Of the Nature of Things T. Lucretius Carus,2022-09-15 Of the Nature of Things is a first-century BCE didactic poem by the Roman poet and philosopher Lucretius to explain Epicurean philosophy to a Roman audience. In this work, T. Lucretius Carus presents the view that the world can be described by the function of material forces and natural laws. So, one should not fear the gods or death.

Godard On Godard Jean-luc Godard,1986-03-22 Jean-Luc Godard, like many of his European contemporaries, came to filmmaking through film criticism. This collection of essays and interviews, ranging from his early efforts for La Gazette du Cinéma to his later writings for Cahiers du Cinéma, reflects his dazzling intelligence, biting wit, maddening judgments, and complete unpredictability. In writing about Hitchcock, Welles, Bergman, Truffaut, Bresson, and Renoir, Godard is also writing about himself-his own experiments, obsessions, discoveries. This book offers evidence that he may be even more original as a thinker about film than as a director. Covering the period of 1950-1967, the years of Breathless, A Woman Is a Woman, My Life to Live, Alphaville, La Chinoise, and Weekend, this book of writings is an important document and a fascinating study of a vital stage in Godard's career. With commentary by Tom Milne and Richard Roud, and an extensive new foreword by Annette Michelson that reassesses Godard in light of his later films, here is an outrageous self-portrait by a director who, even now, continues to amaze and bedevil, and to chart new directions for cinema and for critical thought about its history.

The Third Rainbow Girl Emma Copley Eisenberg,2020-01-21 *** A NEW YORK TIMES 100 Notable Books of 2020 *** A stunning, complex narrative about the fractured legacy of a decades-old double murder in rural West Virginia—and the writer determined to put the pieces back together. In the early evening of June 25, 1980 in Pocahontas County, West Virginia, two middle-class outsiders named Vicki Durian, 26, and Nancy Santomero, 19, were murdered in an isolated clearing. They were hitchhiking to a festival known as the Rainbow Gathering but never arrived. For thirteen years, no one was prosecuted for the “Rainbow Murders” though deep suspicion was cast on a succession of local residents in the community, depicted as poor, dangerous, and backward. In 1993, a local farmer was convicted, only to be released when a known serial killer and diagnosed schizophrenic named Joseph Paul Franklin claimed responsibility. As time passed, the truth seemed to slip away, and the investigation itself inflicted its own traumas—turning neighbor against neighbor and confirming the fears of violence outsiders have done to this region for centuries. In *The Third Rainbow Girl*, Emma Copley Eisenberg uses the Rainbow Murders case as a starting point for a thought-provoking tale of an Appalachian community bound by the false stories that have been told about. Weaving in experiences from her own years spent living in Pocahontas County, she follows the threads of this crime through the complex history of Appalachia, revealing how this mysterious murder has loomed over all those affected for generations, shaping their fears, fates, and desires. Beautifully written and brutally honest, *The Third Rainbow Girl* presents a searing and wide-ranging portrait of America—divided by gender and class, and haunted by its own violence.

Journal of the Fortean Research Center Paperbound Ray Boeche,2012-07-01 The Fortean Research Center was founded in Lincoln, Nebraska in 1982. During the two decades of its existence, this volunteer group of researchers and investigators delved deep into the unexplained. Exploring events in Nebraska - and far beyond -that included ghosts, UFOs, Bigfoot encounters, animal mutilations, government cover-ups, alleged alien abductions, psychic phenomena, cult activity, and even a sighting of a blob-like mystery creature the Fortean Research Center became recognized among members of the Fortean, paranormal, and UFO research communities around the world, as a reliable and trusted source of information. Here is the entire collection of the *Journal of the Fortean Research Center*, 23 issues in all. These publications are a reflection of their time, and demonstrate in many cases the beginning steps into subjects familiar to the public today: alleged UFO crashes and landings at government installations, alien abductions, cryptozoology and more.

Abolition Now! CR10 Publications Collective,2008 Over seven million people live under the control of US prison and parole systems. The vast majority of them are people of colour or youth. Between 2000 and 2007, Congress added 454 new offences to the criminal code. In comparison, Blair added 3000 new laws during his leadership. The UK prison population is similarly skewed in terms of race and class. For a decade, Critical Resistance has organised to abolish the reliance on imprisonment, policing and surveillance. Reflecting on key themes of Dismantle, Change and Build, this book celebrates their bold strategies and work.

The Whole Goat Handbook Janet Hurst,2013-01-14 Goats are the hottest animal today to raise for hobby farmers, commercial farmers, and members of both 4-H and FFA. But using the product from a goat requires special skills, handling, and recipes. Here’s *The Whole Goat Handbook*, chock full of recipes, crafting projects, advice, and more. Cooking with goat meat requires special, adapted recipes because the meat is so strong in flavor; there’s no devoted goat-meat cookbook on the market until now! Here as well are recipes for making cheese with goat milk as well as goat-milk soap. And for those raising goats for fiber, here are hard-won recommendations on crafting, knitting, and weaving. This book will show you how to do all this and more.

The Darkest Place Phillip Margolin,2022-03-08 Defense attorney Robin Lockwood faces an unimaginable personal disaster and her greatest professional challenge in the next New York Times bestselling Phillip Margolin's new legal thriller, *The Darkest Place*. Robin Lockwood is an increasingly prominent defense attorney in the Portland community. A Yale graduate and former MMA fighter, she's becoming known for her string of innovative and successful defense strategies. As a favor to a judge, Robin takes on the pro bono defense of a reprehensible defendant charged with even more reprehensible crimes. But what she doesn't know—what she can't know—is how this one decision, this one case, will wreak complete devastation on her life and plans. As she recovers from those consequences, Robin heads home to her small town of Elk Grove and the bosom of her family. As she tries to recuperate, a unique legal challenge presents itself—Marjorie Loman, a surrogate, is accused of kidnapping the baby she carried for another couple, and assaulting that couple in the process. There's no question that she committed these actions but that's not the same as being guilty of the crime. As Robin works to defend her client, she learns that Marjorie Loman has been hiding under a fake identity and is facing a warrant for her arrest for another, even more serious crime. And buried within the truth may once again be unexpected, deadly consequences.

Mind Fixers: Psychiatry's Troubled Search for the Biology of Mental Illness Anne Harrington,2019-04-16 *Mind Fixers* tells the history of psychiatry's quest to understand the biological basis of mental illness and asks where we need to go from here. In *Mind Fixers*, Anne Harrington, author of *The Cure Within*, explores psychiatry's repeatedly frustrated struggle to understand mental disorder in biomedical terms. She shows how the stalling of early twentieth century efforts in this direction allowed Freudians and social scientists to insist, with some justification, that they had better ways of analyzing and fixing minds. But when the Freudians overreached, they drove psychiatry into a state of crisis that a new “biological revolution” was meant to alleviate. Harrington shows how little that biological revolution had to do with breakthroughs in science, and why the field has fallen into a state of crisis in our own time. *Mind Fixers* makes clear that psychiatry's waxing and waning biological enthusiasms have been shaped not just by developments in the clinic and lab, but also by a surprising range of social factors, including immigration, warfare, grassroots activism, and

assumptions about race and gender. Government programs designed to empty the state mental hospitals, acrid rivalries between different factions in the field, industry profit mongering, consumerism, and an uncritical media have all contributed to the story as well. In focusing particularly on the search for the biological roots of schizophrenia, depression, and bipolar disorder, Harrington underscores the high human stakes for the millions of people who have sought medical answers for their mental suffering. This is not just a story about doctors and scientists, but about countless ordinary people and their loved ones. A clear-eyed, evenhanded, and yet passionate tour de force, Mind Fixers recounts the past and present struggle to make mental illness a biological problem in order to lay the groundwork for creating a better future, both for those who suffer and for those whose job it is to care for them.
