Structured Chaos Victor Saunders, 2021-03-04 'Mountains have given structure to my adult life. I suppose they have also given me purpose, though I still can't guess what that purpose might be. And although I have glimpsed the view from the mountaintop and I still have some memory of what direction life is meant to be going in, I usually lose sight of the wood for the trees. In other words, I, like most of us, have lived a life of structured chaos.' Structured Chaos is Victor Saunders' follow-up to Elusive Summits (winner of the Boardman Tasker Prize in 1990), No Place to Fall and Himalaya: The Tribulations of Vic & Mick. He reflects on his early childhood in Malaya and his first experiences of climbing as a student, and describes his progression from scaling canal-side walls in Camden to expeditions in the Himalaya and Karakoram. Following climbs on K2 and Nanga Parbat, he leaves his career as an architect and moves to Chamonix to become a mountain guide. He later makes the first ascent of Chamshen in the Saser Kangri massif, and reunites with old friend Mick Fowler to climb the north face of Sersank. This is not just a tale of mountaineering triumphs, but also an account of rescues, tragedies and failures. Telling his story with humour and warmth, Saunders spans the decades from youthful awkwardness to concerns about age-related forgetfulness, ranging from 'Where did I put my keys?' to 'Is this the right mountain?' Structured Chaos is a testament to the value of friendship and the things that really matter in life: being in the right place at the right time with the right people, and making the most of the view.

The Geology of Somalia R. Lee Hadden, Topographic Engineering Center, U. S. Army Corps of Engineers, 2011-01-01 This bibliography on the geographical, water and geological information of Somalia was begun to fill a request for current information on that war torn state. This bibliography brings together selected citations from a variety of different cartographic, geographical, geological and hydrological resources and a number of specialized library collections. Most of the citations have location information on where these items can be located and either used onsite, or borrowed through inter-library loan, or where copies of the items can be purchased from the originating source, or through commercial document delivery services.

The Experience of Pain Carlo Emilio Gadda, 2017-10-26 'The seething cauldron of life, the infinite stratification of reality, the inextricable tangle of knowledge are what Gadda wants to depict' Italo Calvino At the height of Fascist rule in Italy and following the death of his mother, Carlo Emilio Gadda began work on his first novel, The Experience of Pain. This portrait of a highly educated young man whose anger and frustration frequently erupt in ferocious outbursts directed towards his ageing mother is a powerful critique of the society of his time and the deep wounds inflicted on his generation. Set in a fictional South American country, The Experience of Pain is at once richly imaginative and intensely personal: the perfect introduction to Gadda's innovative style and literary virtuosity. Translated by Richard Dixon

Men and Bears AA.VV., 2020-01-23 The time of Carnival represents a "wild" time at the end of winter and pointing to the beginning of a new season. It is characterized by the irruption of border figures, animal masks, characters which recall the world of the dead and which bring within themselves the germ of a vital force, of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops. This wild domain shows itself under the shapes of a contiguity between human and animal: the costumes, the masks, refer to a world in which the characteristics of the human and those of the animal are fused and intertwined. Among these figures, in particular, emerge those of the Wild Man, the human being who takes on animal-like attributes and aspects, and of the Bear, the animal that, more than all the others, gets as close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts, such as the Sámi of Finland or North-American hunter-gatherers, and represents a boundary between the world of nature and the human world, between the domain of animals and the difficult construction of humanity: a process continued for centuries, perhaps millennia, and which cannot still be said complete.

Writing about Lives in Science Zelda Alice Franceschi, Paola Govoni, 2014 Following discussions on scientific biography carried out over the past few decades, this book proposes a kaleidoscopic survey of the uses of biography as a tool to understand science and its context. The authors belong to a variety of academic and professional fields, including the history of science, anthropology, literary studies, and science journalism. The period covered spans from 1732, when Laura Bassi was the first woman to get a tenured professorship of physics, to 2009, when Elizabeth H. Blackburn and Carol W. Greider were the first women's team to have won a Nobel Prize in science.

Vegetation history B. Huntley, T. Webb III, 2012-12-06 The analysis of vegetation history is one of the prime objectives for vegetation scientists. In order to understand the recent composition of local floras and plant communities a second knowledge of species composition during recent millenia is essential. With the present concern over climate changes, due to human activities, an understanding of past vegetation distribution becomes even more important, since the correlation between climate and vegetation can often be used to predict possible impacts to crops and forests. I was very fortunate to receive the help of Drs. Webb and Huntley to compile this volume on vegetation history. They have collated an impressive set of papers which together give an account of the vegetation history of most of the continents during the late-Tertiary and Quaternary periods. There are, however, gaps in the coverage achieved, most notably Africa, and Asia apart from Japan. The information in this book will nonetheless certainly be used widely by vegetation scientists for the regions covered in the book and much of it has relevance to the areas not explicitly described. The authors of the individual chapters have done their best to cover recent topics of interest as well as established facts. It is intended that a separate volume will be produced in the near future covering the vegetation history of Africa and Asia. I thank the editors of It fits well into this volume for their commendable achievement.

Switzerland's Jura Crest Trail Ali Rowsell, 2019-01-16 This guide presents Switzerland's Jura Crest Trail or Crêtes du Jura (also known as the Jura High Route and Swiss national route 5. This 310km long-distance route

traverses the sub-alpine mountains of the Swiss Jura from Dielsdorf near Zurich to Nyon on the shores of Lac Léman (Lake Geneva), running roughly parallel to the Swiss-French border. With over 13,500m of ascent, the trail demands a moderate level of fitness and can be comfortably completed in around a fortnight. The Jura Crest Trail is easily accessed from Zurich and Geneva. The region boasts excellent walking infrastructure and facilities, and although the trail crosses the mountains, you are seldom too far from civilisation. The guide contains all the information you need to plan and walk the route. You'll find advice on transport and comprehensive details of accommodation and refreshments. The trek itself is presented from east to west in 14 stages of 12-32km, with step-by-step route description accompanied by clear mapping and notes on local points of interest. The Jura Crest Trail boasts far-reaching views of the Bernese Oberland, the Haute Savoie and the Rhine and Rhone Valleys, and is rich in geological, natural and historical interest. Passing through woodland and alpine meadows and crossing rolling limestone plateaux, highlights include the spectacular amphitheatre of the Creux du Van, the medieval towns of Baden and Brugg, and Lac de Joux, the largest lake in the Jura mountains.

Prehistoric Textiles E. J.W. Barber, 1991 This monograph attempts to revise present ideas of the origins and early development of textiles in Europe and the Near East. Using linguistic techniques as well as methods from palaeobiology, it demonstrates that spinning and pattern-weaving existed far earlier than has been supposed.

Textiles and Textile Production in Europe from Prehistory to AD 400 Margarita Gleba, Ulla Mannerling, 2019-10-05 There is evidence that ever since early prehistory, textiles have always had more than simply a utilitarian function. Textiles express who we are - our gender, age, family affiliation, occupation, religion, ethnicity and social, political, economic and legal status. Besides expressing our identity, textiles protect us from the harsh conditions of the environment, whether as clothes or shelter. We use them at birth for swaddling, in illness as bandages and at death as shrouds. We use them to carry and contain people and things. We use them for subsistence to catch fish and animals and for transport as sails. In fact, textiles represent one of the earliest human craft technologies and they have always been a fundamental part of subsistence, economy and exchange. Textiles have an enormous potential in archaeological research to inform us of social, chronological and cultural aspects of ancient societies. In archaeology, the study of textiles is often relegated to the marginalized zone of specialist and specialized subject and lack of dialogue between textile researchers and scholars in other fields means that as a resource, textiles are not used to their full potential or integrated into the overall interpretation of a particular site or broader aspects of human activity. Textiles and Textile Production in Europe is a major new survey that aims to redress this. Twenty-three chapters collect and systematize essential information on textiles and textile production from sixteen European countries, resulting in an up-to-date and detailed sourcebook and an easily accessible overview of the development of European textile technology and economy from prehistory to AD 400. All chapters have an introduction, give the chronological and cultural background and an overview of the material in question organized chronologically and thematically. The sources of information used by the authors are primarily textiles and textile tools recovered from archaeological contexts. In addition, other evidence for the study of ancient textile production, ranging from iconography to written sources to palaeobotanical and archaeozoological remains are included. The introduction gives a summary on textile preservation, analytical techniques and production sequence that provides a background for the terminology and issues discussed in the various chapters. Extensively illustrated, with over 200 color illustrations, maps, chronologies and index, this will be an essential sourcebook not just for textile researchers but also the wider archaeological community.

Trekking the Giants' Trail: Alta Via 1 through the Italian Pennine Alps Andy Hedges, 2021-02-22 Italy's Alta Via 1, a 180km trail through the Italian Alps following the northern flank of the Aosta Valley, boasts magnificent views of the Alpine giants: Mont Blanc, the Matterhorn, the Grand Combin and Monte Rosa. Indeed, it is sometimes known as the Giants' Trail and can be combined with a sister-route, the Alta Via 2 (covered in a separate Cicerone guide), which runs along the southern flank of the valley, to form the Tor des Géants. Stretching from Donnas to Courmayeur, the Alta Via 1 offers fantastic alpine walking, with welcoming refuges and small hotels providing overnight accommodation (and great food) along the way. The guide presents the route in two sections, for the advantage of those who can't spare the full fortnight-plus needed to walk the entire AV1. The trail is described in 16 stages, with alternative stages covering some popular variants, including an optional detour to visit the famed monastery at the Great St Bernard Pass. Each stage includes clear route description and mapping, plus notes on local points of interest and accommodation options. An alternative itinerary, list of useful contacts, kitlist and glossary can be found in the appendices. The AV1 crosses cols of nearly 3000m as it traverses the side-valleys of the main Aosta Valley. Suited to those with some of experience of alpine trekking, the walking is demanding but without technical difficulty. And the rewards are many: quieter huts, breathtaking vistas and a chance to immerse yourself in fabulous mountain landscapes overlooked by soaring, snow-clad giants.

Tropic of Venice Margaret Doody, 2007-02 In this journey through the work of artists and the writings of travelers who have been both smitten and repelled by the influence of Venice, Margaret Doody explores ways in which this is a city profoundly unlike any other on earth—and one that simultaneously unsettles and reveals many of our most deeply rooted cultural values.

Walking in the Dolomites Gillian Price, 2017-01-20 This guidebook describes 25 hut-to-hut treks in the Dolomites of northern Italy, covering 15 regions including Cortina, Sella, Sesto, Marmolada and Latemar. Ranging from 11.3km to 40.8km and from two to four days, the graded routes are suitable for walkers with a reasonable level of fitness and experience of mountain terrain, and some feature exposed sections which demand a good head for heights. This edition includes a number of treks in less frequently visited rugged districts, as well as the more popular trips, all of which take advantage of the region's network of mountain refuges and efficient public transport system, with the majority of routes accessible by public bus. Detailed route description is presented alongside mapping and stunning colour photography and the guide also suggests alternative access and exit routes, and options for linking routes to create a longer trek. There is plenty of advice to help make the most of a trip as well as background information on the region's geology, plants and wildlife and local cuisine. The Dolomites - a UNESCO World Heritage Site - are characterised by striking volcanic and sedimentary rock formations. Walking is an ideal way to discover this breathtaking landscape of angular peaks, towering pinnacles and jagged ridges, and the carefully chosen routes in this guide will exhilarate, challenge and inspire.

Alpine Flowers Gillian Price, 2014-02-27 This pocket field guide to identifying 230 common Alpine flowers is packed with all the information you need to recognise your favourites while out in the mountains. Designed for the

non-specialist, this little handbook is arranged by colour and also includes a glossary of flower parts and an introduction which describes the amazing lengths that these tiny gems go to to survive at altitude. Alpine expert author Gillian Price says: 'It never ceases to amaze me that such tiny plants can spend months on end buried under metres of snow and ice - weathering temperatures as low as minus 25°C - then sprout back to life when things thaw out and warm up. In springtime you can spot the fragile purple petals of the Alpine Snowbell pushing their way through snow - they contain an anti-freeze that enables them to melt it. Masters of adaptation and survival, alpine flowers can trap insects, store precious water, expel excess minerals and fool insects.' Each flower entry includes a clear photograph and essential description along with its name in English, Latin, German, French and Italian and interesting information about the origins of some of the more curious flower names. Each one is also indexed by its English and its Latin name so you can follow up a hunch about a name or find out more about a flower.
