**Televised Presidential Debates in a Changing Media Environment** Edward A. Hinck,2018-11-26 This two-volume set examines recent presidential and vice presidential debates, addresses how citizens make sense of these events in new media, and considers whether the evolution of these forms of consumption is healthy for future presidential campaigns—and for democracy. The presidential debates of 2016 underscored how television highlights candidates' and campaigns' messages, which provide fodder for citizens' widespread use of new media to talk back to campaigns and other citizens. Social media will continue to affect the way that campaign events like presidential debates are consumed by audiences and how they shape campaign outcomes. This two-volume study is one of the first to examine the relationship between debates as televised events and events consumed by citizens through social media. It also assesses the town hall debate format from 1992 to 2016, uses the lens of civil dialogue to consider how citizens watch the debates, and considers the growing impact of new media commentary on candidate images that emerge in presidential and vice presidential debates. Televised Presidential Debates in a Changing Media Environment features contributions from leading political communication scholars that illuminate how presidential debates are transforming from events that are privately contemplated by citizens, to events that are increasingly viewed and discussed by citizens through social media. The first volume focuses on traditional studies of debates as televised campaign events, and the second volume examines the changing audiences for debates as they become consumed and discussed by viewers outside the traditional channels of newspapers, cable news channels, and campaign messaging. Readers will contemplate questions of new forms, problems, and possibilities of political engagement that are resulting from citizens producing and consuming political messages in new media.

**Molecules That Amaze Us** Paul May,Simon Cotton,2014-10-23 This new book is by two knowledgeable and expert popularizers of chemistry and deals exclusively with molecules and compounds rather than with the simpler atoms and elements. It is based on the very successful 'Molecule of the Month' website that was begun by Paul May fifteen years ago and to which his co-author Simon Cotton has been a frequent contributor. ... The authors ... strike an excellent balance between introducing the novice to the world of molecules while also keeping the expert chemist interested. ... I highly recommend this book to all readers. It will vastly expand your knowledge and horizons of chemistry and the human ingenuity that surrounds it. —From the Foreword by Dr. Eric Scerri, UCLA, Los Angeles, website: [www.ericscerri.com](http://www.ericscerri.com), Author of 'The Periodic Table, Its Story and Its Significance' and several other books on the elements and the periodic table. The world is composed of molecules. Some are synthetic while many others are products of nature. Molecules That Amaze Us presents the stories behind many of the most famous and infamous molecules that make up our modern world. Examples include the molecule responsible for the spicy heat in chilies (capsaicin), the world's first synthetic painkiller (aspirin), the pigment responsible for the color of autumn leaves (carotene), the explosive in dynamite (nitroglycerine), the antimalarial drug (quinine), the drug known as speed (methamphetamine), and many others. Other molecules discussed include caffeine, adrenaline, cholesterol, cocaine, digitalis, dopamine, glucose, insulin, methane, nicotine, oxytocin, penicillin, carbon dioxide, limonene, and testosterone. In all, the book includes 67 sections, each describing a different molecule, what it does, how it is made, and why it is so interesting. Written by experts in the field, the book is accessible and easy to read. It includes amusing anecdotes, historical curiosities, and entertaining facts about each molecule, thereby balancing educational content with entertainment. The book is heavily illustrated with relevant photographs, images, and cartoons—the aim being both to educate and entertain.

He suspects his stepmother is glad to see him go, but his dad says he’s one of the lucky ones—one of ninety boys and girls to ship out aboard the SS City of Benares to safety in Canada. Life aboard the luxury ship is grand—nine-course meals, new friends, and a life far from the bombs, rations, and his stepmum’s glare. And after five days at sea, the ship’s officers announce that they’re out of danger. They’re wrong. Late that night, an explosion hurls Ken from his bunk. They’ve been hit. Torpedoed! The Benares is sinking fast. Terrified, Ken scrambles aboard Lifeboat 12 with five other boys. Will they get away? Will they survive? Award-winning author Susan Hood brings this little-known World War II story to life in a riveting novel of courage, hope, and compassion. Based on true events and real people, Lifeboat 12 is about believing in one another, knowing that only by banding together will we have any chance to survive.
