A Laboratory Reborn Oak Ridge National Laboratory, 2008-04-01 Using historical and contemporary photos, this book tells a unique scientific and human story that occupies a special place in American history. The story begins with the construction in the hills of East Tennessee, seemingly overnight, of a new Secret City that grew to a population of 75,000 in less than three years. Following World War II as the city's fences came down, the Laboratory's wartime mission evolved, focusing first on understanding the mysteries of nuclear power, and later as a key source of research expertise for the United States.

Prophet of the Pentacle Marilyn D. Privratsky, 2009-09-30 A powerful ancient evil returns with only one thing standing in its way... In ancient times, a great battle was fought between a ruthless evil, named Lord Jarden and a powerful sphinx, named Berecynthia. She defeated and imprisoned this evil, but was mortally wounded, so unable to vanquish it. After the passing of five ages, a royal advisor named, Randy of Corpus, sets out on a mission for the king of the Shandel, to investigate a mysterious and lonely isle named, Ice Isle. Unknowingly the advisor sets free the ancient evil and becomes its host. Now the only thing that is able to save the beautiful realm of Andora and her people from this ancient evil is a sacred alliance of prophets called the Osarian Knights. Trained by a mysterious sphinx known as Farro, ages earlier, these prophetic knights struggle to stop the ruthless creature from turning the mystical realm into a wasteland of burning as and hell on earth, which would only be the beginning...

Landscape at Berkeley Waverly B. Lowell, Carrie Leah McDade, Elizabeth Douthitt Byrne, 2013 Landscape at Berkeley was published in conjunction with the centennial anniversary celebration of the Department of Landscape Architecture and Environmental Planning. Through scholarly essays, reminiscences, and illustrations, the monograph represents both commemoration of the Department and a greater understanding of the Berkeley campus. It also endeavors to trace Berkeley's role in the history of the profession and design education in the United States. Landscape at Berkeley focuses on the first hundred years of teaching landscape architecture and environmental planning on the UC Berkeley campus and captures an important localized perspective as well as primary source evidence that will enhance broader examinations of the major issues that have shaped the profession and the environments we inhabit and visit. Furthermore, it will contribute to the increasing scholarly interest in and literature on the history of design education, particularly that of landscape architecture and environmental planners. As such, it will appeal to a diverse audience of scholars, students, design professionals, policy makers, and the general public. The monograph includes a comprehensive narrative history and schematic timeline of key events; scholarly essays exploring the activities of UC Berkeley students and faculty within the broader context of design history, education, research, practice, policy, and leadership; reminiscences of current and

former faculty and students; and a color portfolio of student work illustrating curricular goals, program competitions, and the formative work of many individuals who have contributed to the profession locally, regionally, nationally, and internationally--
