The Artemis Lunar Program Manfred "Dutch" von Ehrenfried, 2020-05-12 This book describes the future of the Artemis Lunar Program from the years 2017 to about 2030. Despite the uncertainty of the times and the present state of space exploration, it is likely that what is presented in this book will actually happen, to one degree or another. As history has taught us, predictions are often difficult, but one can see enough into the future to be somewhat accurate. As the Bible says, "We see through the glass, but darkly." All of the elements of the proposed program are described from several perspectives: NASA's, the commercial space industry and our International partners. Also included are descriptions of the many vehicles, habitats, landers, payloads and experiments. The book tells the story of the buildup of a very small space station in a strange new lunar orbit and the descent of payloads and humans, including the first woman and next man, to the lunar surface with the intent to evolve a sustained presence over time.

German Police Cars Cristina Berna, Eric Thomsen, 2024-02-06 Police cars are usually very visible in our society, advertising the important role of police and much loved by children. The role of the police is to enforce the law, to ensure the safety, health, and possessions of citizens, and to prevent crime and civil disorder. Law enforcement is as old as human society and the giving of laws itself. In ancient China, Babylon and Egypt there were special law enforcement bodies. The authors have made a similar book on American police cars and the styles are quite different between the two countries. We hope you will enjoy our selection of photos.

Pastoral Care and Monasticism in Latin Christianity and Japanese Buddhism (ca. 800-1650) Toshio Ohnuki, Gert Melville, Yuichi Akae, Kazuhisa Takeda, Monasticism has a special position in the history of pastoral care. It produced innovations in various aspects of pastoral care despite, or more precisely, because of its isolation in legal or social terms from the secular world. The thirteen papers contained in this volume will reveal that there was a great variety in the ways pastoral care continued to be practised by monasticism, depending on time, space, and the nature of each religious order. Adopting a comparative approach, their historical and geographical range of investigation is not limited to medieval Europe but expands to the Americas and even to Japan in the early Modern Age. This volume bases on a conference held on 1 and 2 March 2019 at Okayama University, Japan, as part of the close collaboration between a Japanese research group on Christian/Buddhist religious movements and the Research Project Monasteries in the High Middle Ages: Innovation Laboratories for European Life Designs and Regulatory Models of the Saxon and the Heidelberg Academies of Sciences and Humanities, as well as the Research Center for Comparative History of Religious Orders (FOVOG, Dresden).

Native Americans and European Settlers Charles Hofer,2019-07-15 The United States of America was born of cooperation and conflict. On one side were the Native Americans, represented by dozens of different tribes from coast to coast. On the other were the European settlers, who flocked to the New World seeking freedom or fortune. What began as a sometimes friendly and cooperative relationship soon led to bitter and bloody conflicts as the young and fragile nation sought its identity. This book explores the complex history and the turbulent relations between native people and the new settlers in North America.

Books IV-VI Ludger Hovestadt,2022-12-31 Abhandlung zur digitalen Architektur Hovestadts Traktat folgt strikt den Linien der bekannten Abhandlungen von Vitruv und Alberti, in der Annahme, dass wir uns heute wieder in einer ähnlichen Konstellation befinden. Vitruv und Alberti brachten zum Ausdruck, was Architektur in ihrer Epoche bedeutete: die römische Antike und die Renaissance. Hovestadt formuliert sie nun in den heutigen Begriffen der Physik, Mathematik, Technologie, Literatur und Philosophie neu. Die Bücher I bis III befassen sich mit der Rolle des Architekten und der Objektivität der Architektur. Die Bücher IV bis VI thematisieren die Modalitäten des Sprechens und der Kodierung von Architektur: das Geheime, das Öffentliche und das Private. Die Bücher VII bis X widmen sich den eigentlichen digitalen Mechanismen: künstlicher Intelligenz, natürlicher Kommunikation, Gnomonik und kulturellem Erbe. Ein Architekturtraktat unserer Zeit in 10 Büchern Nach dem Vorbild von Vitruv und Alberti Erscheint in drei Bänden der Reihe Applied Virtuality Book Series, Bd. 19, 20 und 21

Heesvelde,2022-07-18 This volume explores the relationship between cities and railways over three centuries. Despite their nearly 200-year existence, The City and the Railway in the World shows that urban railways are still politically and historically important to the modern world. Since its inception, cities have played a significant role in the railway system; cities were among the main reasons for building such efficient but lavish and costly modes of transport for persons, goods, and information. They also influenced the technological appearance of railways as these have had to meet particular demands for transport in urban areas. In 25 essays, this volume demonstrates that the relationship between the city and the railway is one of the most publicly debated themes in the context of daily lives in growing urban settings, as well as in the second urbanisation of the global South with migration from rural to urban landscapes. The volume's broad geographical range includes discussions of railway networks, railway stations, and urban rails in countries such as India, Japan, England, Belgium, Romania, Nigeria, the USA, and Mexico. The City and the Railway in the World will be a useful tool for scholars interested in the history of transport, travel, and urban change.
