This guide offers you dozens of interactive, ready-to-use, age-appropriate and story-based activities that get children actively involved in learning. Designed to expand the child's self-awareness, range of expression, and aesthetic sensibility at particular stages of development, from infancy to puberty, these literature-based programs are simple enough to be used by any educator, even if you have little or no dance experience. The first three chapters for babies, toddlers, and preschoolers are based on nationally recognized standards and methods for tapping emergent literacy skills. The fourth chapter takes children on StoryTrips to other countries and includes language, stories, dances, and customs of those countries. The fifth and sixth chapters for older children show them how to interpret story structure and the elements of character, setting, mood, plot, and theme. Included for each program are learning goals/skill development, a literature-story connection, and detailed instructions for movement and vocal improvisation and creative dramatics. JF-17 Thunder: The Making of a Modern Cost-effective Multi-role Combat Aircraft Saghir Iqbal,2018-02-26 The astronomical rising costs of modern combat has resulted in many countries being deprived of purchasing a modern combat aircraft and this has had an adverse effect on their security. Many nations have tried to undertake cost-effective measures for their defence needs. Countries can either purchase very expensive modern aircraft or buy older aircraft that can be expensive to operate due to their high maintenance requirements. The Pakistan Air Force had initiated the plan to co-develop an affordable modern multi-role fighter aircraft with China. Chengdu Aircraft Corporation (CAC) in collaboration with Pakistan Aeronautical Complex (PAC, Kamra) have jointly developed the JF-17 Thunder combat aircraft (also known as the FC-1 Xiaolong Fierce Dragon in China). JF-17 Thunder is a sophisticated light-weight multi-role, all weather, day/night fighter aircraft that is manufactured by Pakistan and China. The JF-17 Thunder has become a very cost-effective aircraft that costs very little compared to other modern aircraft. Many countries have shown an interest and a few have started to make orders. Some have described the JF-17 as the ‘Ultimate MiG-21’ arguing that the Chinese/Pakistani JF-17 builds on a classic warplane – although it has no resemblance and its level of sophistication is comparable to current advanced fighter aircraft on the market. This very modern and capable aircraft has the potential to become a potent platform that can serve with numerous air forces across the world.

*You've Got Pictures!* Seth Godin,1998

*Quotations as Pictures* Josef Stern,2022-02-15 The proposal of a semantics for quotations using explanatory notions drawn from philosophical theories of pictures. In Quotations as Pictures, Josef Stern develops a semantics for quotations using explanatory notions drawn from philosophical theories of pictures. He offers the first sustained analysis of the practice of quotation proper, as opposed to mentioning. Unlike other accounts that treat quotation as mentioning, Quotations as Pictures argues that the two practices have independent histories, that they behave differently semantically, that the inverted commas employed in both mentioning and quotation are homonymous, that so-called mixed quotation is nothing but subsentential quotation, and that the major problem of quotation is to explain its dual reference or meaning—its ordinary meaning and its metalinguistic reference to the quoted phrase attributed to the quoted subject. Stern argues that the key to understanding quotation is the idea that quotations are pictures or have a pictorial character. As a phenomenon where linguistic competence meets a nonlinguistic symbolic ability, the pictorial, quotation is a combination of features drawn from the two different symbol systems of language and pictures, which explains the exceptional and sometimes idiosyncratic data about quotation. In light of this analysis of verbal quotation, in the last chapters Stern analyzes scare quotation as a nonliteral expressive use of the inverted commas and explores the possibility of quotation in pictures themselves.

Lập trình ứng dụng di động với App Inventor VIETSTEM, Giáo dục STEM trang bị cho người học những kiến thức, kỹ năng tổng hợp liên quan đến 04 lĩnh vực bao gồm khoa học (Science), công nghệ (Technology), kỹ thuật (Engineering) và toán học (Maths). Học lập trình ngoài cung cấp bốn mảng kiến thức của STEM còn trang bị cho học sinh kỹ năng tư duy logic, năng lực giải quyết vấn đề, khả năng biểu đạt hiện thực hóa các ý tưởng. Với những giá trị cả về nền tảng tư duy và những hiểu biết sâu sắc hơn về thế giới công nghệ, có thể nói những kiến thức về Lập trình và STEM là hành trang không thể thiếu cho học sinh bước tiến vào kỷ nguyên 4.0 Chính vì vậy, giáo dục STEM cần thiết cho mọi học sinh chứ không hướng đến mục tiêu đào tạo học sinh trở thành những nhà toán học, nhà khoa học, kỹ sư hay những kỹ thuật viên. App Inventor là một ứng dụng web mã nguồn mở được cung cấp ban đầu bởi Google, năm 2012 Google chuyển giao cho Trung tâm Nghiên cứu Di động của Viện Công nghệ Massachusetts (MIT) quản lý và phát triển (<http://appinventor.mit.edu>). Môi trường lập trình App Inventor có cách tiếp cận tương tự như Scratch, câu lệnh đều là những khối lệnh trực quan được kéo thả để tạo ra các ứng dụng từ đơn giản tới phức tạp. Các ứng dụng có thể chạy trực tiếp trên các thiết bị di động như điện thoại và máy tính bảng (phiên bản hiện tại hỗ trợ hệ điều hành Android, phiên bản tiếp theo sẽ hỗ trợ hệ điều hành IOS). Với Scratch, người học tập trung vào việc làm quen, hiểu ngôn ngữ lập trình là gì, rèn luyện tư duy logic. App Inventor là một bước phát triển tiếp theo, kế thừa hoàn toàn những ưu điểm của Scratch, ngoài ra tập trung nhiều hơn vào khả năng hiện thực hóa các ý tưởng và biến những ý

tưởng đó trực tiếp thành các sản phẩm công nghệ, sử dụng trong cuộc sống hàng ngày trên các thiết bị di động.

**Deep Learning for Chest Radiographs** Yashvi Chandola,Jitendra Virmani,H.S Bhadauria,Papendra Kumar,2021-07-16 Deep Learning for Chest Radiographs enumerates different strategies implemented by the authors for designing an efficient convolution neural network-based computer-aided classification (CAC) system for binary classification of chest radiographs into Normal and Pneumonia. Pneumonia is an infectious disease mostly caused by a bacteria or a virus. The prime targets of this infectious disease are children below the age of 5 and adults above the age of 65, mostly due to their poor immunity and lower rates of recovery. Globally, pneumonia has prevalent footprints and kills more children as compared to any other immunity-based disease, causing up to 15% of child deaths per year, especially in developing countries. Out of all the available imaging modalities, such as computed tomography, radiography or X-ray, magnetic resonance imaging, ultrasound, and so on, chest radiographs are most widely used for differential diagnosis between Normal and Pneumonia. In the CAC system designs implemented in this book, a total of 200 chest radiograph images consisting of 100 Normal images and 100 Pneumonia images have been used. These chest radiographs are augmented using geometric transformations, such as rotation, translation, and flipping, to increase the size of the dataset for efficient training of the Convolutional Neural Networks (CNNs). A total of 12 experiments were conducted for the binary classification of chest radiographs into Normal and Pneumonia. It also includes in-depth implementation strategies of exhaustive experimentation carried out using transfer learning-based approaches with decision fusion, deep feature extraction, feature selection, feature dimensionality reduction, and machine learning-based classifiers for implementation of end-to-end CNN-based CAC system designs, lightweight CNN-based CAC system designs, and hybrid CAC system designs for chest radiographs. This book is a valuable resource for academicians, researchers, clinicians, postgraduate and graduate students in medical imaging, CAC, computer-aided diagnosis, computer science and engineering, electrical and electronics engineering, biomedical engineering, bioinformatics, bioengineering, and professionals from the IT industry. Provides insights into the theory, algorithms, implementation, and application of deep-learning techniques for medical images such as transfer learning using pretrained CNNs, series networks, directed acyclic graph networks, lightweight CNN models, deep feature extraction, and conventional machine learning approaches for feature selection, feature dimensionality reduction, and classification using support vector machine, neuro-fuzzy classifiers Covers the various augmentation techniques that can be used with medical images and the CNN-based CAC system designs for binary classification of medical images focusing on chest radiographs Investigates the development of an optimal CAC system design with deep feature extraction and classification of chest radiographs by comparing the performance of 12 different CAC system designs

**Hope Against Darkness** Richard Rohr,John Bookser Feister,2002 'Let us begin again, for up to now we have done nothing.' That enigmatic sense of beginning again at the end of life, at the end of an era, in the middle of so much failure, when you just want to rest and put the past behind you, that is the gift for reconstruction that we want to discover in this book. It makes Francis a man for all seasons....-from Chapter Seven Richard Rohr is a modern prophet calling us to change our ways. Rohr paints a critical picture of the prevailing thought, culture and attitudes of the present-day West-which he calls The Postmodern Opportunity-including our cultural biases, our embrace of victimhood, our often fearful attitudes toward one another and toward the Church and religion in general. Rohr offers hope in introducing the Franciscan path of transformation, the new way of being that would change the face of history. Rohr describes how following Saint Francis' way to forgiveness and love, and owning the darkness, can bring us out of the postmodern pit in which we find ourselves.

*Breathing Under Water* Richard Rohr,2013-11-04 The Twelve Steps of Alcoholics Anonymous is America's most significant and authentic contribution to the history of spirituality, says Richard Rohr. He makes a case that the Twelve Steps relate well to Christian teaching and can rescue people who are drowning in addiction and may not even realize it. To survive the tidal wave of compulsive behavior and addiction, Christians must learn to breathe under water and discover God's love and compassion. In this exploration of Twelve Step spirituality, Rohr identifies the Christian principles in the Twelve Steps, connecting The Big Book of Alcoholics Anonymous with the gospel. He draws on talks he has given for over twenty years to people in recovery and those who counsel and live with people with addictive behavior. Rohr offers encouragement for becoming interiorly alive and inspiration for making one's life manageable for dealing with the codependence and dysfunction (sin) rampant in our society.

*Dropping the Atomic Bomb on Hirohito & Hitler* Jim Mangi,2022-02-24 On 2 August 1939, the renowned theoretical physicist Albert Einstein wrote a letter to President Roosevelt in which he declared that 'it might become possible to set up a nuclear chain reaction in a large mass of uranium'. He went on to declare that 'extremely powerful bombs of a new type may thus be constructed'. Shortly after Japan's attack on Pearl Harbor, Congress allocated substantial funds to allow research to be undertaken to follow through on Einstein's idea and build an atomic bomb. Few, if any, could have imagined what they had agreed to support. But what if actual events had taken a different course? The First Atomic Bomb: An Alternate History to the Ending of WW2 is a highly accurate, thoroughly researched, alternative history presenting a narrative of events exploring what might have happened if the atom bomb had been available somewhat earlier than it really was. What if the atomic bomb had been ready for deployment in, say, February 1945? Had the atomic bomb been ready sooner, how would this have affected the war in Europe, and in particular Germany's surrender? What would the impact have been in the war in the Pacific against Imperial Japan, and how would the Soviets have reacted? And what would the following Cold War have looked like? These are all questions and scenarios that the author rigorously examines. Solidly based on real people and actual events, in this book James Mangi describes the Manhattan Project to build the atom bomb getting an earlier start after President Roosevelt appointed an energetic scientist, Walter Mendenhall, to study the feasibility of the bomb, instead of the more traditional bureaucrat, Lyman Briggs, he actually chose. This scenario, he reveals, might well have produced a war-ending atomic bomb earlier, the effects of which rippled through the post-war world.

Mistbound Daryl Kho,2021 Meet Alexis. Her Grandpa's memories have been shattered. The only cure? Memory Glue. To brew it, she'll just need a few ingredients: Like, nose hair from a baku (dream-eater), sweat

from a duyung (sea siren) and...OK. Maybe some of the stuff can be tricky to find in local supermarkets. To obtain them Alexis must journey to an enchanted land called Mist, where the fabled creatures from Grandpa's folktales are alive in the flesh. Many of whom aren't strict vegetarians. Oh, and there's a deadline. The items must be gathered by Spring, else Grandpa's memories will be gone for good. At least she'll have company: the nasty kenit (forest imp) who'd cast the horrible spell on Grandpa, and her stern Grandma, who harbours a secret that will change Alexis' life forever... Piece of cake, right?
