Flash MX Studio Connor McDonald,Jon Steer,Jerome Turner,Abe White,Gerald YardFace,Matthew Baldwin,Steve Webster,David Tudury,2013-11-11 Flash MX Studio takes your raw Flash talent and multiplies its potency by focusing it on real-world web design situations. In the heady days of the late 1990s, designers were trying their hand at anything and everything they could lay their hands on. Now the marketplace is seriously focused, and serious Flash designers have to know exactly what they're doing and why. These days, it's all about functionality over experimentation, justification over style. It's all about maturity. The design must fit the job specs, and this book shows the reader how to fulfill these requirements and more. This book examines all the avenues open to professional or aspiring professional Flash MX designers. It takes a look at advanced uses of the new MX features, such as components and the Drawing API, and gives guidance on building whole new structures for animation, Dynamic Content, PHP, ColdFusion MX, XML, video, audio and audiovisual formats. Never before has so much power been so accessible to the web designer. This book is designed to put that power in your hands. Flash MX Studio has been broken into four sections to address the most common needs for the Flash designer. First off, Jamie McDonald provides five chapters on site presentation and the principles of web design. These opening chapters take a look at how to create slick, professional-level sites, involving Flash MX's new drawing and motion capabilities and interactive techniques. The second section concentrates on ActionScript. Flash's resident coding environment is crucial to master, and taps into Flash's great strength—intuitive and interactive applications. Keith Peters and Todd Yard have buddied up on this section, and examine some of the most advanced ActionScript techniques around. Be warned—this section is not for the faint-hearted! Section three takes a look at Flash MX's greatly improved visual, audio and audiovisual capabilities. Its

three chapters, written by Jez Turner and Alex White, concentrate on building a single site aimed at displaying rich media content. The final section is devoted to expounding a few myths about dynamic content using Flash. Its four chapters talk about general practice, before focusing in on specific areas, including introductions to PHP and XML, together with a look at Macromedia's brand new ColdFusion MX.

Facing the Sea of Sand Barry Cunliffe,2023-06-22 Northern Africa is dominated by the Sahara Desert, stretching across the continent from the Atlantic Ocean to the Red Sea. This book is about the people who lived around the edges of the Desert and the different ways in which they responded to its challenges, establishing networks of communication across its expanse. But the Sahara has not always been a desert. From about 9000 BC the region began to enjoy a warm, humid period allowing vegetation to flourish and wild animals to move in. Humans soon followed practising pastoral economies but with the onset of harsher conditions once more around 3000 BC the desert reclaimed its own. Since then fluctuations in climate have continued to affect the lives of people living around the desert fringes. The communities occupying the North African Coast and in the Nile Valley have come under the influence of the states dominating the Near East and the Mediterranean but those living in in the Sahel to the south of the desert have developed their own distinctive cultures. The book tells the story of the growing links between the two worlds, showing that Africa played a crucial part in the development of the Old World before it was drawn into the story of the New World.

SHEAVES Ludger Hovestadt,Vera Bühlmann,2013-10-09
"SHEAVES" will not describe anything. It will not judge. It will
inspire. There are no continuous texts, but a wide range of topics.
How to read this book? Take the notions seriously. Search the
Internet and they will lose their generalness. They will begin to
speak to you vividly. Bundle these riches with the riches of other
notions and they will activate each other. Also take the pictures
seriously. Photograph or scan them. Use them as an index, while
searching the Internet. Again, you will find rich stories. Bundle
those riches, concentrate them into new identities that are
interesting to you. Let yourself be inspired by the intellectual
wealth of our world. You can expand it. It is an exciting
adventure, demanding and optimistic.
