*Gunships, a Pictorial History of Spooky* Larry Davis, 1982 Captioned photos, and brief text describe the tactics, equipment, and gunship aircraft most used in tactical interdiction.

*Ghostriders 1968-1975* William Walter, 2022-03-08 If necessity is the mother of invention, the AC-130 gunship was definitely her offspring. *Ghostriders: Mors De Caelis* is a comprehensive history of AC-130 gunship combat operations in Vietnam, Laos, and Cambodia. The story begins with the first AC-130 in 1968, and ends in 1975 at the end of the war in Vietnam. It tells the life and death stories of Spectre crews, who faced extreme danger while hunting trucks on the Ho Chi Minh Trail and providing fire support for US and allied ground forces. Though the AC-130 was credited with 10,000 trucks destroyed, this phenomenal achievement came with a hefty price. Fifty-two Spectre crewmen and six AC-130s were lost during combat operations in Laos and Vietnam. Written in third-person omniscient point of view by an experienced combat veteran and Spectre Historian, all aspects of the story are derived from official declassified records and personal interviews. The level of detail and context figuratively puts the reader in the aircraft as an observer, flying alongside a Spectre crew in combat. Above all, this is the story of Spectre—accurate, detailed, compelling, and unique.

*Gunships* Wayne Mutza, 2009 *Gunships: The Story of Spooky, Shadow, Stinger, and Spectre* tells the dramatic story of transforming military cargo transports into deadly ground-attack aircraft used by the U.S. and other countries in worldwide conflicts from the Vietnam War to the Middle East today. This comprehensive and detailed accounting of gunships begins with piston-powered, WWII-era C-47s and progresses to the four-engine turboprop C-130 Hercules, showing how gunships evolved from using 20mm miniguns to 105mm Howitzers with digital-age Battle Management Centers housed onboard. These highly effective airplanes made history by removing the safe haven of night operations from the enemy, and allowing strategic victory that might not have otherwise been possible. Author Wayne Mutza not only carefully researched all of these aircraft and their paths to reality, but also tells the tale of the brave and persevering men who believed in this unique weapon system and who saw its development through to the end. This book features a wealth of outstanding color photographs, many of which have never before been published, and also contains detailed appendices documenting gunship production data, combat units, and aircraft losses.

**The Dakota Hunter** Hans Wiesman, 2015-03-19 A tale of a lifelong passion for a WWII aircraft that changed the author's life: "It is almost like an adventure novel except it is true" (Air Classics). This book tells the story of a Dutch boy who grew up during the 1950s in postwar Borneo, where he had frequent encounters with an airplane, the Douglas DC-3, a.k.a. the C-47 Skytrain or Dakota, of World War II fame. For a young boy living in a remote jungle community, the aircraft reached the proportions of a romantic icon as the essential lifeline to a bigger world for him, the beginning of a special bond. In 1957, his family left the island and all its residual wreckage of World War II, and he attended college in The Hague. After graduation, he started a career as a corporate executive—and met the aircraft again during business trips to the Americas. His childhood passion for the Dakota flared up anew, and the fascination pulled like a magnet. As if predestined, or maybe just looking for an excuse to come closer, he began a business to salvage and convert Dakota parts, which meant first of all finding them. As the demand for these war relic parts and cockpits soared, he began to travel the world to track down surplus, crashed, or derelict Dakotas. He ventured deeper and deeper into remote mountains, jungles, savannas, and the seas where the planes are found, usually as ghostly wrecks but sometimes still in full commercial operation. In hunting the mythical Dakota, he often encountered intimidating or dicey situations in countries plagued by wars or revolts, others by arms and narcotics trafficking, warlords, and conmen. The stories of these expeditions take the reader to some of the remotest spots in the world, but once there, one is often greeted by the comfort of what was once the West's apex in transportation—however now haunted by the courageous airmen of the past.

**Special Operations Command** Rick Llinares, Andy Evans, 2010-06-01 This volume brings together all of the special operations aircraft of AFSCOC, which continues to provide an exceptional role within the Air Force. The book examines their specifications, operations and combat.

*A-10 Thunderbolt II Units of Operation Enduring Freedom 2002-07* Gary Wetzel, 2013-06-20 The A-10 was never a favourite amongst the USAF's senior staff, and prior to Iraq's invasion of Kuwait in 1990 they had attempted to transfer the aircraft to the US Army and Marine Corps. Reprieved from premature retirement, the A-10 would see combat in the Balkans during the mid-1990s and over Iraq in Operations Northern Watch and Southern Watch until Operation Iraqi Freedom began in 2003. Following the 11 September 2001 attacks in the United States, the Bush administration responded with the instigation of Operation Enduring Freedom. A-10 aircraft first entered the fray during Operation Anaconda in March 2002. During Anaconda four A-10s flying from Pakistan provided 21 straight hours of FAC (A)/CAS coverage. The untold story of the A-10 in Enduring Freedom will be explored and presented as never before through first hand interviews and photography from those involved, along with official military achieves. This title is the first of three planned covering the combat experience of the USAF's A-10 Thunderbolt II units. Follow-on volumes will examine the role of the Warthog during Operation Desert Storm and Operation Iraqi Freedom.

**Fire for Effect** John J. McGrath, 2010

**Jungle Ace** John R. Bruning, 2011 Flying P-38s, Jerry Johnson shot down 24 aircraft in 265 combat missions in the Pacific theater. At the age of only twenty-four, he commanded the highest-scoring fighter group in the Pacific. Tragically, though Johnson had survived three combat tours, which included a mid-air collision with a Japanese aircraft and being shot down by friendly fire, the new father disappeared without a trace while flying a courier mission one month after the war's end.

**Choreographies of 21st Century Wars** Gay Morris, Jens Richard Giersdorf, 2016-02-05 Wars in this century are radically different from the major conflicts of the 20th century—more amorphous, asymmetrical, globally connected, and unending. *Choreographies of 21st Century Wars* is the first book to analyze the interface between choreography and wars in this century, a pertinent inquiry since choreography has long been linked to war and military training. The book draws on recent political theory that posits shifts in the kinds of wars occurring since the First and Second World Wars and the Cold War, all of which were wars between major world powers. Given the dominance of today's more indeterminate, asymmetrical, less decisive wars, we ask if choreography, as an organizing structure and knowledge system, might not also need revision in order to reflect on, and intercede in, a globalized world of continuous warfare. In an introduction and sixteen chapters, authors from a number of disciplines investigate how choreography and war in this century impinge on each other. Choreographers write of how they have related to contemporary war in specific works, while other contributors investigate the interconnections between war and choreography through theatrical works, dances, military rituals and drills, the choreography of video war games and television shows. Issues investigated include torture and terror, the status of war refugees, concerns surrounding fighting and peacekeeping soldiers, national identity tied to military training, and more. The anthology is of interest to scholars in dance, performance, theater, and cultural studies, as well as the social sciences.

*Special Operations Association*, 2006-01-31

*Cherries* John Podlaski, 2010-04-20 In 1970, John Kowalski is one of many young, naive teenage soldiers sent to Vietnam to fight in an unpopular

war. Dubbed “Cherries” by their more seasoned peers, these newbies suddenly found themselves thrust into the middle of a terrible nightmare - literally forced to become men overnight. On-the-job-training is intense, however, most of these teenagers were hardly ready to absorb the harsh mental, emotional, and physical stress of war. When coming under enemy fire for the first time and witnessing death first-hand, a life changing transition begins...one that can't be reversed. The author is an excellent story teller, readers testify that they are right there with the characters, joining them in their quest for survival, sharing the fear, awe, drama, and sorrow, witnessing bravery and sometimes, even laughing at their humor. It's a story that is hard to put down. When soldiers return home from war, all are different - changed for life. Cherries tells it like it is and when finished, readers will better understand what these young men had to endure, and why change is imminent.

**Airplane Design: Preliminary configuration design and integration of the propulsion system** Jan Roskam,1985

**Spectre Gunner** David M. Burns,2013-01-31 This is the true story of Master Sergeant David M. Burns, an aerial gunner assigned to the deadliest squadron in air force history. Aboard the AC-130 Spectre gunship, he flew a total of 287 combat missions over Laos, South Vietnam, and Cambodia, in pursuit of the truck traffic coming down the Ho Chi Minh Trail. His squadron destroyed more than fifteen thousand trucks loaded with war munitions destined for South Vietnam and Cambodia. Despite heavy and constant anti-aircraft and missile fire, the loss of six aircraft and the lives of fifty-two men, the crew never wavered in its dedication to the mission. Master Sergeant Burns has a distinguished military career that began in 1951 at the age of fifteen. He served one tour of duty in Phan Rang, South Vietnam, in 1967, and four tours of duty in the 16th Special Operations Squadron in Southeast Asia as an aerial gunner, lead gunner, and instructor gunner. He served in both the United States Navy and Air Force, earning three Distinguished Flying Crosses for heroism, twenty-seven Air Medals, as well as a Bronze Star, Purple Heart, Presidential Unit Citation, Armed Forces Expeditionary Medal, Vietnam Cross of Gallantry with Palm, Vietnam Service Medal with nine battle stars, and other decorations from the Korean War. He was wounded twice and is credited with saving the lives of fourteen crewmembers. This is his story.

**Beyond Close Air Support** Bruce Pirnie,Adam Grissom,Alan Vick,Karl P. Mueller,David T. Orletsky,2005 Operations in Afghanistan and Iraq have renewed interest in close air support and the integration of air and ground power. In particular situations, either might predominate, and their relationship is likely to shift over the course of a campaign. This report addresses three questions: (1) How should air attack and ground maneuver be integrated? (2) How should the terminal attack control function be executed? (3) How should ground maneuver/fires and air attack be deconflicted? It recommends that the Army and the Air Force work together to develop new concepts and technologies to improve the partnering of air and ground. It recommends new processes to effectively designate targets and improved control mechanisms to exploit the benefits of the digital battlefield.

**Development and Employment of Fixed-wing Gunships, 1962-1972** Jack S. Ballard,1982

**Air Power And The Ground War In Vietnam, Ideas And Actions** Dr Donald J. Mrozek,2015-11-06 Ultimately, this study is about a smaller Vietnam War than that which is commonly recalled. It focuses on expectations concerning the impact of air power on the ground war and on some of its actual effects, but it avoids major treatment of some of the most dramatic air actions of the war, such as the bombing of Hanoi. To many who fought the war and believe it ought to have been conducted on a still larger scale or with fewer restraints, this study may seem almost perverse, emphasizing as it does the utility of air power in conducting the conflict as a ground war and without total exploitation of our most awe-inspiring technology. Although the chapters in this study are intended to form a coherent and unified argument, each also offers discrete messages. The chapters are not meant to be definitive. They do not exhaust available documentary material, and they often rely heavily on published accounts. Nor do they provide a complete chronological picture of the uses of air power, even with respect to the ground war. Nor is coverage of areas in which air power was employed—South Vietnam, Laos, Cambodia, and North Vietnam—evenly distributed nor necessarily proportionate to the effort expended in each place during the war. Lastly, some may find one or another form of air power either slightly or insufficiently treated. Such criticisms are beside the point, for the objectives of this study are to explore a comparatively neglected theme—the impact of air power on the ground—and to encourage further utilization of lessons drawn from the Vietnam experience.
