German Façade Design Randall Ott,2016-09-17 German architecture prior to the modern period has received less systemic, analytical study than that of Italy, France, and Britain. Scholarly discussion of broad traditions or continuities within Germanic or Central European façade design is even sparser. Baroque era studies of the region mostly devote themselves to isolated architects, monuments, or movements. Modernism's advent decisively changed this: Germanic architecture enjoyed sudden ascendancy. Yet, even so, study specifically of that region's façades still lagged – nothing compares to the dozens of treatments of Le Corbusier's façade systems, for example, and how these juxtapose with French neoclassical or Italian Renaissance methods. Given the paucity of multi-period studies, one can be forgiven for believing Germany's effervescence of radical, modern works seems unprecedented. This book takes up these multiple quandaries. It identifies and documents a previously unrecognized compositional tradition - characterized here as the 'screen façade' – and posits it as a counter-narrative critiquing the essentialist, 'authentic' canon currently dominant in Western architectural history. By crossing evenly over the dividing line between the historical and modern periods, it offers valuable insights on indigenous roots underlying some aspects of Germany's invigorating early twentieth-century architectural developments. The book chronologically examines 400 years of closely related facades, concentrated in Germany but also found in Austria, the Czech Republic, German-speaking Switzerland, and nearby areas of Central Europe. While nearly 75 buildings are mentioned and illustrated, a dozen are given extensive analysis and the book focuses on the works of three architects – Schinkel, Behrens and Mies.

Relationships between examples of these three architects' façades far transcend mere homage amongst masters. Glimmers of the system they eventually codify are apparent as early as at Heidelberg Castle in 1559 and Nürnberg's Rathaus in 1622. The book argues that in Germany, northern Gothic affinities for bisection, intense repetition and rote aggregation intersected with southern Classical affinities for symmetry, hierarchy and centrality, thereby spawning a unique hybrid product – the screen. Instead of graphic formality, this study is guided by on-site perceptions, propositional contrasts, means of approach, interpretive conflicts and emotion and it relates the design of these façades to concepts proposed by contemporary philosophers including Novalis, Hegel, Nietzsche, Freud, Adorno, and, most importantly, Gadamer on hermeneutics.

New Frontiers for Metrology: From Biology and Chemistry to Quantum and Data Science M.J.T. Milton, 2021-12-22 The use of standard and reliable measurements is essential in many areas of life, but nowhere is it of more crucial importance than in the world of science, and physics in particular. This book contains 20 contributions presented as part of Course 206 of the International School of Physics Enrico Fermi on New Frontiers for Metrology: From Biology and Chemistry to Quantum and Data Science, held in Varenna, Italy, from 4 -13 July 2019. The Course was the 7th in the Enrico Fermi series devoted to metrology, and followed a milestone in the history of measurement: the adoption of new definitions for the base units of the SI. During the Course, participants reviewed the decision and discussed how the new foundation for metrology is opening new possibilities for physics, with several of the lecturers reflecting on the implications for an easier exploration of the unification of quantum mechanics and gravity. A wide range of other topics were covered, from measuring color and appearance to atomic weights and radiation, and including the application of

metrological principles to the management and interpretation of very large sets of scientific data and the application of metrology to biology. The book also contains a selection of posters from the best of those presented by students at the Course. Offering a fascinating exploration of the latest thinking on the subject of metrology, this book will be of interest to researchers and practitioners from many fields.

Forbidden Music Michael Haas,2013-04-15 DIV With National Socialism's arrival in Germany in 1933, Jews dominated music more than virtually any other sector, making it the most important cultural front in the Nazi fight for German identity. This groundbreaking book looks at the Jewish composers and musicians banned by the Third Reich and the consequences for music throughout the rest of the twentieth century. Because Jewish musicians and composers were, by 1933, the principal conveyors of Germany's historic traditions and the ideals of German culture, the isolation, exile and persecution of Jewish musicians by the Nazis became an act of musical self-mutilation. Michael Haas looks at the actual contribution of Jewish composers in Germany and Austria before 1933, at their increasingly precarious position in Nazi Europe, their forced emigration before and during the war, their ambivalent relationships with their countries of refuge, such as Britain and the United States and their contributions within the radically changed post-war music environment. /div

Art and the German Bourgeoisie Carolyn Helen Kay, 2002-01-01 In this new study of art in

fin-de-siècle Hamburg, Carolyn Kay examines the career of the city's art gallery director, Alfred Lichtwark, one of Imperial Germany's most influential museum directors and a renowned cultural critic. A champion of modern art, Lichtwark stirred controversy among the city's bourgeoisie by commissioning contemporary German paintings for the Kunsthalle by secession artists and supporting the formation of an independent art movement in Hamburg influenced by French impressionism. Drawing on an extensive amount of archival research, and combining both historical and art historical approaches, Kay examines Lichtwark's cultural politics, their effect on the Hamburg bourgeoisie, and the subsequent changes to the cultural scene in Hamburg. Kay focuses her study on two modern art scandals in Hamburg and shows that Lichtwark faced strong public resistance in the 1890s, winning significant support from the city's bourgeoisie only after 1900. Lichtwark's struggle to gain acceptance for impressionism highlights conflicts within the city's middle class as to what constituted acceptable styles and subjects of German art, with opposition groups demanding a traditional and 'pure' German culture. The author also considers who within the Hamburg bourgeoisie supported Lichtwark, and why. Kay's local study of the debate over cultural modernism in Imperial Germany makes a significant contribution both to the study of modernism and to the history of German culture.

City Halls and Civic Materialism Swati Chattopadhyay, Jeremy White, 2014-03-14 The town hall or city hall as a place of local governance is historically related to the founding of cities in medieval Europe. As the space of representative civic authority it aimed to set the terms of public space and engagement with the citizenry. In subsequent centuries, as the idea and built form travelled beyond Europe to become an established institution across the globe, the parameters of civic representation

changed and the town hall was forced to negotiate new notions of urbanism and public space. *City Halls and Civic Materialism: Towards a Global History of Urban Public Space* utilizes the town hall in its global historical incarnations as bases to probe these changing ideas of urban public space. The essays in this volume provide an analysis of the architecture, iconography, and spatial relations that constitute the town hall to explore its historical ability to accommodate the public in different political and social contexts, in Europe, Asia, Australia, Africa and the Americas, as the relation between citizens and civic authority had to be revisited with the universal franchise, under fascism, after the devastation of the world wars, decolonization, and most recently, with the neo-liberal restructuring of cities. As a global phenomenon, the town hall challenges the idea that nationalism, imperialism, democracy, the idea of citizenship – concepts that frame the relation between the individual and the body politic -- travel the globe in modular forms, or in predictable trajectories from the West to East, North to South. Collectively the essays argue that if the town hall has historically been connected with the articulation of bourgeois civil society, then the town hall as a global spatial type -- architectural space, urban monument, and space of governance -- holds a mirror to the promise and limits of civil society.

Image and Remembrance Shelley Hornstein, Florence Jacobowitz, 2003 The passage of time and the reality of an aging survivor population have made it increasingly urgent to document and give expression to testimony, experience, and memory of the Holocaust. At the same time, artists have struggled to find a language to describe and retell a legacy often considered unimaginable. Contrary to those who insist that the Holocaust defies representation, *Image and Remembrance* demonstrates that artistic representations are central to the practice of remembrance and commemoration. Including essays on representations of the Holocaust in film, architecture, painting, photography, memorials, and monuments, this thought-provoking volume considers ways in which visual artists have given form to the experience of the Holocaust and addresses the role that imagination plays in shaping historical memory. Among works discussed are Daniel Libeskind's Jewish Museum in Berlin, Rachel Whiteread's Holocaust Memorial in Vienna, Morris Louis's series of paintings *Charred Journal*, photographer Shimon Attie's *Writing on the Wall*, and Mikael Levin's series *Untitled*. *Image and Remembrance* provides a thoughtful site for personal reflection and commemoration as well as a context for reconsidering the processes of art making and the cultural significance of artistic images. Contributors: Ernst van Alphen, Monica Bohm-Duchen, Tim Cole, Rebecca Comay, Mark Godfrey, Reesa Greenberg, Marianne Hirsch, Shelley Hornstein, Florence Jacobowitz, Berel Lang, Daniel Libeskind, Andrea Liss, Leslie Morris, Leo Spitzer, Susan Rubin Suleiman, Janet Wolff, Robin Wood, James Young, and Carol Zemel.

Visual proficiency - A perspective on art education Kunibert Bering, Rolf Niehoff, 2015-12-18 Every day, over a million images are uploaded to flickr. This is a striking example of the so-called »flood« of images that emerged with the beginning of the digital age. A generation of adolescents has already been socialised with this flood of images and deals with it on a daily basis, both in their

networks and elsewhere. Art education thus faces significant challenges: art is the only school subject that deals with the problems inherent in images as images, making them the focus of pedagogic activity. This volume presents both the foundations for engaging with the phenomenon of the »image« in a competent and historically informed manner as well as the perspectives for art education that arise from these foundations. It is based upon the conviction that providing orientation in a world defined by images does not mean following solely a technocratic, functionalist or even neoliberal »concept of education«. Quite the contrary: »providing an orientation« for how to deal with images in a world that is dominated by them is a crucial part of the holistic development of young people's personalities. The volume's main focus lies upon the new functions taken on both by the image and by art more generally. It takes into account aspects of globalisation and participation and also includes more unusual views (often from a cross-media perspective) of art and its historical repertory, which even current image creation is unable to dispense with. The volume also deals extensively with architecture and the images it conveys.

Open Source Fuzzing Tools Noam Rathaus, Gadi Evron, 2011-04-18 Fuzzing is often described as a "black box software testing technique. It works by automatically feeding a program multiple input iterations in an attempt to trigger an internal error indicative of a bug, and potentially crash it. Such program errors and crashes are indicative of the existence of a security vulnerability, which can later be researched and fixed. Fuzz testing is now making a transition from a hacker-grown tool to a commercial-grade product. There are many different types of applications that can be fuzzed, many different ways they can be fuzzed, and a variety of different problems that can be uncovered. There are also problems that arise during fuzzing; when is enough enough? These issues and many others are fully explored. Fuzzing is a fast-growing field with increasing commercial interest (7 vendors

unveiled fuzzing products last year). Vendors today are looking for solutions to the ever increasing threat of vulnerabilities. Fuzzing looks for these vulnerabilities automatically, before they are known, and eliminates them before release. Software developers face an increasing demand to produce secure applications---and they are looking for any information to help them do that.

Paris Haute Couture Anne Zazzo, Olivier Sillard, 2013-02-05 A comprehensive history of high fashion in Paris from Madame Grès and Balenciaga to Yves Saint Laurent and Yohji Yamamoto, spanning all aspects from clothing and accessories to perfume. Ever since Charles Frederick Worth dressed the Empress Eugénie in the 1860s, launching a golden century for dressmaking, Parisian haute couture has been a source of endless admiration and fascination. Its emphasis on exquisite design and meticulous craftsmanship propelled it to the forefront of the fashion industry. The position and practices of haute couture may have evolved over time, but the work of many contemporary couturiers reveals a strong sense of continuity, from the creations of Jeanne Lanvin and Christian Dior, through to their modern counterparts in Jean-Paul Gaultier or Viktor & Rolf. This chronological study traces the history of the esteemed couture houses of Paris, examining the role of the designer and the extraordinary craftsmanship behind the finished creations, the place of haute couture in Parisian culture, and its influence in the wider fashion industry. Particular attention is paid to the relationship between haute couture and the client, as well as the dualities in modern haute couture—its sense of exclusivity and quasi-mythical aura countered by an ever-increasing reach into popular consciousness and attainability. This volume is richly illustrated with images of the most superb pieces created by exceptional designers. Various incarnations of Chanel's timeless quilted handbag, Fath's charmingly patterned silk scarves, and Poiret's elegant perfume bottles demonstrate that haute couture encompasses far more than just clothing.
