Heritage Conservation and Japan's Cultural Diplomacy Natsuko Akagawa, 2014–07–25 Japan's heritage conservation policy and practice, as deployed through its foreign aid programs, has become one of the main means through which post-World War II Japan has sought to mark its presence in the international arena, both globally and regionally. Heritage conservation has been intimately linked to Japan's sense of national identity, in addition to its self-portrayal as a responsible global and regional citizen. This book explores the concepts of heritage, nationalism and Japanese national identity in the context of Japanese and international history since the second half of the nineteenth century. In doing so, it shows how Japan has built on its distinctive approach to conservation to develop a heritage-based strategy, which has been used as part of its cultural diplomacy designed to increase its 'soft power' both globally and within the Asian region. More broadly, Natsuko Akagawa underlines the theoretical nexus between the politics of heritage conservation, cultural diplomacy and national interest, and in turn highlights how issues of heritage conservation practice and policy are crucial to a comprehensive understanding of geo-politics. *Heritage Conservation and Japan's Cultural Diplomacy* will be of great interest to students, scholars and professionals working in the fields of heritage and museum studies, heritage conservation, international relations and Asian/Japanese studies.

Dogs and Demons Alex Kerr, 2002–02–16 The decades of Western adulation for the Japanese 'economic miracle' failed to notice a key point: that in the pursuit of this miracle the Japanese had turned their country into a degraded, concrete shambles – a wilderness of bad planning, corruption and crowding. Now that the miracle is at an end and Japan seems set to remain in the economic doldrums it must become apparent to everyone that one of the world's greatest cultures has ruined itself almost beyond repair. Alex Kerr's wonderful book conveys vividly and furiously both the dazzling nature of Japanese culture and how the bureaucrats of a country he loves have poisoned and ruined it.

Reframing the Vernacular: Politics, Semiotics, and Representation Gusti Ayu Made Suartika, Julie Nichols, 2019–10–29 The aim of this book is to reflect on 'vernacularity' and culture. It concentrates on two major domains: first it attempts to reframe our understanding of vernacularity by addressing the subject in the context of globalisation, cross-disciplinarity, and development, and second, it discusses the phenomenon of how vernacularity has been treated, used, employed, manipulated, practiced, maintained, learned, reconstructed, preserved and conserved, at the level of individual and community experience. Scholars from a wide variety of knowledge fields have participated in enriching and engaging discussions, as to how both domains can be addressed. To expedite these aims, this book adopts the theme *Reframing the Vernacular: Politics, Semiotics, and Representation*, organised around the following major sub-themes: • Transformation in the vernacular built environment • Vernacular architecture and representation • The meaning of home • Symbolic intervention and interpretation of vernacularity • The semiotics of place • The politics of ethnicity and settlement • Global tourism and its impacts on vernacular settlement • Vernacular built form and aesthetics • Technology and construction in vernacular built forms • Vernacular language – writing and oral traditions

Dreamers of the Day Mary Doria Russell, 2008–03–11 A schoolteacher still reeling from the tragedies of the Great War and the influenza epidemic travels to the Middle East in this memorable and passionate novel “Marvelous . . . a stirring story of personal awakening set against the background of a crucial moment in modern history.”—The Washington Post Agnes Shanklin, a forty-year-old schoolteacher from Ohio, has come into a modest inheritance that allows her to take the trip of a lifetime to Egypt and the Holy Land. Arriving at the Semiramis Hotel just as the 1921 Cairo Peace Conference convenes, she is freed for the first time from her mother's withering influence and finds herself being wooed by a handsome, mysterious German. At the same time, Agnes—with her plainspoken American opinions—is drawn into the company of Winston Churchill, T. E. Lawrence, and Lady Gertrude Bell, who will, in the space of a few days, redraw the world map to create the modern Middle East. As they change history, Agnes too will find her own life transformed forever. With prose as graceful and effortless as a seductive float down the Nile, Mary Doria Russell illuminates the long, rich history of the Middle East with a story that brilliantly elucidates today's headlines.

Geography of Religion in Japan Keisuke Matsui, 2013–12–09 This book discusses modern aspects of Japanese religion in terms of cultural geography. To understand the function of religion, it is essential to examine it in the context of local societies. One of the distinguishing characteristics of Japanese religion is its diversity; indeed, it is often remarked that “Japan is a museum of religions.” In this work, the author clarifies some geographical aspects of the complex situation of Japanese religion. Chapter 1 discusses the trend of geographical studies of religion in Japan, of which four types can be identified. Chapter 2 focuses on certain characteristics of Japanese religious traditions by discussing tree worship and the landscape of sacred places. Chapter 3 clarifies regional divisions in the catchment areas of Japanese Shintoism by analyzing the distribution of certain types of believers. The author discusses two case studies: the Kasama Inari Shrine and the Kanamura Shrine. Chapter 4 discusses some modern aspects of sacred places and tourism through two case studies. The first part of the chapter focuses on changes in the types of businesses at the Omotesando of the Naritasan Shinshoji-Monzenmachi, and the following sections examine the revitalization of the local community through the promotion of religious tourism.

Routledge Companion to Global Heritage Conservation Vinayak Bharne, Trudi Sandmeier, 2019–02–12 The act of identifying, protecting, restoring, and reusing buildings, districts, and built landscapes of historic and cultural significance is, at its best, a reflective and consequential process of urban and socio-economic reform. It has the potential to reconcile conflicting memories, meanings, and cultural tensions, bridging and expanding the perceived boundaries of multiple disciplines towards bigger aspirations of city-making and social justice. How and where do such aspirations overlap and differ across nations and societies across the world? In places with different histories, governance structures, regulatory stringency, and populist dispositions, who are the specific players, and what are the actual processes that bring about bigger and deeper change beyond just the conservation of an architectural or urban entity of perceived value? This collection of scholarly articles by theorists, academics, and practitioners explores the global complexity, guises, and potential of heritage conservation. Going from Tokyo to Cairo, Shenzhen to Rome, and Delhi to Moscow, this volume examines a vast range of topics – indigenous habitats, urban cores, vernacular infrastructure, colonial towns, squatters, burial sites, war zones, and modern landmarks. It surfaces numerous inherent issues – water stress, deforestation, social oppression, poverty, religion, immigration, and polity, expanding the definitions of heritage conservation as both a professional discipline and socio-cultural catalyst. This book argues that the intellectual and praxis limits of heritage conservation – as the agency of reading, defining, and intervening with built heritage – can be expansive, aimed at bigger positive change beyond a specific subject or object; plural, enmeshed with multiple fields and specializations; and empathetic, born from the actual socio-political realities of a place.

Painters as Envoys Burglind Jungmann, 2004 Burglind Jungmann describes the eighteenth-century Korean-Japanese

diplomatic exchange and the circumstances under which Korean and Japanese painters met. Further, the paintings done by Korean painters during their sojourns in Japan attest to the transmission of a distinctly Korean literati style, called Namjonghwa. By comparing Korean, Japanese, and Chinese paintings, the author shows how the Korean interpretation of Chinese styles influenced Japanese literati painters and helped inspire the creation of their new style.--BOOK JACKET.

House and Home in Modern Japan Jordan Sand,2005 A house is a site, the bounds and focus of a community. It is also an artifact, a material extension of its occupants' lives. This book takes the Japanese house in both senses, as site and as artifact, and explores the spaces, commodities, and conceptions of community associated with it in the modern era. As Japan modernized, the principles that had traditionally related house and family began to break down. Even where the traditional class markers surrounding the house persisted, they became vessels for new meanings, as housing was resituated in a new nexus of relations. The house as artifact and the artifacts it housed were affected in turn. The construction and ornament of houses ceased to be stable indications of their occupants' social status, the home became a means of personal expression, and the act of dwelling was reconceived in terms of consumption. Amid the breakdown of inherited meanings and the fluidity of modern society, not only did the increased diversity of commodities lead to material elaboration of dwellings, but home itself became an object of special attention, its importance emphasized in writing, invoked in politics, and articulated in architectural design. The aim of this book is to show the features of this culture of the home as it took shape in Japan.

Seismic Stabilization of Historic Adobe Structures Getty Conservation Institute,2000-11-30 This book describes tests performed on model adobe buildings to evaluate seismic damage mitigation techniques applicable to the retrofitting of historic and culturally significant adobe structures. Part of the Getty Seismic Adobe Project (GSAP), the three-year program outlined in this volume was designed to develop and test minimally invasive, inexpensive, and easily implemented methods of protecting such structures from severe earthquake damage. Small- and large-scale models were tested on computer-controlled shaking tables at Stanford University and at the IIZIS Earthquake Engineering Laboratory in the Republic of Macedonia, respectively. The authors identify typical failure modes of adobe structures and describe specific retrofit techniques to help minimize such failures. Extensive photographic documentation is included.

Sustainable City and Creativity Tüzin Baycan,2016-04-01 The notion of 'creative cities' - where cultural activities and creative and cultural industries play a crucial role in supporting urban creativity and contributing to the new creative economy - has become central to most regional and urban development strategies in recent years. A creative city is supposed to develop imaginative and innovative solutions to a range of social, economic and environmental problems: economic stagnancy, urban shrinkage, social segregation, global competition or more. Cities and regions around the world are trying to develop, facilitate or promote concentrations of creative, innovative and/or knowledge-intensive industries in order to become more competitive. These places are seeking new strategies to combine economic development with quality of place that will increase economic productivity and encourage growth. Against this increasing interest in creative cities, this volume offers a coherent set of articles on sustainable and creative cities, and addresses modern theories and concepts relating to research on sustainability and creativity. It analyses principles and practices of the creative city for the formulation of policies and recommendations towards the sustainable city. It brings together leading academics with different approaches from different disciplines to provide a comprehensive and holistic overview of creativity and sustainability of the city, linking research and practice. In doing so, it puts forward ideas about stimulating the production of an innovative knowledge for a creative and sustainable city, and transforming a specific knowledge into a general common knowledge, which suggests best future policy actions, decision-making processes and choices for the change towards a human sustainable development of the city.

Advanced High Dynamic Range Imaging Francesco Banterle,Alessandro Artusi,Kurt Debattista,Alan Chalmers,2011-02-10 Imaging techniques seek to simulate the array of light that reaches our eyes to provide the illusion of sensing scenes directly. Both photography and computer graphics deal with the generation of images. Both disciplines have to cope with the high dynamic range in the energy of visible light that human eyes can sense. Traditionally photography and computer graphics took different approaches to the high dynamic range problem. Work over the last ten years though has unified these disciplines and created powerful new tools for the creation of complex, compelling and realistic images. This book provides a practical introduction to the emerging new discipline of high dynamic range imaging that combines photography and computer graphics. By providing detailed equations and code, the book gives the reader the tools needed to experiment with new techniques for creating compelling images.
