*ABC Cantonese-English Comprehensive Dictionary* Robert S. Bauer, 2020 Cantonese is spoken by an estimated 73 million people worldwide. It remains hugely influential and a source of great pride--especially for its speakers in Hong Kong, where it flourishes as the predominant language and so sets Hong Kong apart linguistically from all of mainland China. The first and most authoritative reference of its kind to be published in the last forty years, *ABC Cantonese-English Comprehensive Dictionary* comprises about 15,000 lexical entries that are unique to the colloquial Cantonese language as it is spoken and written in Hong Kong today. Author Robert S. Bauer, a renowned lexicographer and authority on Cantonese, has utilized language documentation resources to the fullest extent by gathering material firsthand from dictionaries, glossaries, and grammars; newspapers and magazines; government records; cartoons and comic books; film and television; websites; and native speakers striding the sidewalks of Hong Kong to capture concretely contemporary Cantonese. In addition to the Introduction, which presents an exhaustive description and analysis of Hong Kong Cantonese, this dictionary's special features include: alphabetical ordering of the lexical entries by their Jyut Ping romanized Cantonese pronunciations; parts of speech; cross-referencing with semantically related lexical items; variant pronunciations and written forms in Chinese characters and English letters; explanatory notes on social status and usage (literal, figurative, slang, jargon, humorous, obscene, obsolete, etc.); information on sociocultural, historical, and political aspects; and example sentences showing lexical usage in the context of spoken Cantonese.

**Modern Cantonese Phonology** Robert S. Bauer, Paul K. Benedict, 2011-07-20 *TRENDS IN LINGUISTICS* is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks, as well as studies that provide new insights by approaching language from an interdisciplinary perspective. *TRENDS IN LINGUISTICS* considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. *TRENDS IN LINGUISTICS* publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing. To discuss your book idea or submit a proposal, please contact Birgit Sievert.

*While We're Here* Alec Ash, Tom Pellman, 2015 Anyone who has lived in China has stories to tell. For foreigners and Chinese alike, this is a land that transforms itself every day, with something to write about on every corner. Collected in this anthology are 33 contributions, a mix of narrative non-fiction, fiction and poetry, from the writers' colony the Anthill (theanthill.org). Together, they offer glimpses into this quicksilver country-by turns funny, touching and bizarre. Whether we stay or leave, the stories remain.

**Research Methods in Language Variation and Change** Manfred Krug, Julia Schlüter, 2013-10-24 Methodological know-how has become one of the key qualifications in contemporary linguistics, which has a strong empirical focus. Containing 23 chapters, each devoted to a different research method, this volume brings together the expertise and insight of a range of established practitioners. The chapters are arranged in three parts, devoted to three different stages of empirical research: data collection, analysis and evaluation. In addition to detailed step-by-step introductions and illustrative case studies focusing on variation and change in English, each chapter addresses the strengths and weaknesses of the methodology and concludes with suggestions for further reading. This

systematic, state-of-the-art survey is ideal for both novice researchers and professionals interested in extending their methodological repertoires. The book also has a companion website which provides readers with further information, links, resources, demonstrations, exercises and case studies related to each chapter.

**The Deer and the Cauldron: 3 Volume Set** Louis Cha, 2018-06-26 The Deer and the Cauldron is Louis Cha's last novel. This picaresque, historical romance features Tricket, an irreverent and comic anti-hero unlike Cha's more conventional, valorous protagonists. The Times Literary Supplement selected The Deer and the Cauldron as a 1998 International Book of the Year.

**Priestess of the Lost Colony** Brandon S. Pilcher, 2021-04-27 A headstrong Egyptian priestess, her brother, their sacked colony—and a rescue mission. When Itaweret's beloved Per-Pehu falls to the tyrannical Scylax, she and her brother Bek lead a mission to save her captured people and depose Scylax. Along the way, they run into all kinds of perils, friends, and foes—and beasts sent by an angry goddess. Set in ancient Greece 3,500 years ago, this is a tale blending magical realism with history, high adventure with discovery . . . and Itaweret's determination to save her people while learning her heart's desires and realizing her deeper purpose.

**Tao Te Ching** Lao Tzu, 2014-01-08 A fundamental book of the Taoist, the Tao Te Ching is regarded as a revelation in its own right. It provides a wealth of wisdom and insights for those seeking a better understanding of themselves. Over time, many changes have been made to the original Chinese text. Researcher Patrick M. Byrne has produced a translation that is accurate and easy to understand, while capturing the pattern and harmony of the original.

**Once Upon a Time in China** Jeff Yang, 2003 From Jackie Chan to Ang Lee, from Supercop to Crouching Tiger, Hidden Dragon, Chinese cinema has truly arrived in the U.S. Filled with photos and tidbits, this is the definitive book for anyone who has already fallen in love with Chinese cinema—and all those who are looking to learn more about it.

**Assessing Scientific Inquiry** Susanne Mannel, 2011 In this book the development of an instrument for the testing of students' procedural knowledge on scientific inquiry is described. The test instrument, called NAW-L test, was designed to measure differences in performance between German grade 5 students from the school type Hauptschule on the one hand and from the type Gymnasium on the other. It was developed on the basis of a competence model, which predicts task difficulty. The quality of the NAW-L test was determined by Rasch analysis. Typical deficits of younger students in scientific reasoning and scientific inquiry mentioned in the literature could be replicated in this project, speaking for the validity of the test instrument.

**Radar Interferometry** Ramon F. Hanssen, 2006-04-18 This book is the product of five and a half years of research dedicated to the understanding of radar interferometry, a relatively new space-geodetic technique for measuring the earth's topography and its deformation. The main reason for undertaking this work, early 1995, was the fact that this technique proved to be extremely useful for wide-scale, fine-resolution deformation measurements. Especially the interferometric products from the ERS-1 satellite provided beautiful first results—several interferometric images appeared as highlights on the cover of journals such as Nature and Science. Accuracies of a few millimeters in the radar line of sight were claimed in semi-continuous image data acquired globally, irrespective of cloud cover or solar illumination. Unfortunately, because of the relative lack of supportive observations at these resolutions and accuracies, validation of the precision and reliability of the results remained an issue of concern. From a geodetic point of view, several survey techniques are commonly available to measure a specific geophysical phenomenon. To make an optimal choice between these techniques it is important to

have a uniform and quantitative approach for describing the errors and how these errors propagate to the estimated parameters. In this context, the research described in this book was initiated. It describes issues involved with different types of errors, induced by the sensor, the data processing, satellite positioning accuracy, atmospheric propagation, and scattering characteristics. Nevertheless, as the first item in the subtitle "Data Interpretation and Error Analysis" suggests, data interpretation is not always straightforward.

Europe's First Farmers T. Douglas Price, 2000-09-14 Essays by leading specialists on a central issue of European history: the transition to farming.

**Law and Colonial Cultures** Lauren Benton, 2002 Argues that institutions and culture serve as important elements of international legal order.

*Placing Animals in the Neolithic* Arkadiusz Marciniak, 2018-10-24 This book presents a new perspective on the social milieu of the Early and Middle Neolithic in Central Europe as viewed through relations between humans and animals, food acquisition and consumption, as well as refuse disposal practices. Based on animal bone assemblages from a wide range of sites from a period of over 2,000 years originating in both the North European Plain lowlands and the loess uplands, the evidence explored in the book represents the Linear Band Pottery Culture (LBK), the Lengyel Culture, and the Funnel Beaker Culture (TRB) allowing us to follow the dynamic development of early farmers from their emergence in the area north of the Carpathians up to their consolidation and stabilization in this new territory.

*Standardizing Minority Languages* Pia Lane, James Costa, Haley De Korne, 2017-09-22 The Open Access version of this book, available at <https://www.taylorfrancis.com/books/9781138125124>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This volume addresses a crucial, yet largely unaddressed dimension of minority language standardization, namely how social actors engage with, support, negotiate, resist and even reject such processes. The focus is on social actors rather than language as a means for analysing the complexity and tensions inherent in contemporary standardization processes. By considering the perspectives and actions of people who participate in or are affected by minority language politics, the contributors aim to provide a comparative and nuanced analysis of the complexity and tensions inherent in minority language standardisation processes. Echoing Fasold (1984), this involves a shift in focus from a sociolinguistics of language to a sociolinguistics of people. The book addresses tensions that are born of the renewed or continued need to standardize 'language' in the early 21st century across the world. It proposes to go beyond the traditional macro/micro dichotomy by foregrounding the role of actors as they position themselves as users of standard forms of language, oral or written, across sociolinguistic scales. Language policy processes can be seen as practices and ideologies in action and this volume therefore investigates how social actors in a wide range of geographical settings embrace, contribute to, resist and also reject (aspects of) minority language standardization.

**Physiotherapy and Occupational Therapy for People with Cerebral Palsy** Karen Dodd, Christine Imms, Nicholas F. Taylor, 2010-03-08 This book is a practical resource for physiotherapists and occupational therapists who support people with cerebral palsy, helping them to solve the problems with movement and other impairments that so often accompany cerebral palsy, so that they can be more active and better able to participate in roles such as study, work, recreation and relationships. The first chapters provide the background to the clinical reasoning approach that informs the whole text, as well as an overview of therapeutic interventions. The subsequent chapters present clinical situations that therapists will encounter in the course of their work with individuals with cerebral

palsy across the lifespan. Each chapter describes a case in detail, including the reasoning behind assessment and treatment choices, interventions and outcomes. The themes emphasized throughout the book are the use of the clinical reasoning approach of the intervention process model, the International Classification of Functioning, Disability and Health as a framework to help therapists inform patient and family decision-making, family-centred approaches in developing and implementing therapeutic strategies, and multidisciplinary team work.

Contributions to Sino-Tibetan Studies John McCoy, Timothy Light, 2023-08-14 This book is a Festschrift volume dedicated to Emeritus Professor Nicholas C. Bodman, by his students, colleagues and friends and consists of a selection of contributions that match his interests in the descriptive, historical and comparative study of Chinese dialects (especially Min dialects) and the fields of Tibeto-Burman and Sino-Tibetan linguistics. The book is organized into sections: 1) General Compilation and Analysis (with articles by J.A. Matisov and M.J. Hashimoto), 2) Southeast Asian Languages (E.J.A. Henderson, R.B. Jones, W.J. Gedney, S. Egerod and M. Sherard), 3) Early Recorded Forms of Chinese (P. L-M Serruys, W.H. Baxter III, W. South Coblin and E.G. Pulleyblank), 4) Early Reconstructed Forms of Chinese (J. McCoy, J. Norman and K. Chang), 5) Modern Chinese Dialects (Y.C. Li, T. Light and A.R. Walton). These contributions by foremost scholars are significant. They throw new light and supply important new data on the linguistics of the Tibeto-Burman and Sino-Tibetan fields.

*Modern Morphometrics in Physical Anthropology* Dennis E. Slice, 2006-06-01 Morphometrics has undergone a revolutionary transformation in the past two decades as new methods have been developed to address shortcomings in the traditional multivariate analysis of linear distances, angles, and indices. While there is much active research in the field, the new approaches to shape analysis are already making significant and ever-increasing contributions to biological research, including physical anthropology. *Modern Morphometrics in Physical Anthropology* highlights the basic machinery of the most important methods, while introducing novel extensions to these methods and illustrating how they provide enhanced results compared to more traditional approaches. *Modern Morphometrics in Physical Anthropology* provides a comprehensive sampling of the applications of modern, sophisticated methods of shape analysis in anthropology, and serves as a starting point for the exploration of these practices by students and researchers who might otherwise lack the local expertise or training to get started. This text is an important resource for the general morphometric community that includes ecologists, evolutionary biologists, systematists, and medical researchers.

Balkan Prehistory Douglass W. Bailey, 2002-09-11 Douglass Bailey's volume fills the huge gap that existed for a comprehensive synthesis, in English, of the archaeology of the Balkans between 6,500 and 2,000 BC; much research on the prehistory of Eastern Europe was inaccessible to a western audience before now, because of linguistic barriers. Bailey argues against traditional interpretations of the period, which focus on the origins of agriculture and animal breeding. He demonstrates that this was a period when monumental social and material changes occurred in the lives of the people in this region, with new technologies and ways of displaying identity. *Balkan Prehistory* will be required reading for everyone studying the Neolithic, Copper and early Bronze Ages of Eastern Europe.

**Languages in prehistoric Europe** Alfred Bammesberger, Theo Vennemann, 2003 Before the advent of writing and before the development of the Indo-European language, Europe enjoyed much greater linguistic diversity with a whole host of other languages (Hispanic, Baltic, Slavic, Germanic, to name but a few) which are now defunct. This collection of nineteen papers from a conference held at the Katholische Universität Eichstätt in Germany in 1999, examine this diversity from archaeological (two papers) and linguistic perspectives. Contributors include: Robert S P

Beekes, Ivo Hajnal, Petri Kallio, Thomas Lindner, Oswald Panagl, Colin Renfrew, Klaus Strunk and Juergen Untermann. Papers in English and German.
