Culture Management Lukasz Wroblewski,2017-01-30 Dr Lukasz Wroblewski's book Culture Management: Strategy and Marketing Aspects clearly recognises that the pressures on the cultural sector in the 21st Century are greater than ever before. Based on robust academic research within a practical industry context, this book addresses all the key issues related to marketing strategy and planning for the cultural industries. It will be an invaluable tool for managers, policy-makers and all those working in the creative and cultural world, and will help them to develop sound strategies for the future. Dr Kim Lehman Tasmanian School of Business and Economics, University of Tasmania Dr Wroblewski's book explains clearly what has changed to make the use of business models necessary, even in organizations which might have resisted in the past. Globalization has resulted in a population which understands and appreciates art and culture created in other countries. While it might be agreed that this is beneficial for society, it means that cultural arbitrators within a country no longer have the authority to dictate what is accepted as culture. Managers now understand that to gain the support of the public they must explain the benefits of consuming their cultural product. Dr Bonita M. Kolb Professor Emeritus of Lycoming College in Pennsylvania A thoughtful and penetrating analysis of culture management addressing marketing strategies and cultural institutions. An important 'must read' book for those involved in this exciting sector. Prof Adrian Payne University of UNSW Business School, University of New South Wales

Singing the Body Electric: The Human Voice and Sound Technology Miriama Young,2016-03-03 Singing the Body Electric explores the relationship between the human voice and technology, offering startling insights into the ways in which technological mediation affects our understanding of the voice, and more generally, the human body. From the phonograph to magnetic tape and now to digital sampling, Miriama Young visits particular musical and literary works that define a century-and-a-half of recorded sound. She discusses the way in which the human voice is captured, transformed or synthesised through technology. This includes the sampled voice, the mechanical voice, the technologically modified voice, the pliable voice of the digital era, and the phenomenon by which humans mimic the sounding traits of the machine. The book draws from key electro-vocal works spanning a range of genres - from Luciano Berio's Thema: Omaggio a Joyce to Radiohead, from Alvin Lucier's I Am Sitting in a Room, to Björk, and from Pierre Henry's Variations on a Door and a Sigh to Christian Marclay's Maria Callas. In essence, this book transcends time and musical style to reflect on the way in which the machine transforms our experience of the voice. The chapters are interpolated by conversations with five composers who work creatively with the voice and technology: Trevor Wishart, Katharine Norman, Paul Lansky, Eduardo Miranda and Bora Yoon. This book is an interdisciplinary enterprise that combines music aesthetics and musical analysis with literature and philosophy.
