*The Tesseract* Alex Garland,2005-07-05 An intricately woven, suspenseful novel of psychological and political intrigue, *The Tesseract* follows the interlocking fates of three sets of characters in the Philippines: gangsters in a chase through the streets of Manila; a middle-class mother putting her children to bed in the suburbs and remembering her first love; and a couple of street kids and the wealthy psychiatrist who is studying their dreams. Alex Garland demonstrates the range of his extraordinary talents as a novelist in this national bestseller, a Chinese puzzle of a novel about three intersecting sets of characters in the Philippines.

Lost America : The Abandoned Roadside West Troy Paiva, A stunningly photographed examination of the roadside icons that dot America's landscape. *Lost America* celebrates the boom-to-bust towns, aircraft bone yards, and filling stations of days past that were sacrificed at the altars of speed and technology and relegated to windswept desert plains and abandoned fields. The eye-catching and memorable photography is complemented with a succinct text history that details the rise and fall of each subject. The result is an impressive tour of an America still standing, yet largely forgotten.

Communication and Mental Illness Jenny France,Sarah Kramer,2001-01-15 *Communication and Mental Illness* is a comprehensive and practical textbook written by a multidisciplinary group of experts in the field of mental health which will be of interest to all those interested in improving their understanding of individuals with mental illness. The book is divided into three parts. The first of these offers both student and experienced clinicians in the mental health field an improved theoretical knowledge of the methods of communication commonly adopted by individuals with a variety of diagnoses of mental illness. It also provides practical suggestions of how this information can improve the individual professional's management of patients. Part Two looks at how information about communication in mental illness can influence service provision, ending with suggestions for future policy and practice. *Communication and Mental Illness* concludes with a final part describing the state of current research into different facets of communication and mental illness, offering an insight into the variety of research methodology and points of interest to those involved in the field.

**NYCTA Objects** ,2017-10-24 The evolving design of New York subway ephemera: a collector's story New York City Transit Authority: *Objects* originated as a photography experiment. In 2011, New York photographer Brian Kelley began documenting collections of used MetroCards in his Brooklyn studio, arranging them in various grids with the goal of perfecting the lighting of an image. His brother suggested he make the grids more interesting by finding other types of cards. Having exhausted his search for discarded MetroCards in many of the city's 472 subway stations, Kelley turned to eBay for new finds. The online rabbit-hole gave him a crash course in the history of NYC transportation. He discovered tokens dating back to 1860, a ticket stub from 1885 when it cost three cents to take the train across the Brooklyn Bridge, as well as patches, matchbooks, tokens, timetables, pins and signs, posting his photographs of these finds on Tumblr and Instagram. Six years on, many MTA employees follow and advocate his project, sometimes contacting him with information and tips on rare items. As the collection grew, Kelley recognized that there were no comparable digital archives documenting the city's transportation evolution. *New York City Transit Authority: Objects* is a story told through the evolving design that spans decades of the city's history. Kelley's objects tell a greater story of New York's past. For him, *The NYCTA Project* remains a photography experiment and self-funded hobby, archiving the culture of his home city. For the reader, it's an intimate view of the city's history that merges design and infrastructure over the past 150 years.

**The Privatization of Care** Pat Armstrong,Hugh Armstrong,2019-09-25 Nursing homes are where some of the most vulnerable live and work. In too many homes, the conditions of work make it difficult to make care as good as it can be. For the last eight years an international team from Germany, Sweden, Norway, the UK, the US and Canada have been searching for promising practices that treat residents, families and staff with dignity and respect in ways that can also bring joy. While we did find ideas worth sharing, we also saw a disturbing trend toward privatization. Privatization is the process of moving away not only from public delivery and public payment for health services but also from a commitment to shared responsibility, democratic decision-making, and the idea that the public sector operates according to a logic of service to all. This book documents moves toward privatization in the six countries and their consequences for families, staff, residents, and, eventually, us all. None of the countries has escaped pressure from powerful forces in and outside government pushing for privatization in all its forms. However, the wide variations in the extent and nature of privatization indicate privatization is not inevitable and our research shows there are alternatives.
