Non-Discrimination and the Role of Regulatory Purpose in International Trade and Investment Law Andrew D.

Mitchell, David Heaton, Caroline Henckels, 2016-12-30 Central to this book is an analysis of the obligation upon states to ensure non-discrimination in the form of adherence to the principles of national treatment and most-favoured nation treatment. These are critical principles for both international trade law and international investment law, yet the case-law in both fields reveals significant inconsistencies regarding key elements of non-discrimination. Tribunals have invoked 'regulatory purpose' to assist in identifying relevant discrimination, but have done so without offering a definition of regulatory purpose and in significantly differing ways. This book explains these inconsistencies and offers a new definition of regulatory purpose.

Labour Standards in International Economic Law

Henner Gött, 2018-02-21 The book offers a comprehensive perspective on the highly topical issue of protecting and promoting labour standards in international economic law and the globalized economy. For the purpose of an in-depth analysis of both the specific and the fundamental aspects in this regard, it combines views from specialized academics of the legal and political sciences as well as experienced practitioners. The contributions to this book do not only reveal recurring obstacles but also point at best practices and potential for synergies, providing important guidance for future research and practice in international economic and labour law and policy.

Guide to the WTO and GATT Autar Krishen

Koul, 2018-11-19 This book analyzes how today's system of international trade law and international economic relations has

evolved over the last six decades. Focusing on the major innovations that came with the inception of the World Trade Organization (WTO) with its various agreements in 1994, it also provides in-depth commentary on the intense debate over important matters that remain unsettled. Topics covered include the WTO dispute settlement mechanism; the General Agreement on Trade in Services (OATS); the Agreement on Trade-Related Investment Measures (TRIMS); intellectual property rights – the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS); areas still covered by the General Agreement on Tariffs and Trade (GATT) 1947; the Most Favoured Nation (MFN) concept; special provisions relating to agriculture and textiles; sanitary and phytosanitary measures; technical barriers to trade; pre-shipment inspection; and import licensing procedures. The book would be an excellent resource for scholars as well as practitioners working in the field of international arbitration and trade laws.

The Role of the EU in the Promotion of Human Rights and International Labour Standards in Its External Trade Relations
Samantha Velluti, 2020-10-12 This book represents a significant and timely contribution to the copious literature of the EU as a global actor providing new insights and fresh perspectives into the promotion of human rights and international labour standards in the EU's external trade relations, building on and stimulating further – the already well-engaged – scientific dialogue on this area of research. In particular, it provides the basis for developing a new analytical structure for better understanding the role of the EU in promoting human rights and international labour standards in global trade and, in particular, for assessing the extent to which and how normative considerations have influenced the adoption of EU legal instruments and policy decisions. This book will appeal to research scholars, post-graduate students, practitioners and human rights activists.

Emerging Powers, Global Justice and International

Economic Law Andreas Buser,2021-01-04 The book assesses emerging powers' influence on international economic law and analyses whether their rhetoric of reforming this 'unjust' order translates into concrete reforms. The questions at the heart of the book surround the extent to which Brazil, Russia, India, China, and South Africa individually and as a bloc (BRICS) provide alternative regulatory ideas to those of 'Western' States and whether they are able to convert their increased power into influence on global regulation. To do so, the book investigates two broader case studies, namely, the reform of international investment agreements and WTO reform negotiations since the start of the Doha Development Round. As a general outcome, it finds that emerging powers do not radically challenge established law. 'Third World' rhetoric mostly does not translate into practice and rather serves to veil economic interests. Still, emerging powers provide for some alternative regulatory ideas, already leading to a diversification of international economic law. As a general rule, they tend to support norms that allow host States much policy space which could be used to protect and fulfil socio-economic human rights, especially – but not only – in the Global South.

International Environmental Law-making and Diplomacy Tuomas Kuokkanen,Ed Couzens,Tuula

Honkonen, Melissa Lewis, 2016-01-29 Bringing together contributions from diplomats, UN agency officials, lawyers and academics, this book provides insight into the evolution of international environmental law, diplomacy and negotiating techniques. Based on first-hand experiences and extensive research, the chapters offer a blend of practice and theory, history and analysis, presenting a range of historical episodes and nuances and drawing lessons for future improvements to the processes of law-making and diplomacy. The book represents a synthesis of the most important messages to emerge from the annual course on Multilateral Environmental Agreements, delivered to diplomats and negotiators from around the world for the last decade by the University of Eastern Finland and the United Nations Environment Programme. The book will be of interest as a guide for negotiators and as a supplementary textbook and a reference volume for a wide range of students of law and environmental issues.

The WTO Transit Regime for Landlocked Countries and its Impacts on Members' Regional Transit Agreements

Suhailah Akbari, 2021-06-08 This book assesses Afghanistan's transit trade with Pakistan in the context of WTO transit regime for landlocked countries and its impacts on Members' regional transit agreements. The key questions this book seeks to answer are the extent Afghanistan can benefit from WTO transit rules in demanding freedom of transit through the territory of Pakistan, how these rules influence the transit agreement concluded between Afghanistan and Pakistan, and finally how useful it would be to challenge Pakistan under the WTO dispute settlement system for its failure to provide Afghanistan freedom of transit and free access to and from the sea.

The WTO Merit E. Janow, Victoria Donaldson, Alan Yanovich, 2008-01-01 This volume brings together essays by world-renowned leaders in the field of international trade examining the operation of the WTO and its dispute settlement

system. The experts who have contributed to this book include policymakers, scholars, lawyers and diplomats. Two major areas of inquiry are undertaken. The first half of this volume examines the governance and operation of the WTO and the international trading system. It pays particular attention to issues that affect developing country members of the WTO. The second half of this volume contains a detailed examination of the performance, operation, and challenges of the WTO's dispute settlement system. This book is an outgrowth of a conference held at Columbia University in New York in the spring of 2006. The conference was the last of a series of five regional gatherings held around the world to commemorate the 10th anniversary of the WTO and its dispute settlement system. This volume includes essays that shed further light on some of the themes raised in those discussions, as well as edited transcripts from that conference.

Philosophy and Computing Luciano Floridi, 2002-01-04

Philosophy and Computing explores each of the following areas of technology: the digital revolution; the computer; the Internet and the Web; CD-ROMs and Multimedia; databases, textbases, and hypertexts; Artificial Intelligence; the future of computing.

Luciano Floridi shows us how the relationship between philosophy and computing provokes a wide range of philosophical questions: is there a philosophy of information? What can be achieved by a classic computer? How can we define complexity? What are the limits of quantum computers? Is the Internet an intellectual space or a polluted environment? What is the paradox in the Strong Artificial Intelligence program? Philosophy and Computing is essential reading for anyone wishing to fully understand both the development and history of information and communication technology as well as the philosophical issues it ultimately raises.

The Effect of UV Light and Weather on Plastics and Elastomers Laurence W. McKeen, 2013-06-21 This reference

guide brings together a wide range of essential data on the effects of weather and UV light exposure on plastics and elastomers, enabling engineers to make optimal material choices and design decisions. In both normal and extreme environments, outdoor use has a variety of effects on different plastics and elastomers, including discoloring and brittleness. The data is supported by explanations of real-world engineering applications. The data tables in this book are supported by examples of real-world applications, enabling engineers and scientists to select the right materials for a given situation, across a wide range of sectors including construction, packaging, signage, consumer (e.g. toys, outdoor furniture), automotive and aerospace, defense, etc. The third edition includes new text chapters that provide the fundamental knowledge required to make best use of the data. Author Larry McKeen has also added detailed descriptions of the effect of weathering on the most common polymer classes such as polyolefins, polyamides, polyesters, elastomers, fluoropolymers, biodegradable plastics, etc., making this book an invaluable design guide as well as an industry standard data source. Essential data and practical guidance for engineers and scientists working with plastics in outdoor applications and products New introductory chapters on weathering processes and the effect of light and heat on plastics 25% new data

Algae Based Polymers, Blends, and Composites Khalid

Mahmood Zia, Mohammad Zuber, Muhammad Ali, 2017-06-19

Algae Based Polymers, Blends, and Composites: Chemistry, Biotechnology and Material Sciences offers considerable detail on the origin of algae, extraction of useful metabolites and major compounds from algal bio-mass, and the production and future prospects of sustainable polymers derived from algae, blends of algae, and algae based composites. Characterization methods and processing techniques for algae-based polymers and composites are discussed in detail, enabling researchers to apply the latest techniques to their own work. The conversion of bio-mass into

high value chemicals, energy, and materials has ample financial and ecological importance, particularly in the era of declining petroleum reserves and global warming. Algae are an important source of biomass since they flourish rapidly and can be cultivated almost everywhere. At present the majority of naturally produced algal biomass is an unused resource and normally is left to decompose. Similarly, the use of this enormous underexploited biomass is mainly limited to food consumption and as bio-fertilizer. However, there is an opportunity here for materials scientists to explore its potential as a feedstock for the production of sustainable materials. Provides detailed information on the extraction of useful compounds from algal biomass Highlights the development of a range of polymers, blends, and composites Includes coverage of characterization and processing techniques, enabling research scientists and engineers to apply the information to their own research and development Discusses potential applications and future prospects of algae-based biopolymers, giving the latest insight into the future of these sustainable materials

U.S. Trade Preference Programs ,2008 U.S. trade preference programs promote economic development in poorer nations by providing export opportunities. The Generalized System of Preferences, Caribbean Basin Initiative, Andean Trade Preference Act, and African Growth and Opportunity Act unilaterally reduce U.S. tariffs for many products from over 130 countries. However, three of these programs expire partially or in full this year, and Congress is exploring options as it considers renewal. The author was asked to review the programs' effects on the United States and on foreign beneficiaries' exports and development, identify policy trade-offs concerning these programs, and evaluate the overall U.S. approach to preference programs. To address these objectives, the authors analysed trade data, reviewed trade literature and program documents, interviewed U.S. officials, and did fieldwork in six countries. This

is an excerpted and indexed version.

The World Trade Organization Mitsuo Matsushita, Thomas J. Schoenbaum, Petros C. Mavroidis, Michael Hahn, 2015 This is a comprehensive overview of the law and practice of the World Trade Organization. It begins with the institutional law of the WTO, moving eventually to the consequences of globalization. New chapters on Trade in Agriculture and on Government Procurement and Trade.

Strengthening Regional Trade Integration in South Asia

Owais Hasan Khan, 2021-03-05 This book brings forth the philosophical, conceptual and practical contours of the trade regionalism provisions under the GATT/WTO. It analyses SAARC as the regional integration organisation of South Asia along with identifying major challenges and bottlenecks faced by it in the process of achieving regional integration. It presents ways and methods through which SAARC can be made a more effective regional organisation. The book predominantly focuses on trade regionalism. However, other areas of integration which have impacts on the trade regionalism are also examined like social and political integrations etc. The book takes off from the premise that trade regionalism under SAARC has failed and has been marred by political and security concerns among its member nations. It has failed to achieve its objective on all the three counts, which are promoting peace, development and economic cooperation. However, with the developing countries as members, SAARC has great potential for trade integration. Certain structural, normative and organisation alteration along with favourable ideation can still make SAARC achieve its full potential. The book also deals with the comparative analysis of SAARC regional integration with the regional integration under European Union and ASEAN. Regarding comparative regionalism, the discussion has been confined only to the EU and ASEAN. The EU has been chosen because it is comparatively established as one of the most successful regional organisations in the

contemporary world. Whereas, ASEAN has been chosen because of its similarity to the SAARC's economy, society and political structure. The analysis presented in the book is from the perspectives of international law and international relations' theories and practise. This book thus is of particular relevance to the students, researchers, academicians, policymakers and practitioners of international trade law, international relations and South Asian studies.

Trade in Goods Petros C. Mavroidis, 2012-07-19 This new edition of *Trade in Goods* is an authoritative work on international trade by one of the most influential scholars in the field. It provides a comprehensive and detailed analysis of every WTO agreement dealing with trade in goods. The focus of the book is on the reasoning behind the various WTO agreements and their provisions, and the manner in which they have been understood in practice. It introduces both the historic as well as the economic rationale for the emergence of the multilateral trading system, before dealing with WTO practice in all areas involving trade in goods. It contests the claim that the international trade agreements themselves represent 'incomplete contracts', realized through interpretation by the WTO and other judicial bodies. The book comprehensively analyses the WTO's case law, and it argues that a more rigorous theoretical approach is needed to ensure a greater coherence in the interpretation of the core provisions regulating trade in goods. This second edition readdresses and moves beyond the discussion of the GATT presented in the first edition to assess in significant detail every trade in goods agreement at the WTO, both multilateral as well as plurilateral. The book is written to be accessible to those new to the field, with an authoritative level of detail and analysis that makes it essential reading for lawyers and economists alike.

Molecular Characterization of Polymers Muhammad Imran Malik, Jimmy Mays, Muhammad Raza Shah, 2021-03-09 *Molecular Characterization of Polymers* presents a range of

advanced and cutting-edge methods for the characterization of polymers at the molecular level, guiding the reader through theory, fundamentals, instrumentation, and applications, and supporting the end goal of efficient material selection and improved material performance. Each chapter focuses on a specific technique or family of techniques, including the different areas of chromatography, field flow fractionation, long chain branching, static and dynamic light scattering, mass spectrometry, NMR, X-Ray and neutron scattering, polymer dilute solution viscometry, microscopy, and vibrational spectroscopy. In each case, in-depth coverage explains how to successfully implement and utilize the technique. This practical resource is highly valuable to researchers and advanced students in polymer science, materials science, and engineering, and to those from other disciplines and industries who are unfamiliar with polymer characterization techniques. Introduces a range of advanced characterization methods, covering aspects such as molecular weight, polydispersity, branching, composition, and tacticity Enables the reader to understand and to compare the available technique, and implement the selected technique(s), with a view to improving properties of the polymeric material Establishes a strong link between basic principles, characterization techniques, and real-life applications
