📖 **From Knowledge to Power** JOHN PERONA,2021 The Earth is slowly heating up, and only we, as a global community, can stop it. With the knowledge behind what is happening, we can effect change. Using his Ph.D in Molecular Biophysics and Biochemistry from Yale and his LL.M in Environmental and Natural Resources Law from the Northwestern College of Law at Lewis & Clark University, Dr. John Perona takes us on a journey into the science and politics of the climate crisis.Dr. Perona unites the basic science of climate change, the rise of green technologies, and the political implications of climate science to present a concise guide to the critical facts of climate change. He offers actionable tips on how to engage with scientific leaders, government officials, community leaders, and individuals like you and me. Dr. Perona offers a grounded, optimistic outlook for humanity, but only if we engage with science and act with knowledge.

📖 **Ending Child Abuse** VICTOR VIETH,BETTE L. BOTTOMS,ALISON R. PERONA,2006 The highly anticipated Ending Child Abuse: New Efforts in Prevention, Investigation, and Training presents an exciting vision: to end or significantly reduce child abuse. Respected social scientists and legal scholars discuss empirically sound short- and long- term multidisciplinary strategies that can be implemented in every community. Innovative and well-established concepts and approaches are clearly presented, such as specialized education, rational preventative methods, effective investigation and prosecution strategies, and the analysis of factors that influence law enforcement investigations and child abuse prevention efforts. This collection is impeccably referenced, soundly supported with research, and includes an appendix of other useful sources of information.

📖 **Murder on the Bucket List** ELIZABETH PERONA,2015-07-08 The septuagenarian women of the Summer Ridge Bridge Club have gathered in secret late one July night to check skinny-dipping off their bucket list. But as Francine observes, the jittery members seem more obsessed with body issues and elaborate preparations than actually stripping down and getting in the pool. A pungent smell emanating from the pool shed provides a perfect distraction. When a dead body flops out, it’s an answered prayer for Charlotte, since the first item on her list is to solve a murder. Unfortunately for Charlotte and Francine, before they can discover who really killed the man, they must negotiate neighborhood tours of the crime scene, press coverage of their skinny-dipping, an angry homeowners’ association, a disastrous appearance on Good Morning America, media offers sought by a hungry publicist, and a clever killer. Praise: Bubbly characters keep this cozy debut lively as you search through the red herrings for the big fish.—Kirkus Reviews A well-crafted mystery.—New York Journal of Books Do yourself a favor and treat yourself to Elizabeth Perona’s charming debut, em>Murder on the Bucket List. 📖 **Geometry-Driven Diffusion in Computer Vision** BART M. HAAR ROMENY,2013-03-14 Scale is a concept the antiquity of which can hardly be traced. Certainly the familiar phenomena that accompany scale changes in optical patterns are mentioned in the earliest written records. The most obvious topological changes such as the creation or annihilation of details have been a topic to philosophers, artists and later scientists. This appears to of fascination be the case for all cultures from which extensive written records exist. For th instance, Chinese 17 c artist manuals remark that distant faces have no eyes . The merging of details is also obvious to many authors, e. g. , Lucretius mentions the fact that distant islands look like a single one. The one topological event that is (to the best of my knowledge) mentioned only late (by th John Ruskin in his Elements of Drawing of the mid 19 c) is the splitting of a blob on blurring. The change of images on a gradual increase of resolution has been a recurring theme in the arts (e. g. , the poetic description of the distant armada in Calderon’s The Constant Prince) and this mystery (as Ruskin calls it) is constantly exploited by painters.

📖 **Front-End Vision and Multi-Scale Image Analysis** BART M. HAAR ROMENY,2008-10-24 Many approaches have been proposed to solve the problem of finding the optic flow field of an image sequence. Three major classes of optic flow computation techniques can discriminated (see for a good overview Beauchemin and Barron [Beauchemin 1995]): gradient based (or differential) methods; phase based (or frequency domain) methods; correlation based (or area) methods; feature point (or sparse data) tracking methods; In this chapter we compute the optic flow as a dense optic flow field with a multi scale differential method. The method, originally proposed by Florack and Nielsen [Florack 1998a] is known as the multiscale optic flow constrain equation (MOFCE). This is a scale space version of the well known computer vision implementation of the optic flow constraint equation, as originally proposed by Horn and Schunck [Horn 1981]. This scale space variation, as usual, consists of the introduction of the aperture of the observation in the process. The application to stereo has been described by Maas et al. [Maas 1995a, Maas 1996a]. Of course, difficulties arise when structure emerges or disappears, such as with occlusion, cloud formation etc. Then knowledge is needed about the processes and objects involved. In this chapter we focus on the scale space approach to the local measurement of optic flow, as we may expect the visual front end to do. 17. 2 Motion detection with pairs of receptive fields As a biologically motivated start, we begin with discussing some neurophysiological findings in the visual system with respect to motion detection.

📖 **Digital Signal Processing with Matlab Examples, Volume 3** JOSE MARIA GIRON-SIERRA,2016-11-21 This is the third volume in a trilogy on modern signal processing. The three books provide a concise exposition of signal processing topics, and a guide to support individual practical exploration based on MATLAB programs. This book includes MATLAB codes to illustrate each of the main steps of the theory, offering a self-contained guide suitable for independent study. The code is embedded in the text, helping readers to put into practice the ideas and methods discussed. The book primarily focuses on filter banks, wavelets, and images. While the Fourier transform is adequate for periodic signals, wavelets are more suitable for other cases, such as short-duration signals: bursts, spikes, tweets, lung sounds, etc. Both Fourier and wavelet transforms decompose signals into components. Further, both are also invertible, so the original signals can be recovered from their components. Compressed sensing has emerged as a promising idea. One of the intended applications is networked devices or sensors, which are now becoming a reality; accordingly, this topic is also addressed. A selection of experiments that demonstrate image denoising applications are also included. In the interest of reader-friendliness, the longer programs have been grouped in an appendix; further, a second appendix on optimization has been added to supplement the content of the last chapter.

PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, Ilovepdf, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
