From Farms to Incubators Amy Wu,2021-04-20 An exciting look at how women entrepreneurs are transforming agriculture through high technology. 21st-century agriculture is now on the cutting edge of technological innovation. Drones, AI, sophisticated soil sensors, data analytics, blockchain, and robotics are transforming agriculture into the growing field of agtech. And women entrepreneurs are the driving spirits making this transformation happen. From Farms to Incubators presents inspiring stories of how women entrepreneurs from diverse cultural and ethnic backgrounds are leading the agtech revolution. Each agribusiness leader profiled in From Farms to Incubators tells her own story of how she used agtech innovation to solve specific business problems and succeed. These business cases demonstrate the influence of female innovation, the new technologies applied to agribusiness problems, and the career opportunities young women can find in agribusiness. From Farms to Incubators also documents the sweeping changes happening in American food production. Growers in the United States and around the world face rising challenges, including climate change, limited water and land supply, uncertainties in immigration policy, a severe labor shortage, and the problem of feeding a rising population estimated at 9 billion in 2050. The entrepreneurs profiled in From Farms to Incubators are the new leaders in tackling these problems through tech innovation. The women profiled speak frankly on the advantages and drawbacks of technological solutions to agriculture and offers lessons in making technology productive in real work. Offering both exhilarating role models for young women seeking high technology careers and a provocative glimpse into the future of food production, From Farms to Incubators documents how women leaders are profitably disrupting the world's oldest industry.

Sekret Machines Book 1: Chasing Shadows Tom DeLonge,AJ Hartley,2016-04-05 For those who know... that something is going on... The witnesses are legion, scattered across the world and dotted through history, people who looked up and saw something impossible lighting up the night sky. What those objects were, where they came from, and who—or what—might be inside them is the subject of fierce debate and equally fierce mockery, so that most who glimpsed them came to wish they hadn’t. Most, but not everyone. Among those who know what they’ve seen, and—like the toll of a bell that can’t be unrung—are forever changed by it, are a pilot, an heiress, a journalist, and a prisoner of war. From the waning days of the 20th century’s final great war to the fraught fields of Afghanistan to the otherworldly secrets hidden amid Nevada’s dusty neverlands—the truth that is out there will propel each of them into a labyrinth of otherworldly technology and the competing aims of those who might seek to prevent—or harness—these beings of unfathomable power. Because, as it turns out, we are not the only ones who can invent and build...and destroy. Featuring actual events and other truths drawn from sources within the military and intelligence community, Tom DeLonge and A.J. Hartley offer a tale at once terrifying, fantastical, and perhaps all too real. Though it is, of course, a work of... fiction?
