babylonian Code of Hammurabi. Graham points out the 137 similarities between the story of Jesus and the story of the Egyptian god Horus, and the hundreds and hundreds of similarities between the story of Christ and the Hindu god Krishna. For any reader interested in history or theology, Graham's book is essential, eye-opening, and controversial reading. If you are an atheist, you'll be eager to read these arguments in support of your beliefs. If you are agnostic, you will want to have this evidence at your fingertips as you weigh systems of belief and disbelief. If you are religious, you will want to know how your faith came into being and how a study of history might shake or support your beliefs.

Grahams o' the Mearns David L. Graham, 2011-11-28 A detailed history of our particular branch of Grahams descending from the Lower Mearns of Kincardineshire Scotland. It traces Grahams and extended relatives from Scotland to America, Canada, New Zealand and Australia. And even yet, there are gaps, mysteries and loose threads that may yet yield other relations to the earliest Grahams in and around St. Cyrus parish on the north east coast of Scotland. While there are only 166 Grahams in our family tree, their history and dispersion from the lower Mearns offers engaging insights into the hard lives that must have existed in the 18th and 19th centuries.

The Jacquerie of 1358 Justine Firnhaber-Baker, 2021 The Jacquerie of 1358 is one of the most famous and mysterious peasant uprisings of the Middle Ages. This book, the first extended study of the Jacquerie in over a century, resolves long-standing controversies about whether the revolt was

just an irrational explosion of peasant hatred or simply an extension of the Parisian revolt.

Cities, Texts, and Social Networks, 400-1500 Caroline Goodson, Anne Elisabeth Lester, Carol Symes, 2010 Offering a new interpretation of the pre-modern urban past, *Cities, Texts and Social Networks* highlights contemporary experiences of the city and their mediation through written, visual and environmental evidence. Comprising twelve essays that model important new ways of re-imagining the urban world, it points to significant patterns of socialisation in medieval urban milieus, particularly with respect to the role of sanctity, the evolution of charitable landscapes and the coalescence of formal institutions and informal networks of human interaction.

The Arab Conquest of Spain Roger Collins, 1995-02-17 This book, now available in paperback, is a challenging and controversial account of the history of Spain in the eighth century. In it Roger Collins assesses the political and cultural impact on Spain of the first hundred years of Arab rule, focusing upon aspects of continuity and discontinuity with Visigoth Spain.
