Movie Monsters in Scale Mark C. Glassy,2012-12-01 This book showcases stunningly realistic and wonderfully posed models

and dioramas depicting various characters and scenes from science fiction and horror cinema. The models and dioramas are presented in chronological order starting with the silent films from 1910 to 1927, then the classic films from the 1930s and 1940s, including Universal Studios' Dracula, Frankenstein, and Wolf Man franchises. Next are the many radiation induced mutants and invaders from outer space of the 1950s, followed by offerings from the 1960s, 1970s, 1980s, and 1990s. Hammer Films are included as well as the Mummy movies and Universal's Gillman series. A detailed explanation of the nitty-gritty of model and diorama building is presented and particular details unique to each piece are shown in close-ups and discussed. The figures are of unprecedented artistry.

Pea Ridge William L. Shea, Earl J. This study of the battle is based on research in archives from Connecticut to California and includes a pioneering study of the terrain of the sprawling battlefield, as well as an examination of soldiers' personal experiences, the use of Native

American troops, and the role of Pea Ridge in regional folklore. The Nutshell Studies of Unexplained Death Corinne May Botz, 2004-09-28 The Nutshell Studies of Unexplained Death offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory

essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.

tasted the salty spray of whales [in that umbrella-boat]. Cat, Bear, and Rabbit soon interrupt Elephant—each claiming that his umbrella is really their tent, flying machine, and cane. Elephant is flabbergasted—after all, it's an umbrella, and it certainly hasn't been on any adventures more exciting than a walk in the rain. Or has it? Jackie Azúa Kramer and illustrator Maral Sassouni have created a gem in this fun read-aloud! Natural History Dioramas Sue Dale Tunnicliffe, Annette Scheerso, 2014-12-05 This book brings together in a unique perspective aspects of natural history dioramas, their history, construction and rationale, interpretation and educational importance, from a number of different countries, from the west coast of the USA, across Europe to China. It describes the journey of dioramas from their inception through development to visions of their future. A complementary journey is that of visitors and their individual sense making and construction of their understanding from their own starting points, often interacting with others (e.g.

teachers, peers, parents) as well as media (e.g. labels). Dioramas have been, hitherto, a rather neglected area of museum exhibits but a renaissance is beginning for them and their educational importance in contributing to people's understanding of the natural world. This volume showcases how dioramas can reach a wide audience and increase access to biological knowledge.

The Secret Subway Shana Corey, 2016-03-08 From an acclaimed author and a New York Times Best Illustrated artist comes the fascinating, little-known—and true!—story of New York City's first subway. New York City in the 1860s was a mess: crowded, disgusting, filled with garbage. You see, way back in 1860, there were no subways, just cobblestone streets. That is, until Alfred Ely Beach had the idea for a fan-powered train that would travel underground. On February 26, 1870, after fifty-eight days of drilling and painting and plastering, Beach unveiled his masterpiece—and throngs of visitors took turns swooshing down the track. *The Secret Subway* will wow readers, just as Beach's underground train wowed riders over a century ago.
