*Zora Neale Hurston* Lara Antal,2016-07-15 One of the first African American anthropologists, and a talented writer, Zora Neale Hurston's body of work was an important part of the Harlem Renaissance. Learn about her life, her work, and her influence.

*The Woman at the Front* Lecia Cornwall,2021-09-28 A daring young woman risks everything to pursue a career as a doctor on the front lines in France during World War I, and learns the true meaning of hope, love, and resilience in the darkest of times. When Eleanor Atherton graduates from medical school near the top of her class in 1917, she dreams of going overseas to help the wounded, but her ambition is thwarted at every turn. Eleanor's parents insist she must give up medicine, marry a respectable man, and assume her proper place. While women might serve as ambulance drivers or nurses at the front, they cannot be physicians—that work is too dangerous and frightening. Nevertheless, Eleanor is determined to make more of a contribution than sitting at home knitting for the troops. When an unexpected twist of fate sends Eleanor to the battlefields of France as the private doctor of a British peer, she seizes the opportunity for what it is—the chance to finally prove herself. But there's a war on, and a casualty clearing station close to the front lines is an unforgiving place. Facing skeptical commanders who question her skills, scores of wounded men needing care, underhanded efforts by her family to bring her back home, and a blossoming romance, Eleanor must decide if she's brave enough to break the rules, face her darkest fears, and take the chance to win the career—and the love—she's always wanted.

**A Compilation of Cellular and Tissue Xenotransplantation Studies (1838-2022)** Prof Dr Mike KS Chan,Prof Dr Michelle Wong,Dr Patricia Pan,2022-11-17 The success of transplantation to treat human diseases has greatly increased the demand for organs and tissues. Xenotransplantation, the use of animals as donors, is viewed increasingly as a solution to this problem. The pig-to-NHP model has become the standard for preclinical studies of cell and tissue xenotransplantation prior to starting a clinical trial. This is A Compilation of Cell and Tissue Xenotransplantation Studies (1838-2022): A Promising Approach for the Treatment of Diseases and a collection of reminiscences by surgeons and scientists who made significant research contributions toward achieving successful transplantation of animal cells and tissues into humans. It records the works of the world's leading researchers in this field which will impact the future medical care of patients with diabetes, liver failure, neurodegenerative disorders, corneal blindness, etc. It also provides a comprehensive overview of applications of cellular and tissue xenotransplantation for a range of diseases especially those that result from tissue loss or dysfunction. The importance of the decellularization technique in animal tissues and organs as implantable biomaterials in the field of regenerative medicine and tissue engineering is also highlighted. Essential reading for physicians, scientists, and lay persons with an interest in xenotransplantation; those caring for patients with life-threatening diseases; and also those interested in understanding the potential of genetic and tissue engineering in science and medicine. This book charts a historical record of the research which has contributed to the advancement of medicine called “the next great medical revolution.” Many believe we are on the threshold of clinical trials using genetically modified animals as organ donors. If successful, the benefits of clinical xenotransplantation will be enormous and will represent one of the greatest advances in modern medicine.

This book has been created as a photo essay showing the best available and rare photographs of Tigers with units at the front. No tank that the Allies fielded in World War II was comparable to this combination of the 88mm gun with massive armor protection. Allied tankers didn't think that they stood a chance of defeating these formidable Tigers. They only hoped that these heavy tanks would breakdown, become immobilized in soft ground, or be damaged by lucky hits on vulnerable points.

**The Winter Vault** Anne Michaels,2009-04-16 The Winter Vault is a stunning, richly layered, and timeless novel that is everything we could hope for for Michaels’s second novel—and more. Set in Canada and Egypt, and with flashbacks to England and Poland after the war, The Winter Vault is a spellbinding love story that juxtaposes momentous historical events with the most intimate moments of individual lives. In 1964, a newly married Canadian couple settle into a houseboat on the Nile just below Abu Simbel. At the time of the building of the Aswam dam, Avery Escher is one of the engineers responsible for the dismantling and reconstruction of a sacred temple, a “machine-worshipper” who is nonetheless sensitive to their destructive power. Jean is a botanist by avocation, passionately interested in everything that grows. They met on the banks of the St. Lawrence River, witnessing the construction of the Seaway as it swallowed towns, homes, and lives. Now, at the edge of another world about to be inundated in the name of progress, much of what they most believe in is tested. When a tragic event occurs, nearing the end of Avery’s time in Egypt, he and Jean return to separate lives in Toronto; Avery to school to study architecture and Jean into the orbit of Lucjan, a Polish émigré artist whose haunting tales of occupied Warsaw pull her further from her husband, while offering her the chance to assume her most essential life. Breathtaking, vivid in its exploration of both the physical and emotional worlds of its characters, intensely moving and lyrical, The Winter Vault is a radiant work of fiction and contains all the elements for which Anne Michaels is celebrated.
