Buzz Off Hannah Reed,2010-09-07 After her mentor in the honey business is found suspiciously stung to death in his apiary, beekeeper Story Fischer must sort through a swarm of suspects, including her ex-husband.

Buzz Off!/Showtime! Lisa Papademetriou,2011 While Bonnie is out, her toys try to fix Buzz Lightyear, who has been knocked into Repeat mode, and put on a talent show, although Buzz has trouble finding an act that is right for him.

Off the Grid Phillip Vannini,Jonathan Taggart,2014-10-30 Off-grid isn't a state of mind. It isn't about someone being out of touch, about a place that is hard to get to, or about a weekend spent offline. Off-grid is the property of a building (generally a home but sometimes even a whole town) that is disconnected from the electricity and the natural gas grid. To live off-grid, therefore, means having to radically re-invent domestic life as we know it, and this is what this book is about: individuals and families who have chosen to live in that dramatically innovative, but also quite old, way of life. This ethnography explores the day-to-day lives of people in each of Canada's provinces and territories living off the grid. Vannini and Taggart demonstrate how a variety of people, all

with different environmental constraints, live away from contemporary civilization. The authors also raise important questions about our social future and whether off-grid living creates an environmentally and culturally sustainable lifestyle practice. These homes are experimental labs for our collective future, an intimate look into unusual contemporary domestic lives, and a call to the rest of us leading ordinary lives to examine what we take for granted. This book is ideal for courses on the environment and sustainability as well as introduction to sociology and introduction to cultural anthropology courses.

Sputnik and the Space Race Jordan Johnson, 2017-07-15 In the late 1950s, space became the new source of conflict for the United States and the Soviet Union. The world changed in 1957 when the Soviet Union launched Sputnik. The world's first satellite, Sputnik prompted advances in science and technology. Each side was determined to demonstrate technological acumen and military prowess through the ultimate space race. This book explores how technological power was used in the fight for political dominance.

Our Native Bees Paige Embry, 2018-02-07 A New York Times 2018 Holiday Gift Selection Honey bees get all the press, but the fascinating story of North America's native bees—an endangered species essential to our ecosystems and food supplies—is just as crucial. Through interviews with farmers, gardeners, scientists, and bee experts, *Our Native Bees* explores the importance of native bees and focuses on why they play a key role in gardening and agriculture. The people and stories are compelling: Paige Embry goes on a bee hunt with the world expert on the likely extinct Franklin's bumble bee, raises blue orchard bees in her refrigerator,

and learns about an organization that turns the out-of-play areas in golf courses into pollinator habitats. Our Native Bees is a fascinating, must-read for fans of natural history and science and anyone curious about bees.

Buzz Jeffrey Spivak,2011 The Great Depression was defined by poverty and despair, but visionary American filmmaker Busby Berkeley (1895-1976) managed to divert the public's attention away from the economic crash with some of the most iconic movies of all time. Known for his kaleidoscopic dance numbers featuring multitudes of performers in extravagant costumes, his musicals provided a brief respite for an audience whose reality was hard and bitter. Buzz: The Life and Art of Busby Berkeley is a revealing study of the director, drawing from interviews with his colleagues, newspaper and legal records, and Berkeley's own unpublished memoirs to uncover the life of a Hollywood legend renowned for his talent and creativity. Jeffrey Spivak examines how Berkeley's career evolved from creating musical numbers for other directors in films such as 42nd Street (1933) and Gold Diggers of 1933 (1933) to directing his own pictures, such as Strike up the Band (1940)

and *The Gang's All Here* (1943). Though Berkeley claimed he was no choreographer, his movies revitalized the public's waning interest in musical pictures. While other popular filmmakers advertised their works specifically as nonmusical, Berkeley embraced his niche, eventually becoming the premier dance director of his time. However, the happy face Berkeley presented publicly did not necessarily reflect his life. Offstage and away from the set, the director met with scandal, and his fondness for liquor and women was well known. In September 1935, he was involved in a car accident that left three people dead and four others severely injured. Accused of driving under the influence, he was put on trial for second-degree murder. The accident significantly changed the nature of his stardom.

Buzz Eileen Spinelli, 2010-07-06 Buzz loves absolutely everything there is about being a bee. She loves her yellow and black jacket. She loves the way the flowers smell in the springtime. But the thing she loves most of all is being able to fly. Through the trees and down around the pond, past the farm and around the rosebushes - she flies everywhere. But when she hears that bees aren't supposed to be able to fly, she finds herself unable to get off the ground. What is little Buzz to do? How will she find her wings

again?

In the Limelight Steve Eichner, Gabriel Sanchez, 2020-10-20

Dive into the 1990s New York club scene with never-before-seen photos by its most prolific photographer, Steve Eichner. Eichner was a fixture of 1990s New York City nightlife and served as both its official and unofficial photographer in an era before cellphones and selfies. In this book, readers go beyond the velvet ropes and into the spaces that witnessed some of the decade's most incredible and sought-after parties. Previously unpublished, these intoxicating full-color photographs capture the over-the-top costumes, non-stop dancing, glitter, confetti, sex, drugs, and music that made 90s New York unlike any other place. Celebrities abound, from Leonardo DiCaprio, Dennis Hopper, and Tupac to Joan Rivers, Michael Musto, and Donald Trump. Eichner takes you to many of the city's hot spots, including the Limelight, the Tunnel, Webster Hall, Club Expo, and Club USA. Texts by famous club owner Peter Gatien and BuzzFeed photo essay editor Gabriel H. Sanchez offer a historic and cultural perspective on an era when New York City was more affordable and every night saw artists, bankers, drag queens, musicians, and poets reveling together.

Vladimir Putin A Geostrategic Russian Icon A Eurasian Continent A Russian Superpower A Charismatic World Leader
Goran B. Johansson, 2019-06-06 This is the third book in the series about Vladimir Putin which describes in detail the last two years in Russia's ongoing strategy to work with China within the BRICS and the SCO, to deprive the United States its global leading role in the ongoing process of creating a multipolar world with multiple centers of power. The text is based on various international sources, with touches of the author's own analysis and the reader gets an entirely different and more nuanced picture of the dramatic situation in the world than the established media conveys. We get to follow all the way from the drama with Boeing MH17 over Ukraine in 2014, the Islamic State, Russian, Chinese and American military development, and the crisis in the South China Sea, Sweden and finally the dramatic developments in the United States in connection with presidential elections. This part is

also included in the trilogy published in Lulu.

Reaching for the Moon Buzz Aldrin, 2005-05-24 I walked on the moon. This is my journey. But it didn't begin when I stepped on board Apollo 11 on July 1, 1969. It began the day I was born. Becoming an astronaut took more than education, discipline, and physical strength. It took years of determination and believing that any goal is possible—from riding a bike alone across the George Washington Bridge at age ten to making a footprint on the Moon. I always knew the Moon was within my reach—and that I was ready to be on the team that would achieve the first landing. But it was still hard to believe when I took my first step onto the Moon's surface. We all have our own dreams. This is the story of how mine came true.
