Artificial Intelligence for Drug Development, Precision Medicine, and Healthcare Mark Chang, 2020-05-07 Artificial Intelligence for Drug Development, Precision Medicine, and Healthcare covers exciting developments at the intersection of computer science and statistics. While much of machine-learning is statistics-based, achievements in deep learning for image and language processing rely on computer science's use of big data. Aimed at those with a statistical background who want to use their strengths in pursuing AI research, the book:

- Covers broad AI topics in drug development, precision medicine, and healthcare.
- Elaborates on supervised, unsupervised, reinforcement, and evolutionary learning methods.
- Introduces the similarity principle and related AI methods for both big and small data problems.
- Offers a balance of statistical and algorithm-based approaches to AI.
- Provides examples and real-world applications with hands-on R code.
- Suggests the path forward for AI in medicine and artificial general intelligence.

As well as covering the history of AI and the innovative ideas, methodologies and software implementation of the field, the book offers a comprehensive review of AI applications in medical sciences. In addition, readers will benefit from hands on exercises, with included R code.

Intelligent Techniques and Applications in Science and Technology Subhojit Dawn, Valentina Emilia Balas, Anna Esposito, Sadhan Gope, 2020-03-02 This book provides innovative ideas on achieving sustainable development and using

green technologies to conserve our ecosystem. Innovation is the successful exploitation of a new idea. Through innovation, we can achieve MORE while using LESS. Innovations in science & technology will not only help mankind as a whole, but also contribute to the economic growth of individual countries. It is essential that the global problem of environmental degradation be addressed immediately, and thus, we need to rethink the concept of sustainable development. Indeed, new environmentally friendly technologies are fundamental to attaining sustainable development. The book shares a wealth of innovative green technological ideas on how to preserve and improve the quality of the environment, and how to establish a more resource-efficient and sustainable society. The book provides an interdisciplinary approach to addressing various technical issues and capitalizing on advances in computing & optimization for scientific & technological development, smart information, communication, bio-monitoring, smart cities, food quality assessment, waste management, environmental aspects, alternative energies, sustainable infrastructure development, etc. In short, it offers valuable information and insights for budding engineers, researchers, upcoming young minds and industry professionals, promoting awareness for recent advances in the various fields mentioned above.

Earth, Sun, and Moon: Cyclic Patterns of Lunar Phases, Eclipses, and the Seasons Derek L. Miller, 2016-12-15 In the early seventeenth century, Galileo

Galilei posited that tides were a consequence of Earth's motion. Today we've achieved an accurate understanding of the ways that orbiting objects interact to create visible—and sometimes tangible—effects on Earth. Earth, Sun, and Moon: Cyclic Patterns of Lunar Phases, Eclipses, and the Seasons explains the cycles that affect our daily lives and how the major figures in astronomy used the scientific method to prove their theories about these cycles in accordance with Next Generation Science Standards.

20 Fun Facts About Stars Kristen Rajczak Nelson, 2014-08-01 Have you ever looked up at the stars and wondered what ancient people thought of them? Have you ever wanted to see a star up close to study it? This book addresses both of these questions, and much more. Readers take a fascinating tour of the universe and learn all about the lives of stars, as well as constellations. Brilliant photographs and illustrations help readers understand and enjoy this at-level science text.

A Global Church History Steven D. Cone, Robert F. Rea, 2019-09-05 How did the Christian Church originate, what journeys has it taken over two millennia, and how did it come to exist in its present, myriad forms? The answers to these questions form a tapestry of history that reaches from first century Palestine to the ends of the earth. This volume tells this rich story from an ecumenical perspective, drawing on both Eastern and Western historic sources in exploring the rise of Eastern Orthodoxy; the church across Asia, Africa, and the Americas; and the reformations of the Western Church; including the

diversity of contemporary voices. The work benefits from many pedagogical features: - boxed text sections identifying central figures and points of debate - study questions for each chapter - chapter summaries - maps --charts --index Supplemented by over 400 illustrations, this book embraces the universality of historic and current Christianity, creating a single and comprehensive volume for students of Church history and systematic theology.

Divine Messengers Hannelore Goos,2019-03-22 In western astrology we use of course Roman names for the planetary symbols; but when you look on the mythological explanations, you usually get Greek mythology to explain them. Doesn't count: NOMEN EST OMEN ? Searching the mythological rests of the original deities Mercury, Venus, Mars, Jupiter and Saturnus it was necessary to dive deeply into the history of theology because the well-known literates like Ovid, Virgil and Lucretius preferred to retell Greek myths instead of preserving their own roots. In the last centuries (until about 1900) these authors were taken as sources for theological research and there was no discrimination between literature/poetry and original italic tradition. Perspective and moral view of the 19th century added more misinterpretations and made the knowledge of Roman religion almost vanish. Existing rests are collected in this book and compared with the actual

astrological symbols. So the reader can recognize how much of Roman ideas can be found in the planetary symbols nowadays. Simultaneously new points of view are opened for the interpretation of Mercury, Venus, Mars, Jupiter and Saturn.

21st Century Homestead: Sustainable Agriculture II: Farming and Natural Resources Marlon Henkel,

YOUCAT Bible ,2017-05-07 The newest title in the internationally best-selling YOUCAT series for youth and young adults, this outstanding Bible features the creative elements of the best-selling YOUCAT youth catechism and the DOCAT social teaching handbook. It's filled with engaging photos, clever and fun illustrations by YOUCAT's award-winning designer, insightful sidebar quotes from great thinkers, Catholic saints and leaders, past and present, and young people living their faith today. It includes helpful introductions to the books of the Bible and short, easy-to-understand commentaries by some of today's top Bible teachers. Plus, an index of biblical names, terms, and topics. Based on the popular Revised Standard Version, Second Catholic Edition of the Ignatius Bible, the YOUCAT Bible carefully abridges the biblical text to help young people to follow the story of the Bible. It also includes a special preface by Pope Francis. You are holding something divine in your hands ... A book through which God speaks. -- Pope Francis, from the preface to the YOUCAT Bible A superb book for high school classes, for regular faith-formation, for youth ministry and for young adult discussion.

American-Type Options Dmitrii S. Silvestrov,2015-03-03 The book gives a systematical presentation of stochastic approximation methods for discrete time Markov price processes. Advanced methods combining backward recurrence algorithms for computing of option rewards and general results on convergence of stochastic space skeleton and tree approximations for option rewards are applied to a variety of models of multivariate modulated Markov price

processes. The principal novelty of presented results is based on consideration of multivariate modulated Markov price processes and general pay-off functions, which can depend not only on price but also an additional stochastic modulating index component, and use of minimal conditions of smoothness for transition probabilities and pay-off functions, compactness conditions for log-price processes and rate of growth conditions for pay-off functions. The volume presents results on structural studies of optimal stopping domains, Monte Carlo based approximation reward algorithms, and convergence of American-type options for autoregressive and continuous time models, as well as results of the corresponding experimental studies.

The Virtual Utility Shimon Awerbuch, Alistair Preston, 2012-12-06 In the winter of 1996, after 4 years of planning and research, the Symposium on the Virtual Utility was held in Saratoga Springs, New York. It was sponsored by Niagara Mohawk Power Corporation, Co-sponsored by CSC Index and the New York State Energy Research and Development Authority and hosted by Rensselaer Polytechnic Institute, Troy, NY. The symposium sought to identify new areas of inquiry by presenting cutting-edge academic and practitioner research intended to further our understanding of the strategic, technologically-driven issues confronting the electricity production and distribution process. The program sought to offer new insights into rapid changes in the utility industry, in part, by examining analogues from manufacturing and telecommunications. In addition to identifying new research areas, the

symposium yielded a number of important findings and conclusions. This volume contains the presented papers of the meeting, the discussant reports and two special papers prepared by the meeting rapporteurs who performed superbly in analyzing, synthesizing, explaining and generally bringing a cohesive perspective to the interesting yet complex set of ideas presented at this unique meeting. We would like to acknowledge the people and organizations that contributed to this effort. We thank Niagara Mohawk Power Corporation and Albert Budney, its President & Chief Operating Officer for sponsoring this project, and Andrew Vesey, Vice President, whose vision, support and championing made this project possible.

Cultural Encounters and Tolerance Through Analyses of Social and Artistic Evidences: From History to the Present Altınöz, Meltem Özkan, 2022-02-25

Cultures around the world have recently become more isolated and aggressive in defending their socio-cultural domain. However, throughout history, many civilizations have established extensive and long-term cultural ties with diverse cultural groups. Despite ideological schisms that emerged between civilizations from time to time, our hunger for cultural encounters and coexistence shines through. *Cultural Encounters and Tolerance Through Analyses of Social and Artistic Evidences: From History to the Present* sheds light on different histories and presents evidence of cultural encounters, coexistence, and acculturation. This publication presents cultural assets as more mobile than ideologies across boundaries as it can be more often seen in

the cultural arena. Covering topics such as the effects of colonialism, geometrical forms, and architectural heritage, it serves as an essential resource for architects, art historians, cultural historians, students and professors of higher education, sociologists, anthropologists, researchers, and academicians.

Sustainability in the Textile and Apparel Industries Subramanian Senthilkannan Muthu, Miguel Angel Gardetti, 2020-03-16 This book is part of a five-volume set that explores sustainability in textile industry practices globally. Case studies are provided that cover the theoretical and practical implications of sustainable textile issues, including environmental footprints of textile manufacturing, consumer behavior, eco-design in clothing and apparels, supply chain sustainability, the chemistry of textile manufacturing, waste management and textile economics. The set will be of interest to researchers, engineers, industrialists, R&D managers and students working in textile chemistry, economics, materials science, and sustainable consumption and production. This volume comprehensively covers the various sustainable natural materials used in textiles that originate from raw materials sourcing. The book discusses agricultural production systems and standards for the development of sustainable textile fibers, the effects of chemical surface modification methods on the properties of textile fibers, and how antibacterial and antifungal textiles can be manufactured using natural resources.

The Dawn of Language Sverker Johansson, 2021-09-02 A model of popular-science writing STEVEN POOLE Who was the first speaker and what was their first message? An erudite, tightly woven and beautifully written account of one of humanity's greatest mysteries - the origins of language. Drawing on evidence from many fields, including archaeology, anthropology, neurology and linguistics, Sverker Johansson weaves these disparate threads together to show how our human ancestors evolved into language users. The Dawn of Language provides a fascinating survey of how grammar came into being and the differences or similarities between languages spoken around the world, before exploring how language eventually emerged in the very remote human past. Our intellectual and physiological changes through the process of evolution both have a bearing on our ability to acquire language. But to what extent is the evolution of language dependent on genes, or on environment? How has language evolved further, and how is it changing now, in the process of globalisation? And which aspects of language ensure that robots are not yet intelligent enough to reconstruct how language has evolved? Johansson's far-reaching, authoritative and research-based approach to language is brought to life through dozens of astonishing examples, both human and animal, in a fascinatingly erudite and entertaining volume for anyone who has ever contemplated not just why we speak the way we do, but why we speak at all. Translated from the Swedish by Frank Perry

Prose Fiction: An Introduction to the Semiotics of Narrative Ignasi

Ribó, 2019-12-13 This concise and highly accessible textbook outlines the principles and techniques of storytelling. It is intended as a high-school and college-level introduction to the central concepts of narrative theory – concepts that will aid students in developing their competence not only in analysing and interpreting short stories and novels, but also in writing them. This textbook prioritises clarity over intricacy of theory, equipping its readers with the necessary tools to embark on further study of literature, literary theory and creative writing. Building on a ‘semiotic model of narrative,’ it is structured around the key elements of narratological theory, with chapters on plot, setting, characterisation, and narration, as well as on language and theme – elements which are underrepresented in existing textbooks on narrative theory. The chapter on language constitutes essential reading for those students unfamiliar with rhetoric, while the chapter on theme draws together significant perspectives from contemporary critical theory (including feminism and postcolonialism). This textbook is engaging and easily navigable, with key concepts highlighted and clearly explained, both in the text and in a full glossary located at the end of the book. Throughout the textbook the reader is aided by diagrams, images, quotes from prominent theorists, and instructive examples from classical and popular short stories and novels (such as Jane Austen’s *Pride and Prejudice*, Franz Kafka’s ‘*The Metamorphosis*,’ J. K. Rowling’s *Harry Potter*, or Dostoyevsky’s *The Brothers Karamazov*, amongst many others). Prose

Fiction: An Introduction to the Semiotics of Narrative can either be incorporated as the main textbook into a wider syllabus on narrative theory and creative writing, or it can be used as a supplementary reference book for readers interested in narrative fiction. The textbook is a must-read for beginning students of narratology, especially those with no or limited prior experience in this area. It is of especial relevance to English and Humanities major students in Asia, for whom it was conceived and written.

Hörmander Spaces, Interpolation, and Elliptic Problems Vladimir A. Mikhailets, Aleksandr A. Murach, 2014-07-14 The monograph gives a detailed exposition of the theory of general elliptic operators (scalar and matrix) and elliptic boundary value problems in Hilbert scales of Hörmander function spaces. This theory was constructed by the authors in a number of papers published in 2005–2009. It is distinguished by a systematic use of the method of interpolation with a functional parameter of abstract Hilbert spaces and Sobolev inner product spaces. This method, the theory and their applications are expounded for the first time in the monographic literature. The monograph is written in detail and in a reader-friendly style. The complete proofs of theorems are given. This monograph is intended for a wide range of mathematicians whose research interests concern with mathematical analysis and differential equations.
