Symptoms of Being Human Jeff Garvin, 2016-02-02 Starred reviews from Publishers Weekly and Booklist * YALSA Top Ten Quick Pick for Reluctant Readers * ALA Best Fiction for Young Adults List * 2017 Rainbow A sharply honest and moving debut perfect for fans of *The Perks of Being a Wallflower* and *Ask the Passengers*. Riley Cavanaugh is many things: Punk rock. Snarky. Rebellious. And gender fluid. Some days Riley identifies as a boy, and others as a girl. But Riley isn't exactly out yet. And between starting a new school and having a congressman father running for reelection in über-conservative Orange County, the pressure—media and otherwise—is building up in Riley's life. On the advice of a therapist, Riley starts an anonymous blog to vent those pent-up feelings and tell the truth of what it's really like to be a gender fluid teenager. But just as Riley's starting to settle in at school—even developing feelings for a mysterious outcast—the blog goes viral, and an unnamed commenter discovers Riley's real identity, threatening exposure. And Riley must make a choice: walk away from what the blog has created—a lifeline, new friends, a cause to believe in—or stand up, come out, and risk everything. From debut author Jeff Garvin comes a powerful and uplifting portrait of a modern teen struggling with high school, relationships, and what it means to be a person.

On Being Human Jennifer Pastiloff, 2019-06-04 An inspirational memoir about how Jennifer Pastiloff's years of waitressing taught her to seek out unexpected beauty, how hearing loss taught her to listen fiercely, how being vulnerable allowed her to find love, and how imperfections can lead to a life full of wild happiness. Centered around the touchstone stories Jen tells in her popular workshops, *On Being Human* is the story of how a starved person grew into the exuberant woman she was meant to be all along by battling the demons within and winning. Jen did not intend to become a yoga teacher, but when she was given the opportunity to host her own retreats, she left her thirteen-year waitressing job and said “yes,” despite crippling fears of her inexperience and her own potential. After years of feeling depressed, anxious, and hopeless, in a life that seemed to have no escape, she healed her own heart by caring for others. She has learned to fiercely listen despite being nearly deaf, to banish shame attached to a body mass index, and to rebuild a family after the debilitating loss of her father when she was eight. Through her journey, Jen conveys the experience most of us are missing in our lives: being heard and being told, “I got you.” Exuberant, triumphantly messy, and brave, *On Being Human* is a celebration of happiness and self-realization over darkness and doubt. Her complicated yet imperfectly perfect life path is an inspiration to live outside the box and to reject the all-too-common belief of “I am not enough.” Jen will help readers find, accept, and embrace their own vulnerability, bravery, and humanness.

Being Humans Neil Roughley, 2000 No detailed description available for *Being Humans*.

Being Human Ron Broglio, Frederick Young, 2017-10-02 Technology and animals often serve as the boundaries by which we define the human. In this issue contributors explore these categories as necessary supplements or as porous membranes which disturb the scaffolding of how the human is constructed. A lingering question throughout is whether we have ever been human or if such a category is a non-localizable ideal or perhaps a misnomer. In this collection of essays, internationally known theorists muddle the categorical boundaries such that animals and technologies become necessary components rather than limits for what it means to be human. They

examine a range of subjects, including apophatic animality, critical media objects-to-think-with, biosemiotic insect resonances, the monstrous and horrific which dislodges our cultural animals, and the problem of thinking of animality as stupidity. Novels, films, digital objects, scientific laboratories, philosophical texts, animals on the road and in the fields serve as sites for inquiry. The result of these investigations is the spectral possibility that we are not the humans we make ourselves out to be. This book was originally published as a special issue of *Angelaki*.

Being Human: An Entheological Guide to God, Evolution and the Fractal Energetic Nature of Reality Martin W.

Ball, 2018-04-26 Being Human is the extraordinary new book that articulates a grand unified vision of reality through the Entheological Paradigm. Skillfully avoiding all speculation and metaphysics, Martin W. Ball, Ph.D., presents a concise explanation for the fundamental nature of reality as the fractal expression of a Unitary Energy Being (God). Ball explores how intentional work with entheogens, such as 5-MeO-DMT, gives individuals direct access to their immediate energetic natures. Through such practices, individuals can liberate themselves from the restrictive confines of their illusion-bound egos and embrace their personalities and bodies as direct expressions of God in physical and conscious form. Radical in its implications, stunning for its simplicity, Being Human is humanity's long-awaited guide to genuine fulfillment, transcendence, and global harmony and peace. If you feel ready to understand and experience the truth for yourself, then Being Human is the only book you will ever need.

Waking the Tiger: Healing Trauma Peter A. Levine, Ph.D., 1997-07-07 Now in 24 languages. Nature's Lessons in Healing

Trauma... Waking the Tiger offers a new and hopeful vision of trauma. It views the human animal as a unique being, endowed with an instinctual capacity. It asks and answers an intriguing question: why are animals in the wild, though threatened routinely, rarely traumatized? By understanding the dynamics that make wild animals virtually immune to traumatic symptoms, the mystery of human trauma is revealed. Waking the Tiger normalizes the symptoms of trauma and the steps needed to heal them. People are often traumatized by seemingly ordinary experiences. The reader is taken on a guided tour of the subtle, yet powerful impulses that govern our responses to overwhelming life events. To do this, it employs a series of exercises that help us focus on bodily sensations. Through heightened awareness of these sensations trauma can be healed.

No Cure for Being Human Kate Bowler, 2021-09-28 NEW YORK TIMES BESTSELLER • The bestselling author of *Everything Happens for a Reason (And Other Lies I've Loved)* asks, how do you move forward with a life you didn't choose? "Kate Bowler is the only one we can trust to tell us the truth."—Glennon Doyle, author of the #1 New York Times bestseller *Untamed* It's hard to give up on the feeling that the life you really want is just out of reach. A beach body by summer. A trip to Disneyland around the corner. A promotion on the horizon. Everyone wants to believe that they are headed toward good, better, best. But what happens when the life you hoped for is put on hold indefinitely? Kate Bowler believed that life was a series of unlimited choices, until she discovered, at age thirty-five, that her body was wracked with cancer. In *No Cure for Being Human*, she searches for a way forward as she mines the wisdom (and absurdity) of today's "best life now" advice industry, which insists on exhausting positivity and on trying to convince us that we can out-eat, out-learn, and out-perform our humanness. We are, she finds, as fragile as the day we were born. With dry wit and unflinching honesty, Kate

Bowler grapples with her diagnosis, her ambition, and her faith as she tries to come to terms with her limitations in a culture that says anything is possible. She finds that we need one another if we're going to tell the truth: Life is beautiful and terrible, full of hope and despair and everything in between—and there's no cure for being human.

Hello World: Being Human in the Age of Algorithms Hannah Fry, 2018-09-18 Shortlisted for the 2018 Royal Society Investment Science Book Prize A look inside the algorithms that are shaping our lives and the dilemmas they bring with them. If you were accused of a crime, who would you rather decide your sentence—a mathematically consistent algorithm incapable of empathy or a compassionate human judge prone to bias and error? What if you want to buy a driverless car and must choose between one programmed to save as many lives as possible and another that prioritizes the lives of its own passengers? And would you agree to share your family's full medical history if you were told that it would help researchers find a cure for cancer? These are just some of the dilemmas that we are beginning to face as we approach the age of the algorithm, when it feels as if the machines reign supreme. Already, these lines of code are telling us what to watch, where to go, whom to date, and even whom to send to jail. But as we rely on algorithms to automate big, important decisions—in crime, justice, healthcare, transportation, and money—they raise questions about what we want our world to look like. What matters most: Helping doctors with diagnosis or preserving privacy? Protecting victims of crime or preventing innocent people being falsely accused? Hello World takes us on a tour through the good, the bad, and the downright ugly of the algorithms that surround us on a daily basis. Mathematician Hannah Fry reveals their inner workings, showing us how algorithms are written and implemented, and demonstrates the ways in which human bias can literally be written into the code. By weaving in relatable, real world stories with accessible explanations of the underlying mathematics that power algorithms, Hello World helps us to determine their power, expose their limitations, and examine whether they really are improvement on the human systems they replace.

Being Human Richard Gross, 2012 A fascinating account of the psychological characteristics of human beings, in which the author contemplates one of the biggest questions of them all - what makes us human, and how do we differ from the other lifeforms that share this planet?

Being Human Richard Gross, 2019 The new edition of Being Human examines the psychology of being human through combining different psychological traditions alongside philosophy and evolutionary theory, in relation to themes such as culture, cognition, language, morality, and society.

The Positive Function of Evil P. Tabensky, 2009-06-10 This collection explores the controversial and perhaps even abject idea that evils, large and small, human and natural, may have a central positive function to play in our lives. For centuries a concern of religious thinkers from the Christian tradition, very little systematic work has been done to explore this idea from the secular point of view.

The Human Figure John Henry Vanderpoel, 1908

Hair Susan J. Vincent, 2018-10-04 Bobs, beards, blondes and beyond, Hair takes us on a lavishly illustrated journey into the world of this remarkable substance and our complicated and fascinating relationship with it. Taking the key things we do to it in turn, this book captures its importance in the past and into the present: to individuals and society, for health and hygiene, in social and political challenge, in creating ideals of masculinity and womanliness, in being a vehicle for gossip, secrets and sex. Using art, film, personal diaries, newspapers, texts and images, Susan J. Vincent unearths the stories we have told about hair and why they are important. From

ginger jibes in the seventeenth century to bobbed-hair suicides in the 1920s, from hippies to Roundheads, from bearded women to smooth metrosexuals, Hair shows the significance of the stuff we nurture, remove, style and tend. You will never take it for granted again.
