Ben Bova

Voyagers III Ben Bova, 2010-08-03 Keith Stoner lay frozen in an alien spacecraft for fifteen long years; during that time he came to be something more than just an astronaut, just a man. Stoner became partly alien himself--merged with an alien intelligence embodied in the nanotechnology that lived inside Stoner's body. The alien whose tomb that spacecraft was, brought humanity both a blessing and a deadly peril. The technology now the control of Vanguard Industries has changed the face of the earth. The technology that lives in Stoner's bloodstream will change mankind forever. There are powerful leaders, both corporate and political, who are becoming aware of Keith Stoner and the power he seems to control. They want that power for themselves, and will do anything to gain it. Nothing Stoner can say or do will convince these ruthless men and women that the power they seek may destroy them utterly. Abundance of the Infinite Christopher Canniff, 2012 Tormented by his wife's apparent determination to abort their child, a psychologist travels to a small coastal fishing town in South America, where his recently deceased father lived. There, he discovers many unsettling truths about himself and his family which eventually transform his reality into a lucid, disparaging dream from which he may not be able to escape...

The Return Ben Bova, 2010-08-03 From the six-time Hugo Award-winning author of the Voyagers series comes the next installment, book four, Ben Bova's The Return In the 1980s, an alien starship visited Earth. While investigating what appeared to be a sarcophagus bearing the preserved body of its builder, astronaut Keith Stoner was trapped and cryogenically frozen. After his body was eventually returned to Earth and revived, Stoner discovered that he had acquired alien powers.

Using these new powers, he built a new starship and left Earth. Now, after more than a century of exploring the stars, Keith Stoner returns to find that the world he has come back to does not match the one he left. The planet is suffering the consequences of disastrous greenhouse flooding. Most nations have been taken over by ultraconservative religion-based governments, such as the New Morality in the United States. With population ballooning and resources running out, Earth is heading for nuclear war. Stoner, the star voyager, wants to save Earth's people. But first he must save himself from the frightened and ambitious zealots who want to destroy this stranger—and the terrifying message he brings from the stars. The Hallowed Isle Diana L. Paxson, 2000 The legend of King Arthur is brilliantly retold through four hallows or sacred objects of Britain: the Sword, the Spear, the Cauldron, and the Stone.

Mars Ben Bova, 2010-02-16 Considered one of Ben Bova's most famous Grand Tour novels: "A gripping, realistic tale of man's first expedition to the red planet. Don't miss it" (Terry Brooks, New York Times–bestselling author of *The Shannara Chronicles*). Jamie Waterman is a young Navaho geologist who is picked for the ground team of the first manned expedition to Mars. He will be joining an international team of astronauts and scientists. But once the crew land on the red planet, they soon discover they must battle not only the alien land on which they have invaded but earthbound bureaucrats as well. When they come face to face with a chasm ten times as deep and large as the Grand Canyon, all twenty-five astronauts must face the most shocking discovery of all . . . "The science fiction author who will have the greatest effect on the world." —Ray Bradbury, author of *Fahrenheit 451* "A splendid book . . . Of his many books, Mars must be the most important." —Arthur C. Clarke, author of *Islands in the Sky*

Deep Time David Darling, 2013-05-14 What would it be like to see the whole history of the universe, from the moment of creation to the farthest future? Deep Time shows us - through the eyes of a single particle that emerges from the fires of genesis then journeys across countless billions of years to glimpse the ultimate fate of the cosmos. Along the way, we watch the formation of stars and galaxies, narrowly avoid falling into a black hole, witness the birth of the sun and earth, trace the evolution of life and intelligence, and blast off into space again with our particle now part of the Voyager 2 spacecraft. Then we travel on, across immense vistas of space and time, toward the end of all things - and a strange new beginning. David Darling is the author of about 50 books, including narrative science titles Megacatastrophes!, We Are Not Alone, Gravity's Arc, Equations of Eternity, a New York Times Notable Book, and Deep Time. most respected novelists.

Privateers Ben Bova, 2011-04-01 In Ben Bova's award-winning *Privateers*, America has ceded the heavens to the Tyrants--and the Renegades. The U.S. has abandoned its quest for the stars, and an old enemy has moved in to fill the void. The potential wealth of the universe is now in malevolent hands. Rebel billionaire Dan Randolph -- possessor of the largest privately owned company in space - - intends to weaken the stranglehold the new despotic masters of the solar system have on the lucrative ore industry. But when the mineral-rich asteroid he sets in orbit around the Earth is commandeered by the enemy, and his unarmed workers are slaughtered in cold blood, the course of Randolph's life is changed forever. Now cataclysm is aimed at the exposed heart of America -- a potential catastrophe that Randolph himself inadvertently set in motion. And the maverick entrepreneur must use his skills, cunning, and vast resources to strike out at his foes hard, fast and with ruthless precision -- and wear proudly the mantle that fate thrust upon him: space pirate! New Earth Ben Bova, 2013-07-16 Award-winning author Ben Bova brings us *New Earth*, his latest tale of science fiction in his Grand Tour series. The entire world is thrilled by the discovery of a new Earthlike planet. Advance imaging shows that the planet has oceans of liquid water and a breathable oxygen-rich atmosphere. Eager to gain more information, a human exploration team is soon dispatched to explore the planet, now nicknamed New Earth. All of the explorers understand that they are essentially on a one-way mission. The trip takes eighty years each way, so even if they are able to get back to Earth, nearly 200 years will have elapsed. They will have aged only a dozen years thanks to cryonic suspension, but their friends and family will be gone and the very society that they once knew will have changed beyond recognition. The explorers are going into exile, and they know it. They are on this mission not because they were the best available, but because they were expendable. Upon landing on the planet they discover something unexpected: New Earth is inhabited by a small group of intelligent creatures who look very much like human beings. Who are these people? Are they native to this world, or invaders from elsewhere? While they may seem inordinately friendly to the human explorers, what are their real motivations? What do they want? Moreover, the scientists begin to realize that this planet cannot possibly be natural. They face a startling and nearly unthinkable question: Could New Earth be an artifact? Apollo 16 Robert Godwin, 2002 Compiled here are many important documents about the Apollo 16 mission including the complete debriefing in the crew's own words.

And yet ... the future of the Alpha Quadrant is by no means as safe as it seems. Deep within the bowels of Deep Space Nine is a secret that has been kept for seven years. When it is uncovered the very heart of the Federation will be ripped apart, succeeding where the shapeshifting Founders failed. The destruction of the Federation is at stake. Colony Ben Bova, 2016-10-21 In the Future, Everything is Different. But Nothing Has Changed. The Earth has been poisoned by pollution, choked by overpopulation, and ravaged by the mindless greed of power-hungry corporations. A fragile peace is threatened by landless revolutionaries and global anarchy seems imminent. Yet a single ray of hope remains... Island One is a celestial utopia, and David Adams is its most perfect creation—a man with a brain as advanced as any computer and a body free of human frailties. But David is a prisoner—a captive of the colony that created him—destined to spend the days of his life in an island-sized cylinder that circles a doomed and desperate home planet. Thousands of miles below him, a world trembles; its people cringe in terror and despair in anticipation of an impending apocalypse. And as Earth's boundaries, fate has cast one

extraordinary human in the role of savior. For David Adams has a plan-one that will ultimately ensure the salvation of his species... or its annihilation.

Burning Chrome William Gibson, 2014-04-15 “A breath of fresh air . . . the vision is deeply imagined, very complete and controlled . . . Gibson is truly brilliant.”—Washington Times magazine From a true master of science fiction comes a collection of short stories that show how, no matter the length, Gibson is one of the greatest writers working today. Known for his seminal science fiction novel *Neuromancer*, and for the acclaimed books *Pattern Recognition*, *The Peripheral*, and *Agency*, William Gibson is actually best when writing short fiction. Tautly written and suspenseful, *Burning Chrome* collects 10 short stories, including some written with Bruce Sterling, John Shirley, and Michael Swanwick, and with a preface from Bruce Sterling, now available for the first time in trade paperback. These brilliant, high-resolution stories show Gibson’s characters and intensely realized worlds at their absolute best, from the chip-enhanced couriers of “Johnny Mnemonic” to the street-tech melancholy of “*Burning Chrome*.”

Stay Alive Michael Harris, 2021-04-30 When *The Hunger Games* series began in 2008, many commentators lumped it in with other young adult genre fiction. But *The Hunger Games* was always more political. It’s since become the defining story for a generation that’s grown up with economic crisis and never ending war. An uber-rich ruling class gorge themselves in their gleaming high-tech Capitol, while working people are left behind to survive in exploited districts. Revolution is a forgotten hope kept at bay by brutal policing, aching poverty, and rigid class segregation. Suzanne Collins' dark vision has only become more relevant as *The Hunger Games* generation are thrown into an arena of increasingly brutal competition from which it seems like there is no escape, amid the climate crisis, global pandemics, rampant inequality, authoritarianism, media misinformation, and

violence and cruelty as TV spectacle. It's no wonder the story continues to resonate. Stay Alive uses the story to shed light on our own age of extreme inequalities and climate collapse, in which elites use state power, compliant media, and violent spectacle to pacify their populations. The elite endgame is leading us towards our own version of Panem, an authoritarian state order we'll call Capitolism. The world is catching fire. Elites have no intention of burning with us. And yet there is hope, which Michael Harris finds for his readers in revolution and radical solidarity, in the anti-authoritarian, empathetic, cooperative politics of a generation that has no choice but to rebel.

Karsten Födinger Roberto Gargiani, Anna Rosellini, 2021 Harnessing the Formative Power of Gravity Typically made of basic construction materials, the works of Karsten Födinger (b. Mönchengladbach, Germany, 1978; lives and works in Berlin) bridge the divide between architecture and sculpture. Ideas relating to the durability and load-bearing capacity of structures are a key interest in his creative process. Besides large sculptures destined for interior settings, Födinger makes striking sculptural interventions in public spaces that take inspiration from the specific site and always engage with its historical and cultural context. Untainted by romanticism, his sculptures symbolize the approach to a foreseeable end that is hastened by the uncontrolled exploitation of the earth's resources. With numerous illustrations and essays, this first extensive monograph on the artist presents a comprehensive survey of his sizable oeuvre. Födinger's works have been presented in numerous solo exhibitions, including at Antenna Space, Shanghai, and the Palais de Tokyo, Paris. In 2012, he was awarded the Baloise Art Prize at Art Basel Statements.

Saturn Ben Bova, 2003-06-01 Second in size only to Jupiter, bigger than a thousand Earths but light enough to float in water, home of crushing gravity and delicate, seemingly impossible rings, it dazzles and attracts us: SATURN Earth groans under the thumb of fundamentalist political regimes.

Crisis after crisis has given authoritarians the upper hand. Freedom and opportunity exist in space, for those with the nerve and skill to run the risks. Now the governments of Earth are encouraging many of their most incorrigible dissidents to join a great ark on a one-way expedition, twice Jupiter's distance from the Sun, to Saturn, the ringed planet that baffled Galileo and has fascinated astronomers ever since. But humans will be human, on Earth or in the heavens-so amidst the idealism permeating Space Habitat Goddard are many individuals with long-term schemes, each awaiting the tight moment. And hidden from them is the greatest secret of all, the real purpose of this expedition, known to only a few....
