**Chroma** Derek Jarman,2017-12-14 A poetic, passionate and intensely personal exploration of colour written during the final year of Derek Jarman's life -- with a new introduction by Ali Smith. In Chroma, his most poetic and lyrical book, Derek Jarman explores the uses of colour. Shifting across the spectrum and from the medieval to the modern, he draws on the work of great colour theorists from Pliny to Leonardo. Interwoven with these musings are evocative memories from Jarman's childhood and illustrious career, along with reflections on his deteriorating health. Written a year before Jarman's death, and as his eyesight was failing, this is an intensely personal work; a paean from an artist seeking to memorialise the extraordinary power of colour even while it receded from his own life.

Sampler & Antique Needlework Quarterly Collection 1991-2015 Annie's,2016-11 Containing unique reproductions of samplers and smalls from private collectors and museum collections, this DVD edition features one-of-a-kind antique needlework projects from the 17th, 18th, 19th and 20th centuries, as well as antique-inspired designs. Also featured are well-researched articles profiling sampler makers, sampler-producing schools, needlework tools, museums and the various historical events that have shaped needlework. Some of the articles and projects cannot be found anywhere else, making this DVD essential to any collection. The DVD includes full-color photography, easy-to-read charts and complete instructions.

*Networks of Innovation* Ilkka Tuomi, 2006 Innovations are adopted when users integrate them in meaningful ways into existing social practices. Histories of major technological innovations show that often the creative initiative of users and user communities becomes the determining factor in the evolution of particular innovations. The evolutionary routes of the telephone, the Internet, the World Wide Web, email, and the Linux operating system all took their developers by surprise. Articulation of these technologies as meaningful products and systems was made possible by innovative users and unintended resources. Iterative and interactive models have replaced the traditional linear model of innovation during the last decade. Yet, heroic innovators and entrepreneurs, unambiguous functionality of products, and a focus on the up-stream aspects of innovation still underlie much discussion on innovation, intellectual property rights, technology policy, and product development. Coherent conceptual, theoretical and practical conclusions from research on knowledge creation, theory of learning, history of technology, and the social basis of innovative change have rarely been made. This book argues that innovation is about creating meaning; that it is inherently social; and is grounded in existing social practices. To understand the social basis of innovation and technology development we have to move beyond the traditional product-centric view on innovations. Integrating concepts from several disciplinary perspectives and detailed analyses of the evolution of Internet-related innovations, including packet-switched computer networks, World Wide Web, and the Linux open source operating system, the book develops foundations for a new theoretical and practical understanding of innovation. For example, it shows that innovative development can occur in two qualitatively different ways, one based on evolving specialization and the other based on recombination of existing socially produced resources. The expanding communication and collaboration networks have increased the importance of the recombinatory mode making mobility of resources, sociotechnical translation mechanisms, and meaning creation in communities of practice increasingly important for innovation research and product development.
