Hong Kong: The City of Dreams Nury Vittachi, 2013-01-08 This stunning Hong Kong travel pictorial captures the architecture, culture, people, and cuisine of one of the most dynamic cities. You can leave Hong Kong, but it will never leave you. The experience of encountering an unforgettable mix of influences, cultures, and flavors stays with visitors. It's a place of clashing contrasts, Hong Kong is famous as the place where East most dramatically meets West, but that's just the start of it. It is also where the future meets the past — just check out the way the sci-fi infrastructure rubs shoulders with ancient temples. It's also the capital of capitalism, yet is part of the world's last great socialist empires. It's also one of the younger places on earth, yet a piece of the world's oldest civilizations. It's a rational, financial town—but feng shui and ancient magic are never far away. While many books focus on aspects of Hong Kong, such as the view from the air or the glories of the islands, this book gives you the whole breathtaking package.

Taiwan in Troubled Times John F Copper, 2002-04-22 Taiwan in

Troubled Times is concerned with Taiwan's politics and its relations with China following the election of Chen Shui-bian as President in March 2000. This event created problems between Taiwan and China and led to political gridlock in Taiwan. The Chen Administration is evaluated in this book. So is President Chen's party, which evolved as an opposition party and is now in power but is unaccustomed to the role. Contents: Introduction (J F Copper) Taiwan in Gridlock (J F Copper) Whither Cross-Strait Relations (L-J Sheng) The Democratic Progressive Party's Factional Politics (C-M Chao) Dynamic Stability in Beijing-Taipei Relations (G W Tsai) Taiwan's December 2001 Election (J F Copper) Appendices: China's White Paper on Taiwan Zhu Rongji's Statement Before Taiwan Election Chen Shui-bian's Victory Speech Chen Shui-bian's Inauguration Address President Chen's National Day Address, 2000 President's New Year's Eve Address President's New Year's Address President's First Anniversary Speech Economic Conference Closing Address Resolutions of Economic Conference President's National Day Address, 2001 President's Comments on the APEC Conference Readership: Academics, graduate students and undergraduates with an interest in Taiwan and Taiwan-China. The Botany of Empire in the Long Eighteenth Century

Yota Batsaki, Sarah Burke Cahalan, Anatole Tchikine, 2016 The Botany of Empire in the Long Eighteenth Century brings together international scholars to examine: the figure of the botanical explorer; links between imperial ambition and the impulse to survey, map, and collect specimens in new territories; and relationships among botanical knowledge, self-representation, and

material culture.

Michael Dweck: Habana Libre Michael Dweck, 2011 Habana Libre is a stunning contemporary exploration of the privileged class in a classless society: a secret life within Cuba. Michael Dweck's photographs are exhilarating, sensual and provocative, with a sexy and hypnotic visual rhythm. This is a face of Cuba never before photographed, never reported in Western media and never acknowledged openly within Cuba itself. It is a socially connected world of glamorous models and keenly observant artists, filmmakers, musicians and writers captured in an elaborate dance of survival and success. Here too are surprising interviews with sons of Fidel Castro and Che Guevara as well as many others who define the creative culture of Cuba and give it texture and substance. Habana Libre is not a media-fabricated Cuban postcard of crumbling mansions or old American cars, but a revealing and contemporary work by a visual artist adept at capturing the quiet gesture, the sensuous eye and the proud and provocative pose of that most romantic of contradictions: Cuba. The photographs of Michael Dweck (born 1957) were first exhibited at Sotheby's, New York, in 2003, in the auction house's first solo exhibition for a living photographer. Dweck's first major photographic work, *The End: Montauk, N.Y.*, published in 2004, blended documentary and staged photography to produce a compelling portrait of a beach community that exists as much in the realm of memory and desire as in the real world. His acclaimed 2008 volume *Mermaids* explored the female nude refracted in water. Dweck's work has become part of important international art collections and has been shown in major solo gallery exhibitions around the world.

Guidelines on Hepatitis B and C Testing World Health Organization, 2017 Testing and diagnosis of hepatitis B (HBV) and C (HCV) infection is the gateway for access to both prevention and treatment services, and is a crucial component of an effective response to the hepatitis epidemic. Early identification of persons with chronic HBV or HCV infection enables them to receive the

necessary care and treatment to prevent or delay progression of liver disease. Testing also provides an opportunity to link people to interventions to reduce transmission, through counselling on risk behaviors and provision of prevention commodities (such as sterile needles and syringes) and hepatitis B vaccination. These are the first WHO guidelines on testing for chronic HBV and HCV infection and complement published guidance by WHO on the prevention, care and treatment of chronic hepatitis C and hepatitis B infection. These guidelines outline the public health approach to strengthening and expanding current testing practices for HBV and HCV, and are intended for use across age groups and populations.

Needle Painting Embroidery Trish Burr, 2011 As a self-taught embroiderer, Burr understands the need for clarity. The embroideries are divided into three levels, each designed to take you onto the next stage of needle painting. The projects feature traditional flowers, and two small, colorful and delightful South African birds.

The Van Allen Probes Mission Nicola Fox, James L. Burch, 2014-01-10 Documents the science, the mission, the spacecraft and the instrumentation on a unique NASA mission to study the Earth's dynamic, dangerous and fascinating Van Allen radiation belts that surround the planet. This collection of articles provides broad and detailed information about NASA's Van Allen Probes (formerly known as the Radiation Belt Storm Probes) twin-spacecraft Earth-orbiting mission. The mission has the objective of achieving predictive understanding of the dynamic, intense, energetic, dangerous, and presently unpredictable belts of energetic particles that are magnetically trapped in Earth's space environment above the atmosphere. It documents the science of the radiation belts and the societal benefits of achieving predictive understanding. Detailed information is provided about the Van Allen Probes mission design, the spacecraft, the science investigations, and the onboard instrumentation that must all work together to make unprecedented measurements within a most

unforgiving environment, the core of Earth's most intense radiation regions. This volume is aimed at graduate students and researchers active in space science, solar-terrestrial interactions and studies of the upper atmosphere. Originally published in Space Science Reviews, Vol. 179/1-4, 2013.

From Lascaux to Brooklyn Paul Rand, 2017-11-03 Illustrating his ideas with examples of his own stunning graphic work, as well as an eclectic collection of masterpieces, Rand discusses such topics as: the relation between art and business: the presentation of design ideas and sketches to prospective clients: the debate over typographic style; and the aesthetics of combinatorial geometry as applied to the grid. His book will engage and enlighten anyone interested in the practice or theory of graphic design.

The Method of Volume Averaging S. Whitaker, 2013-03-09 Multiphase systems dominate nearly every area of science and technology, and the method of volume averaging provides a rigorous foundation for the analysis of these systems. The development is based on classical continuum physics, and it provides both the spatially smoothed equations and a method of predicting the effective transport coefficients that appear in those equations. The text is based on a ten-week graduate course that has been taught for more than 20 years at the University of California at Davis and at other universities around the world. Problems dealing with both the theoretical foundations and the applications are included with each chapter, and detailed solutions for all problems are available from the author. The course has attracted participants from chemical engineering, mechanical engineering, civil engineering, hydrologic science, mathematics, chemistry and physics.

Inside Russian Politics Edwin Bacon, 2017-09-26 Inside Russian Politics is an intelligent, critical and engaging account of the realities of contemporary Russian politics. It is distinctive in widening our view of Russia beyond the standard account of global power plays and resurgent authoritarian menace. Putin matters, but he is not Russia. Russian military adventurism has had a major effect on contemporary international affairs, but assessing its aims and projecting future intentions and impacts requires analysis within a context deeper than the stock 'Cold War renewed' story. The holistic approach of this book facilitates our understanding of power politics in and beyond the Kremlin and of Russian policy on the international stage. Revealing the Russia beyond Moscow and the central figures around Putin, Edwin Bacon focuses on Russia's political present, not to ignore the past but to move beyond cliché and misleading historical analogy to reveal the contemporary – and future – concerns of Russia's current generation of politicians.

Curating Research Data Lisa R. Johnston, 2016-11-01 Data are becoming the proverbial coin of the digital realm: a research commodity that might purchase reputation credit in a disciplinary culture of data sharing, or buy transparency when faced with funding agency mandates or publisher scrutiny. Unlike most monetary systems, however, digital data can flow in all too great an abundance. Not only does this currency actually grow on trees, but it comes from animals, books, thoughts, and each of us! And that is what makes data curation so essential. The abundance of digital research data challenges library and information science professionals to harness this flow of information streaming from research discovery and scholarly pursuit and preserve the unique evidence for future use. Volume One of Curating Research Data explores the variety of reasons, motivations, and drivers for why data curation services are needed in the context of academic and

disciplinary data repository efforts. Twelve chapters, divided into three parts, take an in-depth look at the complex practice of data curation as it emerges around us. Part I sets the stage for data curation by describing current policies, data sharing cultures, and collaborative efforts currently underway that impact potential services. Part II brings several key issues, such as cost recovery and marketing strategy, into focus for practitioners when considering how to put data curation services in action. Finally, Part III describes the full lifecycle of data by examining the ethical and practical reuse issues that data curation practitioners must consider as we strive to prepare data for the future. Digital data is ubiquitous and rapidly reshaping how scholarship progresses now and into the future. The information expertise of librarians can help ensure the resiliency of digital data, and the information it represents, by addressing how the meaning, integrity, and provenance of digital data generated by researchers today will be captured and conveyed to future researchers.
