Insect Conservation Michael J Samways, 2019-12-02 Insects do not live in isolation. They interact with the abiotic environment and are major components of the terrestrial and freshwater biotic milieus. They are crucial to so many ecosystem processes and are the warp and weft of all terrestrial and freshwater ecosystems that are not permanently frozen. This means that insect conservation is a two-way process: insects as the subjects of conservation, while also they are useful tools for conserving the environment. This book overviews strategic ways forward for insect conservation. It is a general view of what has worked and what has not for the maintenance of insect diversity across the world, as well as what might be the right approaches for the future.

Scarlet Citadel for 5th Edition Steve Winter, 2021-08-17 Once a functional fortress where wizards honed their eldritch craft, little now remains of the Scarlet Citadel--on the surface. The place now has a sinister and deadly reputation among adventurers and lorekeepers, and for good reason. The dungeon's well-trod stairs have seen few return from their journeys below. Here, deep underground, dwarven mercenaries once bred their owlbears for war, sorcerers from the White Forest practiced their arts, and strange cults from other realms drew from mysterious nodes of power. Ancient treasures and secrets are still scattered everywhere. Malevolent creatures spin shadowy webs, enchant foul magics, and summon forth dark gods. The Scarlet Citadel for 5th Edition hardcover is: * A massive hardcover tome containing a

classic-style adventure for 10 levels of play, fully compatible for D&D 5E. * Easily paired with the Scarlet Citadel Map Folio, a fold-out set of playable battle maps from Kobold Press. * Suited for newcomers to tabletop RPGs as well as long-time Game Masters. * Optimized for evocative combats and magical mysteries, and brimming with plots and subplots to uncover. * Full of original traps and new monsters as well as a complete write-up of the nearby town of Redtower, where the adventurers can set up a home base.

Women, Children and the Family in Palmyra Signe Krag, Rubina Raja, 2019 The present volume includes articles stemming from a two-part workshop on the representations of women and children and their roles in the families in Roman period Palmyra. The workshops were held at Aarhus University, Denmark, under the auspices of the Palmyra Portrait Project in October 2016 and February 2017. During the workshops concerning women, children and family constellations, various aspects of representations of women and children as well as the wider family groups within which they were shown in Palmyra were explored, as well as the implications these might have carried in relation to the Palmyrene family structure and wider Palmyrene society. Since the evidence from the public sphere does not give much insight into how women and children were perceived in Palmyra, the material from the funerary sphere remains central to these issues--Publisher's description.

Promises, Promises Amber Miller, 2012-02-01 Raelene Strattford knows God has promised never to leave or forsake her. But after the catastrophic deaths of her parents, she doesn't believe it. What kind of God would take a girl's family and leave her alone in a wild land where women have no voice? Gustaf Hanssen has admired Raelene from afar for a while, but his poor attempt at courting her in the past has made him unwelcome in her life. When Gustaf promises Raelene's dying father that he will take care of her, he finds himself bound to her happiness, her

success, and her well-being in ways he never imagined. To keep his word must Gustaf really oversee all of Raelene's affairs, find her a husband, and maintain her farm, while she does nothing but scorn him? Can God reach through Raelene's pain and self-centeredness and give her the love that awaits, if only she will accept His will?

Nature Embodied Anthony Corbeill,2018-06-05 Bodily gesture. A Roman worshipper spins in a circle in front of a temple. Faced with death, a Roman woman tears her hair and beats her breasts. Enthusiastic spectators at a gladiatorial event gesticulate with thumbs. Examining the tantalizing glimpses of ancient bodies offered by surviving Roman sculptures, paintings, and literary texts, Anthony Corbeill analyzes the role of gesture in medical and religious ritual, in the gladiatorial arena, in mourning practice, in aristocratic competition of the late Republic, and in the court of the emperor Tiberius. Adopting approaches from anthropology, gender studies, and ecological theory, *Nature Embodied* offers both a series of case studies and an overarching narrative of the role and meanings of gesture in ancient Rome. Arguing that bodily

movement grew out of the relationship between Romans and their natural, social, and spiritual environment, the book explores the ways in which an originally harmonious relationship between nature and the body was manipulated as Rome became socially and politically complex. By the time that Tacitus was writing about the reign of Tiberius, the emergence of a new political order had prompted an increasingly inscrutable equation between truth and the body--and something vital in the once harmonizing relationship between bodies and the world beyond them had been lost. *Nature Embodied* makes an important contribution to an expanding field of research by offering a new theoretical model for the study of gesture in classical times.

Funerary Representations of Palmyrene Women Signe Krag, 2018 The ancient city of Palmyra, which today lies in the desert of modern Syria, was once a flourishing city of trade. During the Roman era, when Palmyra was at the height of its powers, several hundred funerary monuments were constructed in the city, and within these, portraits of Palmyra's inhabitants were once displayed. These representations of men, women, and children from the Roman Imperial period form the largest body of portraiture known outside of Rome itself, and their study is essential to our understanding of how funerary portraiture in the Roman provinces was used as a mechanism to shape and express identity. This volume offers a study and catalogue of the funerary portraits of Palmyrene women from the first century BC to the third century AD. It explores both the visual qualities of the portraits themselves, and the complexities of the space in which they were originally situated. By analysing the civic and religious activities of women within Palmyra, this book also situates these portraits in a broader context. Through this approach, the work thus addresses key questions concerning the characteristics of Palmyrene female portraits and what this indicates about the nature of female identity in Roman Palmyra, how the portrayals of women changed over time, and what might have caused such

changes.

Lived Religion in the Ancient Mediterranean World

Valentino Gasparini, Maik Patzelt, Rubina Raja, Anna-Katharina Rieger, Jörg Rüpke, Emiliano Urciuoli, 2020-04-06 The Lived Ancient Religion project has radically changed perspectives on ancient religions and their supposedly personal or public character. This volume applies and further develops these methodological tools, new perspectives and new questions. The religious transformations of the Roman Imperial period appear in new light and more nuances by comparative confrontation and the integration of many disciplines. The contributions are written by specialists from a variety of disciplinary contexts (Jewish Studies, Theology, Classics, Early Christian Studies) dealing with the history of religion of the Mediterranean, West-Asian, and European area from the (late) Hellenistic period to the (early) Middle Ages and shaped by their intensive exchange. From the point of view of their respective fields of research, the contributors engage with discourses on agency, embodiment, appropriation and experience. They present innovative research in four fields also of theoretical debate, which are "Experiencing the Religious", "Switching the Code", „A Thing Called Body“ and "Commemorating the Moment".

The Teaching and Study of Islam in Western Universities Paul Morris, William Shepard, Paul Trebilco, Toni Tidswell, 2013-11-26 Public interest in the religion of Islam and in Muslim communities in recent years has generated an impetus for Western Universities to establish an array of Institutes and programs dedicated to the study of Islam. Despite the growth in number of programs dedicated to this study, very little attention has been paid to the

appropriate shape of such programs and the assumptions that ought to underlie such a study. The Teaching and Study of Islam in Western Universities attempts to address two central questions that arise through the teaching of Islam. Firstly, what relation is there between the study of the religion of Islam and the study of those cultures that have been shaped by that religion? Secondly, what is the appropriate public role of a scholar of Islam? After extensive discussion of these questions, the authors then continue to address the wider issues raised for the academic community having to negotiate between competing cultural and philosophical demands. This edited collection provides new perspectives on the study of Islam in Western Institutions and will be an invaluable resource for students of Education and Religion, in particular Islamic Studies.

Hack the Stack Michael Gregg,Stephen Watkins,George Mays,Chris Ries,Ronald M. Bandes,Brandon Franklin,2006-11-06 This book looks at network security in a new and refreshing way. It guides readers step-by-step through the stack -- the seven layers of a network. Each chapter focuses on one layer of the stack along with the attacks, vulnerabilities, and exploits that can be found at that layer. The book even includes a chapter on the mythical eighth layer: The people layer. This book is designed to offer readers a deeper understanding of many common vulnerabilities and the ways in which attacker's exploit, manipulate, misuse, and abuse protocols and applications. The authors guide the readers through this process by using tools such as Ethereal (sniffer) and Snort (IDS). The sniffer is used to help readers understand how the protocols should work and what the various attacks are doing to break them. IDS is used to demonstrate the format of specific signatures and provide the reader with the skills needed to

recognize and detect attacks when they occur. What makes this book unique is that it presents the material in a layer by layer approach which offers the readers a way to learn about exploits in a manner similar to which they most likely originally learned networking. This methodology makes this book a useful tool to not only security professionals but also for networking professionals, application programmers, and others. All of the primary protocols such as IP, ICMP, TCP are discussed but each from a security perspective. The authors convey the mindset of the attacker by examining how seemingly small flaws are often the catalyst of potential threats. The book considers the general kinds of things that may be monitored that would have alerted users of an attack.

* Remember being a child and wanting to take something apart, like a phone, to see how it worked? This book is for you then as it details how specific hacker tools and techniques accomplish the things they do. * This book will not only give you knowledge of security tools but will provide you the ability to design more robust security solutions * Anyone can tell you what a tool does but this book shows you how the tool works

Murach's C# 2008 Joel Murach, 2008 This is a self-paced professional book that shows how to use Visual Studio 2008, C# 2008, and the .NET 3.5 classes to develop Windows Forms applications. It's an object-oriented book that shows how to use business classes, inheritance, and interfaces the way they're used in the real world. It's a database programming book that shows how to prototype professional database applications using RAD features like data sources and the DataGridView control. And it's a book that shows you how to take advantage of 2008 features like object and collection initialisers, automatically implemented properties, and LINQ. When you're done, you'll be able to develop three-tiered, object-oriented applications the way the best professionals develop them. That's why we say: No other book teaches you so much, so fast, or so thoroughly.

Linda Goodman's Sun Signs Linda Goodman, 2019-11-26

Embark on your cosmic path to self-discovery with this comprehensive guide to the twelve signs of the zodiac. Your sun sign is determined by the day and month of your birth and dictates your zodiac personality. Taking each of the twelve signs in turn, world famous astrologer Linda Goodman explains the importance of the sun - the most powerful of all stellar bodies - in astrology. She describes the characteristics of each sign and how these can be used to really get to know the men, women, children, bosses and employees in your life. This newfound knowledge allows us to feel closer to one another and to understand that, as Goodman says, 'Not all Capricorns are meek, not all Leos are outwardly domineering and not all Virgos are virgins.' Learn all this and much, much more from the world-famous astrologer who has helped millions divine their way to success, happiness and love by studying the sun signs. Before publication of *Sun Signs* in 1968, astrology as we know it had a very limited following in the United States and around the world. With this book, Linda Goodman changed that forever, bringing metaphysical consciousness to millions of readers around the world for the first time. Newspapers began running astrology columns, and Goodman herself contributed to these in the larger mass circulation women's magazines. An increasing number of people knew their sign and how to interpret the signs of others, introducing the study of astrological tendencies as we now know it.

Sexy Girls, Heroes and Funny Losers Maya Götz, Dafna Lemish, 2012 *Sexy Girls, Heroes and Funny Losers: Gender Representations in Children's TV around the World* presents the most comprehensive study to date of gender images on children's television. Conducted in 24 countries around the world, the study employed different methodologies and analyses. The findings illustrate how stereotypes of femininity and masculinity are constructed and promoted to children. It presents findings that may well require even the most cynical observer to admit that, despite some great strides, children's television worldwide is still a

very conservative force that needs to be reimagined and transformed!
