Edward C. Rosenthal Ph.D.

Craft Shaping Society Lindy Joubert, 2022-05-31 This book focusses on the role of craft as a continuing cultural practice and the revival of disappearing skills in contemporary society. It includes twenty-five essays by highly regarded artisans, academics, technologists, entrepreneurs, businesspeople, curators, and researchers from many countries representing a wide range of global craft traditions and innovations. The authors explain their professional practices and creative pathways with knowledge, experience, and passion. They offer insightful analyses of their traditions within their culture and in the marketplace, alongside the evolution of technology as it adapts to support experimentation and business strategies. They write about teaching and research informing their practice; and they explain the importance of their tools and materials in function and form of the objects they make. The essays reveal a poignant expression of their successes, disappointments, and opportunities. This book offers case studies of how artisans have harnessed the traditions of the past alongside the latest design technologies. The authors reveal how global craft is not only a vehicle for self-expression and creativity, but also for being deeply relevant to the world of work, community and environmental sustainability. The book makes the vital link between skills, knowledge, education, and employment, and fills a much-needed niche in Technical, Vocational Education and Training TVET.

Kingly Crafts Yung-ti Li, 2022-12-20 The site of Anyang, the last capital of the Shang dynasty, dated to around 1200 to 1000 BCE, is one of the most important sources of knowledge about craft production in Bronze Age China. Excavations and research of the settlement over the past ninety years demonstrate both the advanced level of Shang craft workers and the scale and capacity of the craft industries of the time. However, materials unearthed in Anyang by different expeditions have since been stored separately in China and Taiwan, making a thorough study of this important aspect of life in Shang China challenging. Despite efforts to integrate the data based on published material, the physical evidence rarely has been considered as a single group. Through a systematic analysis of the archaeological materials available in both China and Taiwan, Yung-ti Li provides a detailed picture of craft production in Anyang and paves the way for a new understanding of how the Shang capital functioned as a metropolis. Focusing on craft-producing activities, including bronze casting, bone working, shell and marble inlay working, lithic working, and pottery production, *Kingly Crafts* examines the material remains, the technology, and the production organization of the craft industries. Although the level of Shang craftsmanship can be seen in the finished products, Li demonstrates that it is necessary to study workshop remains and their archaeological context to reconstruct the social and political contexts of craft production. Offering a comprehensive investigation of these remains, *Kingly Crafts* sheds new light on the relationships between craft industries and political authority in the late Shang period.

Visual Thinking Temple Grandin, Ph.D., 2023-10-10 INSTANT NEW YORK TIMES BESTSELLER WINNER OF THE NAUTILUS GOLD AWARD "A powerful and provocative testament to the diverse coalition of minds we'll need to face the mounting challenges of the twenty-first century." –Steve Silberman "An absolute eye-opener." –Frans de Waal A landmark book that reveals, celebrates, and advocates for the special minds and contributions of visual thinkers A quarter of a century after her memoir, *Thinking in Pictures*, forever changed how the world understood autism, Temple Grandin—"an anthropologist on Mars," as Oliver Sacks dubbed her—transforms our awareness of the different ways our brains are wired. Do you have a keen sense of direction, a love of puzzles, the ability to assemble furniture without crying? You are likely a visual thinker. With her genius for demystifying science, Grandin draws on cutting-edge research to take us inside visual thinking. Visual thinkers constitute a far greater proportion of the population than previously believed, she reveals, and a more varied one, from the photo-realistic "object visualizers" like Grandin herself, with their intuitive knack for design and problem solving, to the abstract, mathematically inclined "visual spatial" thinkers who excel in pattern recognition and systemic thinking. She also makes us understand how a world increasingly geared to the verbal tends to sideline visual thinkers, screening them out at school and passing over them in the workplace. Rather than continuing to waste their singular gifts, driving a collective loss in productivity and innovation, Grandin proposes new approaches to educating, parenting, employing, and collaborating with visual thinkers. In a highly competitive world, this important book helps us see, we need every mind on board.

Understanding Uaps/Ufos: Implications for National Security and Air Safety Miguel A. Moreno Ph.D., 2023-05-24 In this book, I respond to the need for explanations of UAPs/UFOs, as presented by the Report from the Office of the Director of National Intelligence. I work within the Framework of the Pentagon's statement that UAPs are real objects with advanced intelligently controlled technologies, which are not ours (US). I present explanations of the Physics of UFOs/UAPs and how they work. I analyze and explain UAPs' flight characteristics. I present explanations for the observables listed by the National Intelligence Director's Report. I address and refute the hypothesis that UAPs are advanced hypersonic drones from Russia or China. I review and address the National Security as well as air safety concerns. I present case evidence and historical data supporting the hypothesis that some UFOs/UAPs are advanced technologies that do not seem to originate from Earth. It is evidence that may be conducive to the discovery, the realization that we are not alone in the Universe. This book is also intended to be used for additional reading in Astronomy and Physics classes.

Shamanic Breathwork Linda Star Wolf, 2009-11-17 Utilizing the healing power of breath to change consciousness • Explains how to enter altered states of consciousness, increase paranormal abilities, and resolve old traumas using breathwork • Introduces the Five Cycles of Change that bring about major life shifts and how to work with them • Includes 70-minute audio download of chakra-attuned rhythms to play during the journey Incorporating psychospiritual tools with her Shamanic Breathwork practice, Linda Star Wolf shows how to spiritually journey in the same way shamans entrain to the rhythms of drums or rattles using the breath, either alone or together with music. Much like traveling to sacred places or ingesting entheogens, this practice can be used to enter altered states of consciousness, connect to cosmic consciousness, increase paranormal abilities, and awaken the shaman within. Breathwork can also be used to resolve old traumas and shapeshift unproductive modes of thinking in order to move beyond them. Utilizing the healing power of breath along with chakra-attuned music, Linda Star Wolf explores the Five Cycles of Change--the Alchemical Map of Shamanic Consciousness--and how these cycles affect you as you move through major shifts in your life. Filled with personal stories and case histories, the book also includes 70-minute audio download of shamanic trance rhythms and a guided meditation to awaken the chakras during practice.

The Journey of Soul Initiation Bill Plotkin, PhD, 2021-01-12 Soul initiation is an essential spiritual adventure that most of the world has forgotten – or not yet discovered. Here, visionary ecopsychologist Bill Plotkin maps this journey, one that has not been previously illuminated in the contemporary Western world and yet is vital for the future of our species and our planet. Based on the experiences of thousands of people, this book provides phase-by-phase guidance for the descent to soul – the dissolution of current identity; the encounter with the mythopoetic mysteries of soul; and the metamorphosis of the ego into a cocreator of life-enhancing culture. Plotkin illustrates each phase of this riveting and sometimes hazardous odyssey with fascinating stories from many people, including those he has guided. Throughout he weaves an in-depth exploration of Carl Jung's Red Book – and an innovative framework for understanding it.
