Logic Without Borders Åsa Hirvonen,Juha Kontinen,Roman Kossak,Andrés Villaveces,2015-03-10 In recent years, mathematical logic has developed in many directions, the initial unity of its subject matter giving way to a myriad of seemingly unrelated areas. The articles collected here, which range from historical scholarship to recent research in geometric model theory, squarely address this development. These articles also connect to the diverse work of Väänänen, whose ecumenical approach to logic reflects the unity of the discipline.

The Logic Model Guidebook Lisa Wyatt Knowlton, Cynthia C. Phillips, 2012-08-24 The Logic Model Guidebook offers clear, step-by-step support for creating logic models and the modeling process in a range of contexts. Lisa Wyatt Knowlton and Cynthia C. Phillips describe the structures, processes, and language of logic models as a robust tool to improve the design, development, and implementation of program and organization change efforts. The text is enhanced by numerous visual learning guides (sample models, checklists, exercises, worksheets) and many new case examples. The authors provide students, practitioners, and beginning researchers with practical support to develop and improve models that reflect knowledge, practice, and beliefs. The Guidebook offers a range of new applied examples. The text includes logic models for evaluation, discusses archetypes, and explores display and meaning. In an important contribution to programs and organizations, it emphasizes quality by raising issues like plausibility, feasibility, and strategic choices in model creation.

Clinical Trial Design Guosheng Yin, 2013-06-07 A balanced treatment of the theories,

methodologies, and design issues involved in clinical trials using statistical methods. There has been enormous interest and development in Bayesian adaptive designs, especially for early phases of clinical trials. However, for phase III trials, frequentist methods still play a dominant role through controlling type I and type II errors in the hypothesis testing framework. From practical perspectives, *Clinical Trial Design: Bayesian and Frequentist Adaptive Methods* provides comprehensive coverage of both Bayesian and frequentist approaches to all phases of clinical trial design. Before underpinning various adaptive methods, the book establishes an overview of the fundamentals of clinical trials as well as a comparison of Bayesian and frequentist statistics. Recognizing that clinical trial design is one of the most important and useful skills in the pharmaceutical industry, this book provides detailed discussions on a variety of statistical designs, their properties, and operating characteristics for phase I, II, and III clinical trials as well as an introduction to phase IV trials. Many practical issues and challenges arising in clinical trials are addressed. Additional topics of coverage include: Risk and benefit analysis for toxicity and efficacy trade-offs Bayesian predictive probability trial monitoring

Bayesian adaptive randomization Late onset toxicity and response Dose finding in drug combination trials Targeted therapy designs The author utilizes cutting-edge clinical trial designs and statistical methods that have been employed at the world's leading medical centers as well as in the pharmaceutical industry. The software used throughout the book is freely available on the book's related website, equipping readers with the necessary tools for designing clinical trials. Clinical Trial Design is an excellent book for courses on the topic at the graduate level. The book also serves as a valuable reference for statisticians and biostatisticians in the pharmaceutical industry as well as for researchers and practitioners who design, conduct, and monitor clinical trials in their everyday work.

Corporate Fields Andrew Benjamin, 2005 Corporate fields imagines and gives form to the future of office life, bringing together more than 2000 diagrams, models, renderings and other images from 26 architectural projects completed during the first three years of the ground-breaking AA DRL

programme. The projects are based on extensive field research undertaken in some of London's most creative corporate environments, and they have been developed from a close analysis of the remarkable ways in which today's leading companies challenge both traditional corporate practice and conventional office planning assumptions. The proposals resulting from this design research include master plans and buildings as well as interiors and furnishings. Corporate Fields is the first in a series of books documenting the work of the AA DRL, whose innovative (and increasingly imitated) team-based design pedagogy proposes a model for peer-to-peer teaching and learning that is uniquely tailored to the increasingly global design challenges, tools and technologies of the twenty-first century.-

Handbook of Applied Spatial Analysis Manfred M. Fischer, Arthur Getis, 2009-12-24 The Handbook is written for academics, researchers, practitioners and advanced graduate students. It has been designed to be read by those new or starting out in the field of spatial analysis as well as by those who are already familiar with the field. The chapters have been written in such a way that readers who

are new to the field will gain important overview and insight. At the same time, those readers who are already practitioners in the field will gain through the advanced and/or updated tools and new materials and state-of-the-art developments included. This volume provides an accounting of the diversity of current and emergent approaches, not available elsewhere despite the many excellent journals and textbooks that exist. Most of the chapters are original, some few are reprints from the Journal of Geographical Systems, Geographical Analysis, The Review of Regional Studies and Letters of Spatial and Resource Sciences. We let our contributors develop, from their particular perspective and insights, their own strategies for mapping the part of terrain for which they were responsible. As the chapters were submitted, we became the first consumers of the project we had initiated. We gained from depth, breadth and distinctiveness of our contributors' insights and, in particular, the presence of links between them.
