Technology as Experience John McCarthy, Peter Wright, 2007-08-24 In *Technology as Experience*, John McCarthy and Peter Wright argue that any account of what is often called the user experience must take into consideration the emotional, intellectual, and sensual aspects of our interactions with technology. We don't just use technology, they point out; we live with it. They offer a new approach to understanding human-computer interaction through examining the felt experience of technology. Drawing on the pragmatism of such philosophers as John Dewey and Mikhail Bakhtin, they provide a framework for a clearer analysis of technology as experience. Just as Dewey, in *Art as Experience*, argued that art is part of everyday lived experience and not isolated in a museum, McCarthy and Wright show how technology is deeply embedded in everyday life. The zestful integration or transcendent nature of the aesthetic experience, they say, is a model of what human experience with technology might become. McCarthy and Wright illustrate their theoretical framework with real-world examples that range from online shopping to ambulance dispatch. Their approach to understanding human computer interaction—seeing it as creative, open, and relational, part of felt experience—is a measure of the fullness of technology's potential to be more than merely functional.

Papertoy Monsters Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), *Papertoy Monsters* offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

The Psychology of Fake News Rainer Greifeneder, Mariela Jaffe, Eryn Newman, Norbert Schwarz, 2020-08-13 This volume examines the phenomenon of fake news by bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of “alternative facts”, this is a fascinating and vital reading for students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.

Mukiwa Peter Godwin, 2011-06-22 Mukiwa opens with Peter Godwin, six years old, describing the murder of his neighbor by African guerillas, in 1964, pre-war Rhodesia. Godwin's parents are liberal whites, his mother a government-employed doctor, his father an engineer. Through his innocent, young eyes, the story of the beginning of the end of white rule in Africa unfolds. The memoir follows Godwin's personal journey from the eve of war in Rhodesia to his experience fighting in the civil war that he detests to his adventures as a journalist in the new state of Zimbabwe, covering the bloody return to Black rule. With each transition Godwin's voice develops, from that of a boy to a young man to an adult returning to his homeland. This tale of the savage struggle between blacks and whites as the British Colonial period comes to an end is set against the vividly painted background of the myserious world of South Africa.

International Perspectives on Spinal Cord Injury World Health Organization, International Spinal Cord Society, 2013 Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to

people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: ---assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

The Other Side of Beautiful Kim Lock, 2021-07-01 What happens when fate says 'go'? Lost & Found meets The Rosie Project in a stunning break-out novel where a vulnerable misfit is forced to re-engage with the world, despite her best efforts. Meet Mercy Blain, whose house has just burnt down. Unfortunately for Mercy, this goes beyond the disaster it would be for most people: she hasn't been outside that house for two years. Flung out into the world she's been studiously ignoring, Mercy goes to the only place she can: her not-quite-ex-husband Eugene's house. But it turns out she can't stay there either. And so begins Mercy's unwilling journey. After the chance purchase of a cult classic campervan (read tiny, old and smelly), with the company of her sausage dog, Wasabi, and a mysterious box of cremated remains, Mercy heads north from Adelaide to Darwin. On the road, through badly timed breakdowns, gregarious troupes of grey nomads, and run-ins with a rogue adversary, Mercy's carefully constructed walls start crumbling. But what was Mercy hiding from in her house? And why is Eugene desperate to have her back in the city? They say you can't run forever... Exquisite, tender and wry, this is a break-out novel about facing anxiety and embracing life from an extraordinary new talent. PRAISE: 'Tender, funny and quietly profound, The Other Side of Beautiful is a breath of fresh air.' - The Sunday Times 'A colourful, engaging story of escape and road-trip adventure ... also compellingly cinematic and features an endearing narrator-heroine with plenty of meaty real-world troubles.' - Sydney Morning Herald 'An engaging story about second chances and a life changing road trip ... a heart-warming story.' - Canberra Weekly magazine 'Mercy Blain is a character you find yourself cheering on. Kim Lock mixes the transformative journey of Alice Hart with the quirkiness of Eleanor Oliphant in this story about embracing life, even when it threatens to overwhelm you' - Tricia Stringer, bestselling author of The Family Inheritance 'Mercy Blain is an unforgettable character who will capture your heart from the first pages and hold it through until the end. Her madcap journey towards forgiveness - of herself and others - is moving and funny and all other good things that will make you want to keep reading and make you sad when your time with Mercy comes to an end.' - Sophie Green, bestselling author of The Shelly Bay Ladies Swimming Circle

Despeckle Filtering Algorithms and Software for Ultrasound Imaging Christos Loizou, Constantinos Pattichis, 2008-06-27 It is well-known that speckle is a

multiplicative noise that degrades image quality and the visual evaluation in ultrasound imaging. This necessitates the need for robust despeckling techniques for both routine clinical practice and teleconsultation. The goal for this book is to introduce the theoretical background (equations), the algorithmic steps, and the MATLABM code for the following group of despeckle filters: linear filtering, nonlinear filtering, anisotropic diffusion filtering and wavelet filtering. The book proposes a comparative evaluation framework of these despeckle filters based on texture analysis, image quality evaluation metrics, and visual evaluation by medical experts, in the assessment of cardiovascular ultrasound images recorded from the carotid artery. The results of our work presented in this book, suggest that the linear local statistics filter DsFlsmv, gave the best performance, followed by the nonlinear geometric filter DsFgf4d, and the linear homogeneous mask area filter DsFlsmvsc. These filters improved the class separation between the asymptomatic and the symptomatic classes (of ultrasound images recorded from the carotid artery for the assessment of stroke) based on the statistics of the extracted texture features, gave only a marginal improvement in the classification success rate, and improved the visual assessment carried out by two medical experts. A despeckle filtering analysis and evaluation framework is proposed for selecting the most appropriate filter or filters for the images under investigation. These filters can be further developed and evaluated at a larger scale and in clinical practice in the automated image and video segmentation, texture analysis, and classification not only for medical ultrasound but for other modalities as well, such as synthetic aperture radar (SAR) images. Table of Contents: Introduction to Ultrasound Imaging / Despeckle Filtering Algorithms / Evaluation Methodology / Applications of Despeckle Filtering in Ultrasound Imaging / Comparison and Discussion of Despeckle Filtering Algorithms / Summary and Future Directions
