**You Are Stardust** Elin Kelsey, 2017-08-10 People are nature. From the water we drink to the trees we climb, we are connected to the natural world in big and surprising ways. With simple, poetic text, and exquisite artwork, You Are Stardust introduces kids to these connections - sparking their imaginations and starting conversations. Combining the ideas of environmental author and educator Elin Kelsey with inventive, three-dimensional dioramas by artist Soyeon Kim, this remarkable picture book reveals ties that are often sensed, yet seldom explained. Children will learn that the salt in their body is the same as the salt in the ocean, that they learned to speak in the same way that baby birds do - by copying their parents, and that elephants, bats and whales make friends, just like they do. In a world dominated by technology, never have these connections between people and nature been more worth exploring.

**The Stuff of Stars** Marion Dane Bauer, 2020-10-06  
In an astonishing unfurling of our universe, Newbery Honor winner Marion Dane Bauer and Caldecott Honor winner Ekua Holmes celebrate the birth of every child. Before the universe was formed, before time and space existed, there was . . . nothing. But then . . . BANG! Stars caught fire and burned so long that they exploded, flinging stardust everywhere. And the ash of those stars turned into planets. Into our Earth. And into us. In a poetic text, Marion Dane Bauer takes readers from the trillionth of a second when our universe was born to the singularities that became each one of us, while vivid illustrations by Ekua

Holmes capture the void before the Big Bang and the ensuing life that burst across galaxies. A seamless blend of science and art, this picture book reveals the composition of our world and beyond – and how we are all the stuff of stars.

#### *Each Happiness Ringed by Lions Jane*

Hirshfield,2005 Jane Hirshfield is a visionary American writer whose poems ask nothing less than what it is to be human. Both sensual meditations and passionate investigations, they reveal complex truths in language luminous and precise. Rooted in the living world, her poems celebrate and elucidate a hard-won affirmation of our human fate. Born of a rigorous questioning of heart, spirit and mind, they have become indispensable to many American readers in navigating their own lives. Hers is a poetry of clarity and hybrid vigour, drawing deeply on English and American traditions but also those of world poetry. The poetries of modern and classical Greece, of Horace and Catullus, of classical China and Japan and Eastern Europe all resonate in Jane Hirshfield's structures of thought and in her sensibilities. Indelibly of our time yet seated in the lineage of poetic discovery, these poems are meant to endure.

*Billions & Billions* Carl Sagan, 1998-05-12 NEW

**YORK TIMES BESTSELLER** • In the final book of his astonishing career, Carl Sagan brilliantly examines the burning questions of our lives, our world, and the universe around us. These luminous, entertaining essays travel both the vastness of the cosmos and the intimacy of the human mind, posing such fascinating questions as how did the universe originate and how will it end, and how can we meld science and compassion to meet the challenges of the coming century? Here, too, is a rare, private glimpse of Sagan's thoughts about love, death, and God as he struggled with fatal disease. Ever forward-looking and vibrant with the sparkle of his unquenchable curiosity, *Billions & Billions* is a testament to one of the great scientific minds of our day. Praise for *Billions & Billions* "[Sagan's] writing brims with optimism, clarity and compassion."—Ft. Lauderdale Sun-Sentinel "Sagan used the spotlight of his fame to illuminate the abyss into which stupidity, greed, and the lust for power may yet dump us. All of those interests and causes are handsomely represented in *Billions & Billions*."—The Washington Post Book World "Astronomer Carl Sagan didn't live to see the millennium, but he probably has done more than any other popular scientist to prepare us for its arrival."—Atlanta Journal & Constitution "*Billions & Billions* can be interpreted as the Silent Spring for the current generation. . . . Human history includes a number of leaders with great minds who gave us theories about our universe and origins that ran contrary to religious dogma. Galileo determined that the Earth revolved around the Sun, not the other way

around. Darwin challenged Creationism with his Evolution of Species. And now, Sagan has given the world its latest challenge: Billions & Billions.”—San Antonio Express-News “[Sagan’s] inspiration and boundless curiosity live on in the gift of his work.”—Seattle Times & Post-Intelligencer “Couldn’t stay awake in your high school science classes? This book can help fill in the holes. Acclaimed scientist Carl Sagan combines his logic and knowledge with wit and humor to make a potentially dry subject enjoyable to read.”—The Dallas Morning News

**From Cave Man to Cave Martian** Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface

geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

*Freedom of Religion and the Secular State* Russell Blackford, 2012-02-07 Exploring the relationship between religion and the state

Focusing on the intersection of religion, law, and politics in contemporary liberal democracies, Blackford considers the concept of the secular state, revising and updating enlightenment views for the present day. Freedom of Religion and the Secular State offers a comprehensive analysis, with a global focus, of the subject of religious freedom from a legal as well as historical and philosophical viewpoint. It makes an original contribution to current debates about freedom of religion, and addresses a whole range of hot-button issues that involve the relationship between religion and the state, including the teaching of evolution in schools, what to do about the burqa, and so on.

**Black and Blue** Veronica Gorrie, 2021-03-30 WINNER OF THE 2022 VICTORIAN PREMIER'S PRIZE FOR LITERATURE WINNER OF THE 2022 VICTORIAN PREMIER'S LITERARY AWARD FOR INDIGENOUS WRITING SHORTLISTED FOR THE DOUGLAS STEWART PRIZE FOR NONFICTION The story of an Aboriginal woman who worked as a police officer and fought for justice both within and beyond the Australian police force. A proud Gunai/Kurnai woman, Veronica Gorrie grew up dauntless, full of cheek and a fierce sense of justice. After watching her friends and family suffer under a deeply compromised law-enforcement system, Gorrie signed up for training to become one of a rare few Aboriginal police officers in Australia. In her ten years in the force, she witnessed appalling institutional racism and sexism, and fought past those things to provide courageous and compassionate service to civilians in need, many Aboriginal themselves. With a great

gift for storytelling and a wicked sense of humour, Gorrie frankly and movingly explores the impact of racism on her family and her life, the impact of intergenerational trauma resulting from cultural dispossession, and the inevitable difficulties of making her way in the white- and male-dominated workplace of the police force. Black and Blue is a memoir of remarkable fortitude and resilience, told with wit, wisdom, and great heart.

**Talking Music** William Duckworth, 1999-05-07

Talking Music is comprised of substantial original conversations with seventeen American experimental composers and musicians—including Milton Babbitt, Pauline Oliveros, Steve Reich, Meredith Monk, and John Zorn—many of whom rarely grant interviews. The author skillfully elicits candid dialogues that encompass technical explorations; questions of method, style, and influence; their personal lives and struggles to create; and their aesthetic goals and artistic declarations. Herein, John Cage recalls the turning point in his career; Ben Johnston criticizes the operas of his teacher Harry Partch; La Monte Young attributes his creative discipline to a Mormon childhood; and much more. The results are revelatory conversations with some of America's most radical musical innovators.
