A desire to escape the commotion of the city without sacrificing creature comforts is something felt by many; especially in today's interconnected world. woods, and otherworldly off-grid getaways, Cabin Fever showcases a new wave of modern hideaways, all remotely positioned and away from the hustle and bustle.

The New Mediterranean Gestalten,2019-09-19 A modernist take on Mediterranean aesthetics, a new movement in interior design embraces sumptuous minimalism through warm, earthy tones, and natural materials. In southern locations such as Australia, California, and Brazil, but also in places like New York and Copenhagen--the Mediterranean sensibility echoes itself in these locales through a variety of reasons, be it former colonial influences, a similar sunny climate, or simply an appreciation for the Mediterranean way of life. The New Mediterranean -- Homes and Interiors under the Southern Sun showcases inspiring residences and vacation homes around the world that combine rustic, earthy tones with colorful fabrics, ceramics and glass. The book introduces the designers, architects, and brands who are bringing the style to life, outlining key elements in order to show how to create this look at home. More than a design trend, this is a philosophy to transform interiors into havens of light, craftsmanship, and simplicity.

Modernity and Culture Leila Fawaz,C. A. Bayly,2002-05-15 Between the 1890s and 1920s, cities in the vast region stretching from the Mediterranean Sea to the Indian Ocean were experiencing political, social, economic, and cultural changes that had been set in motion at least since the early nineteenth century. As the age of pre-colonial empires gave way to colonial and national states, there was a sense that a particular liberalism of culture and economy had been irretrievably lost to a more intolerant age. Avoiding such dichotomies as East/West and modernity/tradition, this book provides a comparative analysis of contested versions of the concept of modernity. The book examines not only the high culture of scholars and the

literati, but also popular music, the visual arts, and journalism. The contributors incorporate discussion of the way in which the business in both commodities and ideas was conducted in the increasingly cosmopolitan cities of the time.

Country and Cozy Robert Klanten, gestalten, 2021 Turning away from traffic-choked streets and onto meandering country paths, urban residents increasingly are choosing to take up residence in greener pastures. Quiet and quaint, the countryside comes with its own pace of living - and depending on where you are, its own regional flair. Country and Cozy opens doors and pulls back the floral curtains to reveal a more characterful approach to interior design and decoration. Whether it's a converted outhouse in the south of France, a Latin American Finca, or a whimsical English cottage complete with a thatched roof, Country and Cozy showcases a series of beautiful country homes and illustrates how their inhabitants have created breathtaking living spaces that make the most of rural life.

Inside the Seraglio John Freely, 2016-12-30 Originally published: London: Viking, 1999.

Beyond the West Robert Klanten, Andrea Servet, 2020 In the last decades Western architecture has largely dominated the discourse and the built environment worldwide. Recently architecture firms from non-Western countries have been establishing local and global recognition for themselves. Practices all over the world face challenges against a backdrop of rapidly growing cities, ecological demands, changing societies and climate, and emerging economies. Local architects often find strikingly different solutions to local requirements, including sustainability, transportation, migration, construction materials, and traditions. In Mexico, architects work closely with indigenous communities to create modular social housing that can be assembled in one week. In Namibia, a lodge in a wildlife conservancy is designed to echo a local birds nest, while in Vietnam, a library and public space have created a micro-ecosystem to house fish and grow food. Beyond the West journeys across Asia, Africa, and the Americas to understand how local architects respond to a changing world, and focuses its wide lens on inspiring and truly global architecture.
