A Geek in Korea Daniel Tudor,2014-09-09 For every fan of K-Pop music, Korean Wave dramas and Kimchi—or anyone intrigued by Korea and Korean culture—A Geek in Korea is a hip, new guide to the land of the Samsung smartphone and Gangnam Style. Author Dan Tudor first arrived in Korea on the eve of the 2002 World Cup when South Korea played Italy in the finals. What he saw inspired him to return and work in Korea. He served as The Economist magazine's Korea correspondent for three years, and he writes regular columns for the national daily JoongAng Ilbo newspaper. Along the way, he has developed a great love and admiration for Korean culture and the Korean people. A Geek in Korea reinvents the culture guide for the Internet age. Packed with articles and photographs, it covers all the touchstones of Korean culture—from Buddhism and Confucianism to chapters on the traditional arts and disciplines like Taekwondo. There are chapters on cultural code words and norms; personal relationships; business and technology; and symbols and practices that are peculiarly Korean. A number of chapters are devoted to Korean pop culture, with attention to the stars, idols, and urban subcultures associated with them. For visitors to Korea, the author includes a mini-guide to his favorite neighborhoods in Seoul and other places of outstanding interest. Spotlighting the originality and creativity of the Koreans, debunking myths about them, and answering nagging questions like why they're so obsessed with education and success—Tudor has created the perfect book for the growing ranks of Koreaphiles in this

inspired, insightful, and highly informative guide.

How to read this book? Take the notions seriously. Search the Internet and they will lose their generalness. They will begin to speak to you vividly. Bundle these riches with the riches of other notions and they will activate each other. Also take the pictures seriously. Photograph or scan them. Use them as an index, while searching the Internet. Again, you will find rich stories. Bundle those riches, concentrate them into new identities that are interesting to you. Let yourself be inspired by the intellectual wealth of our world. You can expand it. It is an exciting adventure, demanding and optimistic.

Photoshop Elements 4 One-on-one Deke McClelland,Galen Fott,2005 Photoshop Elements 4 One-on-One marks a landmark in computer publishing. In addition to offering 12 lessons of project-based tutorials with all sample files included, each lesson starts with a video introduction, hosted by the author himself, Deke McClelland. And these are no ordinary videos. Produced by Adobe's official video training partner, Total Training, each video measures 960 by 540 pixels and plays at 30 frames per second, with no interlacing. That's a play rate of 15.5 million pixels per second, making this the first computer publication to include high-definition video, playable on any modern PC with a DVD-ROM drive. The picture is so crystal clear, it's like watching the world-rekowned expert work right along with you. In addition to the video -- all new recordings created exclusively for this title -- the book has been completely revamped for Photoshop Elements 4. Inside the full-color pages are new exercises devoted to color-correcting skin tones, auto-tagging images with faces, isolating foreground subjects, extracting people and objects from their backgrounds, creating custom slide shows, correcting red-eye, and sharing images online. Every bit as wildly ambitious and brass-tacks practical as the best-selling image editor itself, Photoshop Elements 4 One-on-One will have you gasping with amazement at your own creations. Deke puts the magic of digital imaging squarely where it belongs -- in your hands.

What in the World is Music? Alison E. Arnold,Jonathan C. Kramer,2023-09-13 What in the World is Music? Second Edition is an undergraduate, interactive e-textbook that explores the shared ways people engage with music and how humans organize and experience sound. It adopts a global approach, featuring more than 300 streaming videos and 50 streaming audio tracks of music from around the world. Drawing from both musicological and ethnomusicological modes of inquiry, the authors explain the nature and meaning of music as a universal human practice, making no distinction between Western and non-Western repertoires while providing students with strong points of connection to the ways it affects their own lives. The What in the World is Music? curriculum is divided into five parts, with a fully integrated multimedia program linked directly to the chapters: The Foundations of Music I proposes a working definition of music and considers inquiry-guided approaches to its study: Why do humans have innate musical perception? How does this ability manifest itself in the human voice? A catalog of musical instruments showcases global diversity and human ingenuity. The Foundations of Music II continues the inquiry-guided approach, recognizing the principles by which musical sound is organized while discussing elements such as rhythm, melody, harmony, texture, form, genre, and style. Where did music come from? What is it for? Music and Identity examines how music operates in shaping, negotiating, and expressing human identity and is organized around three broad conceptual frames: the group, hybridity, and conflict. Music and the Sacred addresses how music is used in religious practices throughout the world: chanting sacred texts and singing devotional verses, inspiring religious experience such as ecstasy and trance, and marking and shaping ritual space and time. Music and Social Life analyzes the uses of music in storytelling, theater, and film. It delves into the contributions of sound technologies, while looking at the many ways music enhances nightlife, public ceremonies, and festivals.

Visual proficiency - A perspective on art education Kunibert Bering,Rolf Niehoff,2015-12-18 Every day, over a million images are uploaded to flickr. This is a striking example of the so-called »flood« of images that emerged with the beginning of the digital age. A generation of adolescents has already been socialised with this flood of images and deals with it on a daily basis, both in their networks and elsewhere. Art education thus faces significant challenges: art is the only school subject that deals with the problems inherent in images as images, making them the focus of pedagogic activity. This volume presents both the foundations for engaging with the phenomenon of the »image« in a competent and historically informed manner as well as the perspectives for art education that arise from these foundations. It is based upon the conviction that providing orientation in a world defined by images does not mean following solely a technocratic, functionalist or even neoliberal »concept of education«. Quite the contrary: »providing an orientation« for

how to deal with images in a world that is dominated by them is a crucial part of the holistic development of young people's personalities. The volume's main focus lies upon the new functions taken on both by the image and by art more generally. It takes into account aspects of globalisation and participation and also includes more unusual views (often from a cross-media perspective) of art and its historical repertory, which even current image creation is unable to dispense with. The volume also deals extensively with architecture and the images it conveys.
