Enemy at the Gates Justo Miranda, 2019-12-08 When the Nazis started to threaten the world with their efficient machine of propaganda, the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population. During the Munich Agreement in 1938, the democracies were defended by old biplanes and a bunch of modern fighters: 50 Hurricanes, 20 Morane-405 and 5 Fokker D.XXI. France and Great Britain took up the production of USA airplanes and cancelled exports to small countries, which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides. When nothing seemed able to contain the German advance, France, Great Britain and the USSR developed several programs of emergency fighters, as did Australia, to face the Japanese expansion. At the time the course of events switched, it was the Axis powers that had to create their own PANIC FIGHTERS, some of them suicidal. The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia, Belgium, Bulgaria, Canada, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Great Britain, Hungary, Japan, Yugoslavia, Latvia, Netherland, Poland, Romania, Sweden and Switzerland.

Slovakian and Bulgarian Aces of World War 2 Jiri Rajlich, 2012-12-20 In 1939, Slovakia signed a protection agreement with the German Reich and joined the attack on Poland, where its Avia B-534-equipped fighter squadrons claimed their first kills. In October 1942, having made do with obsolete aircraft, the Slovaks were equipped with Bf 109Es and eventually acquired 43 Messerschmitt fighters. The Slovaks would claim over 215 kills. Although it supported German efforts in Yugoslavia and Greece, Bulgaria did not declare war on Russia. First seeing action in August 1943, Bulgarian fighter pilots used their Bf

109Gs to good effect. From late 1943 through to mid-1944, the Bulgarian pilots attempted to defend the country from American bombers, and Stoyanov and Bochev made ace during this period.

Kurdish Armour Against ISIS Ed Nash,Alaric Searle,2021-09-16 One of the most remarkable mechanized campaigns of recent years pitted the brutal and heavily armed jihadis of Islamic State against an improvised force belonging to the Kurdish YPG (later the SDF). While some Kurdish vehicles were originally from Syrian Army stocks or captured from ISIS, many others were extraordinary homemade AFVs based on truck or digger mechanicals, or duskas, the Kurds' version of the technical. Before US air power was sent to Syria, these were the Kurds' most powerful and mobile weapons. Co-written by a British volunteer who fought with the Kurds and an academic expert on armoured warfare, this study explains how the Kurds built and used their AFVs in the war against 'Daesh', and identifies as far as possible which vehicles took part in major battles, such as Kobane, Manbij and Raqqa. With detailed new artwork depicting the Kurds' range of armour and many previously unpublished photos, this is an original and fascinating look at modern improvised mechanized warfare.

Henschel Hs 129 Denes Bernad,2006-09 When German planners decided that they needed an aircraft dedicated to a ground-attack role to disrupt and destroy troops on the ground in World War II, the twin-engined Henschel Hs 129 (nicknamed 'Panzerknacker', meaning tank cracker) was the result of their development efforts. This book covers the Hs 129's development and operational career and also provides numerous photos and illustrations detailing its camouflage schemes. Photos of the type in service and specially commissioned line drawings and color artworks illustrate all of the He 129's variants, including those that never left the drawing board. Many of these images are

previously unpublished, making this book an essential addition to the limited range of publications available on this important aircraft type.

Aeronautical Research in Germany Ernst Heinrich Hirschel, Horst Prem, Gero Madelung, 2012-12-06 From the pioneering glider flights of Otto Lilienthal (1891) to the advanced avionics of today's Airbus passenger jets, aeronautical research in Germany has been at the forefront of the birth and advancement of aeronautics. On the occasion of the centennial commemoration of the Wright Brother's first powered flight (December 1903), this English-language edition of *Aeronautical Research in Germany* recounts and celebrates the considerable contributions made in Germany to the invention and ongoing development of aircraft. Featuring hundreds of historic photos and non-technical language, this comprehensive and scholarly account will interest historians, engineers, and, also, all serious airplane devotees. Through individual contributions by 35 aeronautical experts, it covers in fascinating detail the milestones of the first 100 years of aeronautical research in Germany, within the broader context of the scientific, political, and industrial milieus. This richly illustrated and authoritative volume constitutes a most timely and substantial overview of the crucial contributions to the foundation and advancement of aeronautics made by German scientists and engineers.

Integration of the Armed Forces, 1940-1965 Morris J. MacGregor, 2020-06-18 In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of

treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy. x000D_ Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America. He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff.

Desert Sniper Ed Nash,2019-09-17 What makes an ordinary but highly educated Englishman, with no previous military training, decide to travel and fight in one of the most brutal conflicts on the planet? *Desert Sniper* is an extraordinary, true account of one man's journey from well-meaning volunteer to battle-scarred combat sniper, placing himself daily in the line of fire to fight one of the greatest evils of this new century. Ed Nash has travelled across the globe, and is working with refugees in Burma, when he first becomes aware of the terrible atrocities being committed under ISIS's newly established 'Caliphate', covering vast tracts of Iraq and Syria. In June 2015, he chooses to undertake the hazardous journey, via Northern Iraq, to Syria, to join ill-equipped and poorly trained but battle-hardened Kurdish forces as they attempt to halt Daesh's relentless advance. Nash is

an articulate, insightful and refreshingly honest companion as he unpacks the shifting complexities of the political and military situation in which he finds himself. As one of a motley band of foreign volunteer fighters - veterans of other conflicts, adventurers and misfits, from many different countries - we follow him through his rudimentary training and early combat operations as he and his companions slowly gain the trust and respect of their Kurdish colleagues. Nash shows us the realities of the war on the ground in Syria in fascinating detail; the privations of the ordinary Kurdish soldiers, the terrible price paid by civilians caught in the cross-fire, the ever-present danger of lethal suicide bombers and occasional moments of striking beauty in amongst the carnage. A modern classic in the making, *Desert Sniper* will prove to be one of the most unforgettable accounts to emerge from the war against ISIS.

Vulcan 607 Rowland White, 2012 It was to be one of the most ambitious operations since 617 Squadron bounced their revolutionary bombs into the dams of the Ruhr Valley in 1943... When Argentine forces invaded the Falklands in the early hours of 2 April 1982, Britain's military chiefs were faced with a real-life Mission Impossible.

King of Fighters -- Nikolay Polikarpov and His Aircraft Designs Mikhail Maslov, 2021-01-19 In the century-long history of the conquest of the sky there have been a number of outstanding personalities. Among them is the name of designer Nikolay Polikarpov (1892-1944), which is inseparably associated with the best achievements of the Russian and Soviet aviation. His practical activity in the aircraft industry began upon graduation from the Petersburg Polytechnic Institute in 1916. Aged 25, Polikarpov was sent to the Russo-Baltic Wagon Factory (RBWF), where the four-engined Ilya Muromets bombers designed by Igor Sikorsky were being built at that time. Later, beginning from August 1918, he worked in Moscow at the Dux aircraft factory. For several years, he was engaged in improving products

manufactured by the factory, and upgrading production aircraft to accommodate the available engines, equipment and materials. From 1922, Polikarpov focused his attention on fighter aircraft, creation of which was a priority for him during the following years. The first of them was the IL-400 monoplane, designated I-1 by the Air Force. The monoplane was followed by biplanes including the 2I-N1 (1925), the I-3 (1927), the D-2 (1928), and the I-6 (1929). It was specialization in fighter aircraft which, from then on, became his mission in life. At the peak of his career as a designer, Polikarpov was informally styled 'the King of Fighters', which was quite in line with the level of his merits and achievements. In the 1930's, the TsKB-3 (I-15) and TsKB-12 (I-16) fighters were designed under Polikarpov's supervision. These aircraft were the designer's undoubtable success. They also were the main combat fighters in service with the Red Army Air Force. For the creation of the I-15 and the I-16 fighters, Polikarpov was awarded the Order of Lenin in 1935, and the Order of the Red Star a year later. In the 1930's, Nikolay Polikarpov devised a lot of aircraft of various designs, the majority of which can be described as 'advanced' and 'innovative'. In 1940, Polikarpov was granted the degree of the Doctor of Engineering and the title of the Chief Designer of the highest category. In the same year, he was awarded the title of the Hero of Socialist Labor. A year later, he became a recipient of the Stalin Prize. The gifted Soviet engineer was destined to live only 52 years. On 30 July 1944, Nikolay Polikarpov died of a rapidly evolving oncological disease. To venerate his memory, the U-2 trainer has ever since been designated the Po-2 (Polikarpov-2). The book which is presented to the reader describes all Polikarpov's original projects, both those put into reality and unimplemented ones. It took the author many years to prepare for the creation of the book. The author studied materials on the respective topics in all Russian archives, and made use of remembrances of Polikarpov's contemporaries and publications by other researchers. For purposes of clarity and

in order to facilitate publication, the author split the book on Nikolai Polikarpov's aircraft into two parts - the 'Biplane Era' and the 'Monoplane Era'. Indeed, during the designer's activity from 1918 through to 1932, he devoted himself predominantly to creating biplanes. For the 1920's, the biplanes were a preferable option; they were more common, more reliable, better studied, and even more desirable for the Red Army Air Force. The first design of the IL-400 (I-1) monoplane fighter appeared as early as 1923; however, it was through its novelty and unpredictability that the aircraft failed to achieve the deserved success. It should be noted that the U-2 (Po-2) and the R-5 biplanes, which were created during that period, became one of the best Polikarpov aircraft, and brought him recognition as a reputed designer. In the 1930's, Nikolai Polikarpov's activity reached its pinnacle. It was during that period that he created his advanced monoplanes such as the I-16, the I-17, the VIT-2, and others. He continued his fruitful and quite successful activity in the area of creating modern aircraft during the war of 1941--45 as well.

Administration,2012-07-03 Every day in the United States, over two million men, women, and children step onto an aircraft and place their lives in the hands of strangers. Over The Seawall: U.S. Marines At Inchon [Illustrated Edition] Brigadier General Edwin H. Simmons,2015-11-06 Includes more than 40 maps, plans and illustrations. This volume in the official History of the Marine Corps chronicles the invasion by United States Marines at Inchon in the initial stages of the Korean War. The Battle of Inchon was an amphibious invasion and battle of the Korean War that resulted in a decisive victory and strategic reversal in favor of the United Nations. The operation involved some 75,000 troops and 261 naval vessels, and led to the recapture of the South Korea capital Seoul two weeks later. The code name for the operation was Operation Chromite. The battle began on 15 September 1950 and ended on 19 September. Through a surprise amphibious assault far from the Pusan Perimeter that UN and South Korean forces were desperately defending, the largely undefended city of Incheon was secured after being bombed by UN forces. The battle ended a string of victories by the invading North Korean People's Army (NKPA). The subsequent UN recapture of Seoul partially severed NKPA's supply lines in South Korea. The majority of United Nations ground forces involved were U.S. Marines, commanded

by General of the Army Douglas MacArthur of the United States Army. MacArthur was the driving force behind the operation, overcoming the strong misgivings of more cautious generals to a risky assault over extremely unfavorable terrain.

Deep Maneuver Jack D Kern Editor, Jack Kern, 2018-10-12 Volume 5, *Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations*, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.
