## **Simulation and Modeling of Systems of Systems** Pascal Cantot, Dominique

Luzeaux, 2013-03-04 Systems engineering is the design of a complex interconnection of many elements (a system) to maximize a specific measure of system performance. It consists of two parts: modeling, in which each element of the system and its performance criteria are described; and optimization in which adjustable elements are tailored to allow peak performance. Systems engineering is applied to vast numbers of problems in industry and the military. An example of systems engineering at work is the control of the timing of thousands of city traffic lights to maximize traffic flow. The complex and intricate field of electronics and computers is perfectly suited for systems engineering analysis and in turn, advances in communications and computer technology have made more advanced systems engineering problems solvable. Thus, the two areas feed off of one another. This book is a basic introduction to the use of models and methods in the engineering design of systems. It is aimed at students as well as practicing engineers. The concept of the systems of systems is discussed extensively, after a critical comparison of the different definitions and a range of various practical illustrations. It also provides key answers as to what a system of systems is and how its complexity can be mastered.

China Dream Ma Jian, 2020-06-09 Blending fact and fiction, this darkly comic fable “may be the purest distillation yet of Mr. Ma’s talent for probing the country’s darkest corners and exposing what he regards as the Communist Party’s moral failings” (Mike Ives, The New York Times). Called “Red Guards meet Kurt Vonnegut . . . powerful!” by Margaret Atwood on Twitter, *China Dream* is an unflinching satire of totalitarianism. Ma Daode, a corrupt and lecherous party official, is feeling pleased with himself. He has an impressive office, three properties, and multiple mistresses who text him day and night. After decades of loyal service, he has been appointed director of the China Dream Bureau, charged with replacing people's private dreams with President Xi Jinping's great China Dream of national rejuvenation. But just as he is about to present his plan for a mass golden wedding anniversary celebration, his sanity begins to unravel. Suddenly plagued by flashbacks of the Cultural Revolution, Ma Daode's nightmare visions from the past threaten to destroy his dream of a glorious future. Exposing the damage inflicted on a nation's soul when authoritarian regimes, driven by an insatiable hunger for power, seek to erase memory, rewrite history, and falsify the truth, *China Dream* is a dystopian vision of repression, violence, and state-imposed amnesia that is set not in the future, but in China today.

*Ludendorff's Own Story* Erich Ludendorff, 1919 The second volume of Erich Ludendorff's memoirs of World War I begins with the Entente Offensive of early 1917, and concludes with the armistice which marked the end of the horrific conflict. By the later stages of the war, several new technologies plus the United States joining the Entente Cordial shifted the balance. Tanks were seen in far greater numbers than before, German submarines were deployed en masse, while poison gas and aerial

bombardments became commoner. Mechanized mobility and the presence of automatic rifles changed the tempo of combat; while static trench warfare remained dominant along the front, breakthroughs became more achievable. Battles such as Cambrai, where massed French and British tanks punched through a large section of front, plus the evermore numerous American forces, placed heavy stresses upon the German army and its high command. Ludendorff acknowledges the deteriorating conditions in Germany; the economy became exhausted by the insatiable demands of war for both men and materiel. By late 1918 he realized that the Allies had simply to wait for the inevitable collapse; German soldiers taken as prisoners of war revealed the chaos behind their front lines, as battle groups were hastily mobilized and reformed amid unrelenting casualties. At the conclusion of the book Ludendorff delivers some patriotic words, looking ahead to the future recovery of his nation.
