Emerging Sports as Social Movements Joshua Woods, 2021-07-28 This volume examines the rise of an emerging sport as a grassroots effort (or “new social movement”), arguing that the growth of non-normative sports movements occurs through two social processes: one driven primarily by product development, commercialization, and consumption, and another that relies upon public resources and grassroots efforts. Through the lens of disc golf, informed by the author’s experience both playing and researching the sport, Joshua Woods here explores how non-normative sports development depends on the consistency of insider culture and ideology, as well as on how the movement navigates a broad field of market competition, government regulation, community characteristics, public opinion, traditional media, social media and technological change. Throughout, the author probes why some sports grow faster than others, examining cultural tendencies toward sport, individual choices to participate, and the various institutional forces at play.

3D Laser Scanning for Heritage Clive Boardman, Paul Bryan, 2018 The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.

Where Is My Flying Car? J. Storrs Hall, 2021-11-30 From an engineer and futurist, an impassioned account of technological stagnation since the 1970s and an imaginative blueprint for a richer, more abundant future The science fiction of the 1960s promised us a future remade by technological innovation: we'd vacation in geodesic domes on Mars, have meaningful conversations with computers, and drop our children off at school in flying cars. Fast-forward 60 years, and we're still stuck in traffic in gas-guzzling sedans and boarding the same types of planes we flew in over half a century ago. What happened to the future we were promised? In *Where Is My Flying Car?*, J. Storrs Hall sets out to answer this deceptively simple question. What starts as an examination of the technical limitations of building flying cars evolves into an investigation of the scientific, technological, and social roots of the economic stagnation that started in the 1970s. From the failure to adopt nuclear energy and the suppression of cold fusion technology to the rise of a counterculture hostile to progress, Hall recounts how our collective ambitions for the future were derailed, with devastating consequences for global wealth creation and distribution. Hall then outlines a framework for a future powered by exponential progress—one in which we build as much in the world of atoms as we do in the world of bits, one rich in abundance and wonder. Drawing on years of original research and personal engineering experience, *Where Is My Flying Car?*, originally published in 2018, is an urgent, timely analysis of technological progress over the last 50 years and a bold vision for a better future.

Identified Flying Objects Dr. Michael P. Masters,2019-03-22 Could "UFOs" and "Aliens" simply be us, but from the future? This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants, using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past. Dr. Michael P. Masters, a professor of biological anthropology specializing in human evolutionary anatomy, archaeology, and biomedicine, explores how the persistence of long-term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc-shaped craft, which are likely the very devices that allow our future progeny to venture backward across the landscape of time. Moreover, these extraterrestrials are ubiquitously described as bipedal, large-brained, hairless, human-like beings, who communicate with us in our own languages, and who possess technology advanced beyond, but clearly built upon, our own. These accounts, coupled with a thorough understanding of the past and modern human condition, point to the continuation of established biological and cultural trends here on Earth, long into the distant human future.

Flying Saucers Over America Gordon Arnold,2021-12-03 On June 24th, 1947, a private pilot reported numerous dazzling objects rushing through the sky above Mount Rainier in Washington state. It was the start of the current UFO phenomena, one of the country's most perplexing and persistent mysteries. Within a few weeks, hundreds of sightings of flying saucers were reported to news media. Surprising reports of a UFO crash in Roswell, New Mexico further added to the mystery that July. Since then, UFOs have sparked a slew of incredible claims and speculations. This is a sober and honest history of America's first major saucer craze, based on many sources including previously classified government records. The book cuts through decades of mystique and confusion, beginning with the 1947 UFO wave and ending with the launch of Project Blue Book in 1952. Balanced and comprehensive, this history provides background, social context and other tools for reframing perceptions of a controversial subject.

Flying Saucers C. G. Jung,2020-05-05 In the threatening situation of the world today, when people are beginning to see that everything is at stake, the projection-creating fantasy soars beyond the realm of earthly

organizations and powers into the heavens, into interstellar space, where the rulers of human fate, the gods, once had their abode in the planets.... Even people who would never have thought that a religious problem could be a serious matter that concerned them personally are beginning to ask themselves fundamental questions. Under these circumstances it would not be at all surprising if those sections of the community who ask themselves nothing were visited by 'visions,' by a widespread myth seriously believed in by some and rejected as absurd by others.--C. G. Jung, in *Flying Saucers* ? Jung's primary concern in *Flying Saucers* is not with the reality or unreality of UFOs but with their psychic aspect. Rather than speculate about their possible nature and extraterrestrial origin as alleged spacecraft, he asks what it may signify that these phenomena, whether real or imagined, are seen in such numbers just at a time when humankind is menaced as never before in history. The UFOs represent, in Jung's phrase, a modern myth.

Fading Ads of Cincinnati Ronny Salerno, 2015 Hidden down alleyways, on street corners or on the bricks above the cityscape, Cincinnati's fading advertisements hide in plain sight. These ghost signs still tout their wares and services, remnants of a bygone era. Each sign has a vivid story behind it unique to its era, product and craftsmanship. Wall dogs like sign artist Gus Holthaus left their marks on the city. A sign for the Beehive, the club and restaurant at the top of the arena, reminds residents of Cincinnati's pro hockey team, the Stingers. Not many can remember the Other Place, but a hand-painted advertisement still adorns a city wall. Join author and photographer Ronny Salerno for a tour of Cincinnati's vanishing signs and their intriguing history.

Pigaroons Arthur Geisert, 2004 Descended from Spanish pirates, the Pigaroons, like their pilfering ancestors before them, stole stuff. One night they steal a crystal-clear block of ice from their neighbors the River Patrollers, who had intended to carve it for entry in the annual ice festival sculpture contest. When the River Patrollers awake to discover the Pigaroons have taken their block of ice, they decide that enough is enough, and they set about devising a plan . . . Arthur Geisert's etchings will delight readers with their beautiful colors and intricate details in this celebration of another triumph for creative ingenuity.

UFOs, ETs, and Alien Abductions Donderi PhD, Don Crosbie, 2013-06-01 Psychologist and researcher Don Donderi examines the evidence and research from the past several decades on the changing nature of UFOs. He looks at why the scientific establishment takes a dim view of UFOs and abduction evidence and examines how the US government has collected and suppressed UFO evidence. *UFOs, ETs, and Alien Abductions* is a wide-ranging examination of all things off-planet that falls into 3 sections. 1. UFOs: evidence and belief between 1947 through 1965 and Cold War mysteries 2. The changing nature of UFO phenomenon from 1965 to the present, which makes the case for the existence of humanoid crew members seen in and around landed UFOs. This section also examines six well-documented abduction cases, and includes the author detailing his own research involvement with the evidence. He refutes the belief that all abductees are mentally disturbed and that a psychological disturbance explains the experience. 3. The third section is devoted to a very meaty and controversial analysis of science, politics, and UFOs.

I Live Inside Michelle Leon, 2016-03-15 Babes in Toyland burst onto the Minneapolis music scene in the late 1980s and quickly established itself at the forefront of punk/alternative rock. The all-female trio featured a shy, seventeen-year-old Jewish teen from the suburbs on bass guitar—an instrument she had never played before joining the band. Over the next few years, Michelle Leon lived the rock-and-roll lifestyle—playing live concerts, recording in studios, touring across the United States and Europe, and spending endless hours in stuffy vans, staying in two-star motels, and sleeping on strangers' couches in town after town. The grind and drama of life in the band gradually wore on Leon, however, and a heartbreaking tragedy led her to rethink her commitment to the band and the music scene. Leon's sensitive, sensory prose puts readers right on stage with Babes in Toyland while also conveying the uncertainty, vulnerability, and courage needed by a girl who never felt like she fit in to somehow find her place in the world. "A crucial and compelling account of what it was to be a woman making music in the nineties. . . . Fantastic and ferocious."—Jessica Hopper, music and culture critic and author of *The First Collection of Criticism by a Living Female Rock Critic* "Profound, poetic, badass, tender, and inspiring."—Will Hermes, author of *Love Goes to Buildings on Fire* "I Live Inside feels as real and personal as reading your own memories. . . . Parts read like a fairy tale while others are so haunting they will never leave you."—Kelli Mayo, musician (Skating Polly) "Leon draws you right into the Babes in Toyland van, shows you the after party tensions and what is in the mind of this particular girl in a band."—Darcey Steinke, author of *Sister Golden Hair: A Novel* and others "[Leon's] prose is stunning, her eye is wry, and her heart enormous; the result is a compelling memoir filled with pop culture, travel, intrigue, and a young artist's quest to find her voice."—Laurie Lindeen, musician (Zuzu's Petals) and author of *Petal Pusher: A Rock and Roll Cinderella Story* "By the end of this lyrical, tough, and moving memoir, you'll not only feel like you know Michelle Leon, you'll also want to talk and dance and listen to music with her."—Scott Heim, author of *Mysterious Skin* and *We Disappear* "A vivid, poetic memoir."—Mark Yarm,
