Optical Properties of Low Dimensional Silicon Structures B. Bensahel,Leigh T. Canham,Stephano Ossicini,2012-12-06 The workshop on Optical Properties of Low Dimensional Silicon sL Structures was held in Meylan, France on March, 1 yd, 1993. The workshop took place inside the facilities of France Telecom- CNET. Around 45 leading scientists working on this rapidly moving field were in attendance. Principal support was provided by the Advanced Research Workshop Program of the North Atlantic Treaty Organisation (NATO). French Delegation a l'Armement and CNET gave also a small financial grant, the organisational part being undertaken by the SEE and CNET. There is currently intense research activity worldwide devoted to the optical properties of low dimensional silicon structures. This follow the recent discovery of efficient visible photoluminescence (PL) from highly porous silicon. This workshop was intended to bring together all the leading European scientists and laboratories in order to reveal the state of the art and to open new research fields on this subject. A large number of invited talks took place (12) together with regular contribution (20). The speakers were asked to leave nearly 1/3 of the time to the discussion with the audience, and that promoted both formal and informal discussions between the participants.

Rich Land, Wasteland Sharyn Munro,2012-05-01 For nearly a year Sharyn Munro travelled through rural Australia, visiting the communities in coal-mining areas. She found a war zone. Here, literally at the coal-face, towns and districts are dying - homeowners and farmers forced out by mining, broken in spirit and in health, or else under threat, their lives and properties in limbo as they battle the might of huge mining companies developing ever larger mines and prospecting ever more widely for new coal deposits or coal seam gas. Incidences of asthma, cancers and heart attacks show alarming spikes in communities close to coal mines and coal power stations. Once reliable rivers and aquifers are drying up or becoming polluted. Once fertile agricultural land is becoming unusable. What was once a rich land is becoming a wasteland. But the big, mostly foreign-owned, mining companies continue to push on with their ever expanding coal rush and government continues to help and protect them at the expense of rural communities. Ever more mining licences are being granted, ever bigger mines are being opened. Sharyn Munro exposes the real story of coal in this life-changing book: how people are hurting, and rebelling, as coal pushes into hitherto unthinkable areas; how the true costs really stack up against the benefits of our mining boom; and what's really happening to those individuals and communities who are ultimately paying the price.

Chesley's Hypertensive Disorders in Pregnancy Robert N. Taylor,James M. Roberts,F. Gary Cunningham,Marshall D. Lindheimer,2014-08-28 Chesley's Hypertensive Disorders in Pregnancy continues its tradition as one of the beacons to guide the field of preeclampsia research, recognized for its uniqueness and utility. Hypertensive disorders remain one the major causes of maternal and fetal morbidity and death. It is also a leading cause of preterm birth now known to be a risk factor in remote cardiovascular disease. Despite this the hypertensive disorders remain marginally studied and management is often controversial. The fourth edition of Chesley's Hypertensive Disorders in Pregnancy focuses on prediction, prevention, and management for clinicians, and is an essential reference text for clinical and basic investigators alike. Differing from other texts devoted to preeclampsia, it covers the whole gamut of high blood pressure, and not just preeclampsia. Features new chapters focusing on recent discoveries in areas such as fetal programming, genomics/proteomics, and angiogenesis Includes extensive updates to chapters on epidemiology, etiological considerations, pathophysiology, prediction, prevention, and management Discusses the emerging roles of metabolic syndrome and obesity and the increasing incidence of preeclampsia Each section overseen by one of the editors; each chapter co-authored by one of the editors, ensuring coherence throughout book

Congenital Hip Disease in Adults George Hartofilakidis,George C. Babis,Kalliopi Lampropoulou-Adamidou,2016-08-23 Congenital hip disease (CHD) is the main cause of secondary osteoarthritis (OA) of the hip in young adults, which accounts for almost 40% of all cases of hip OA. Total hip replacement (THR) performed using optimal techniques can achieve a radical improvement in the quality of life of adult patients. This book offers in-depth coverage of all aspects of CHD in adults and its treatment. Relevant information is first provided on the basic anatomy of the hip and OA of the hip and on the classification, epidemiology, and natural history of CHD. The now limited role of femoral and pelvic osteotomies is carefully evaluated, and the use of THR is then considered in detail. Indications and preoperative planning are discussed, and the available operative techniques, analyzed. Clear guidance is provided on overcoming major technical difficulties, and the benefits of particular approaches and techniques are highlighted. More than 180 images and numerous case studies complement this reader-friendly text. The book will be an invaluable tool for orthopedic surgeons, rheumatologists and radiologists.

Cicero A LEGAMUS Transitional Reader Judith Lynn Sebesta,Mark Haynes,2010-01-01 The Legamus Transitional Readers are innovative texts that form a bridge between the initial study of Latin via basal textbooks and the reading of authentic author texts. This series of texts has been developed by a special committee of high school and college teachers to facilitate this challenging transition. Cicero: A Legamus Transitional Reader introduces students to Cicero's Latin via selections from his Pro Archia. Introductory materials include an overview of the life and works of Cicero, historical context, and bibliography. The authors combine special visual features—including line alignments based on meaning with the pass through method—to make Cicero's sometimes complicated prose more student-friendly. Appendices on grammar and figures of speech as well as a pull-out vocabulary complete the book's student aids. After finishing Cicero: A Legamus Transitional Reader, students will be prepared to undertake a more complete study of Cicero in an upper level Latin literature or college

level course. Features: pre-reading materials to help students understand underlying cultural, historical, and literary concepts review explanations of grammatical and syntactical usage, with practice exercises pass through approach that begins with the main statement and adds clauses with each pass thus assisting students in unraveling Cicero's complex sentences first versions of the Latin text with transitional aids: lines aligned to facilitate comprehension, implied words in parentheses, difficult noun-adjective pairings in different fonts complete vocabulary and grammatical notes on facing pages post-reading materials that encourage appreciation of Cicero's style, reflection on what has been read, and making connections to the modern world final version of each Latin text without transitional aids, but with notes and vocabulary pull-out vocabulary of frequently used Latin words four maps and eighteen illustrations that complement the Latin selections and background essays

Web Caching Duane Wessels,2001 On the World Wide Web, speed and efficiency are vital. Users have little patience for slow web pages, while network administrators want to make the most of their available bandwidth. A properly designed web cache reduces network traffic and improves access times to popular web sites--a boon to network administrators and web users alike.Web Caching hands you all the technical information you need to design, deploy, and operate an effective web caching service. It starts with the basics of how web caching works, from the HTTP headers that govern cachability to cache validation and replacement algorithms.Topics covered in this book include: Designing an effective cache solution Configuring web browsers to use a cache Setting up a collection of caches that can talk to each other Configuring an interception cache or proxy Monitoring and fine-tuning the performance of a cache Configuring web servers to cooperate with web caches Benchmarking cache products The book also covers the important political aspects of web caching, including privacy, intellectual property, and security issues.Internet service providers, large corporations, or educational institutions--in short, any network that provides connectivity to a wide variety of users--can reap enormous benefit from running a well-tuned web caching service. The purpose of this book is to provide a comprehensive resource for all possible DNA damages in sperm, the relation to fertility and infertility, and possible transgenerational heritable effects.

Latin for the New Millennium: Level 2: student text Milena Minkova,Terence Tunberg,2009-10-15 Latin for the New Millennium, Levels 1 and 2 is a complete introductory course to the Latin language, suitable for both high school and college students, consisting of two volumes, each accompanied by a teacher's manual and students' workbooks. The strategy employed for teaching and learning incorporates the best of both the reading approach and the more abstract grammatical method. The choice of vocabulary in each chapter reflects ancient authors commonly studied for the AP Latin examinations. There are exercises designed for oral use, as well as a substantial core of more conventional exercises in each chapter. The readings, pictures, and supplementary inserts on cultural information illuminate Roman life, civilization, Roman history, and mythology, as well as the continuing use of Latin after antiquity and its vigorous literary tradition in such periods as the Middle Ages and Renaissance. Each chapter also includes derivatives, the influence of Latin vocabulary on English, and selected proverbs or common Latin sayings. Latin for the New Millennium Level 3 builds on the strong foundation of Levels 1 and 2 and provides students an in-depth experience of Caesar, Catullus, Cicero, Horace, Ovid, and Vergil as well as of the Renaissance writer Erasmus. This text provides students an introduction to unadapted Latin literature and builds their literary analysis skills.--adapted from publisher website.
