The Dialogues Clifford V. Johnson, 2018-10-23 A series of conversations about science in graphic form, on subjects that range from the science of cooking to the multiverse. Physicist Clifford Johnson thinks that we should have more conversations about science. Science should be on our daily conversation menu, along with topics like politics, books, sports, or the latest prestige cable drama. Conversations about science, he tells us, shouldn't be left to the experts. In *The Dialogues*, Johnson invites us to eavesdrop on a series of nine conversations, in graphic-novel form—written and drawn by Johnson—about “the nature of the universe.” The conversations take place all over the world, in museums, on trains, in restaurants, in what may or may not be Freud's favorite coffeehouse. The conversationalists are men, women, children, experts, and amateur science buffs. The topics of their conversations range from the science of cooking to the multiverse and string theory. The graphic form is especially suited for physics; one drawing can show what it would take many words to explain. In the first conversation, a couple meets at a costume party; they speculate about a scientist with superhero powers who doesn't use them to fight crime but to do more science, and they discuss what it means to have a “beautiful equation” in science. Their conversation spills into another chapter (“Hold on, you haven't told me about light yet”), and in a third chapter they exchange phone numbers. Another couple meets on a train and discusses immortality, time, black holes, and religion. A brother and sister experiment with a grain of rice. Two women sit in a sunny courtyard and discuss the multiverse, quantum gravity, and the anthropic principle. After reading these conversations, we are ready to start our own.

The Geek Manifesto Mark Henderson,2012-05-10 Whether we want to improve education or cut crime, to enhance public health or to generate clean energy, we need the experimental methods of science - the best tool humanity has yet developed for working out what works. Yet from the way we're governed to the news we're fed by the media we're let down by a lack of understanding and respect for its insights and evidence. In *The Geek Manifesto* Mark Henderson explains why and how we need to entrench scientific thinking more deeply into every aspect of our society. A new movement is gathering. Let's turn it into a force our leaders cannot ignore. This edition includes an appendix: 'A Geek Manifesto for America' by David Dobbs.

The Art of Rest Claudia Hammond,2019-11-21 Shortlisted for the British Psychological Society Book Award for Popular Science Much of value has been written about sleep, but rest is different; it is how we unwind, calm our minds and recharge our bodies. *The Art of Rest* draws on ground-breaking research Claudia Hammond collaborated on: 'The Rest Test', the largest global survey into rest ever undertaken, completed by 18,000 people across 135 different countries. The survey revealed how people get rest and how it is directly linked to your sense of wellbeing. Counting down through the top ten activities which people find most restful, Hammond explains why rest matters, examines the science behind the results to establish what really works and offers a roadmap for a new, more restful and balanced life.

A Manual for Heartache Cathy Rentzenbrink,2017-06-29 'I devoured *A Manual for Heartache* in one sitting . . . a kind, honest and wise book about how to make a friend of sadness.' - Rachel Joyce, author of *The Unlikely Pilgrimage of Harold Fry*. When Cathy Rentzenbrink was still a teenager, her happy family was torn apart by an unthinkable tragedy. In *A Manual for Heartache* she describes how

she learnt to live with grief and loss and find joy in the world again. She explores how to cope with life at its most difficult and overwhelming and how we can emerge from suffering forever changed, but filled with hope. This is a moving, warm and uplifting book that offers solidarity and comfort to anyone going through a painful time, whatever it might be. It's a book that will help to soothe an aching heart and assure its readers that they're not alone.

Transcendence Gaia Vince, 2020-01-21 In the tradition of *Guns, Germs, and Steel* and *Sapiens*, a winner of the Royal Society Prize for Science Books shows how four tools enabled us humans to control the destiny of our species A wondrous, visionary work. --Tim Flannery, scientist and author of the bestselling *The Weather Makers* What enabled us to go from simple stone tools to smartphones? How did bands of hunter-gatherers evolve into multinational empires? Readers of *Sapiens* will say a cognitive revolution -- a dramatic evolutionary change that altered our brains, turning primitive humans into modern ones -- caused a cultural explosion. In *Transcendence*, Gaia Vince argues instead that modern humans are the product of a nuanced coevolution of our genes, environment, and culture that goes back into deep time. She explains how, through four key elements -- fire, language, beauty, and time -- our species diverged from the evolutionary path of all other animals, unleashing a compounding process that launched us into the Space Age and beyond. Provocative and poetic, *Transcendence* shows how a primate took dominion over nature and turned itself into something marvelous.

Introducing Particle Physics Tom Whyntie, 2014-06-05 What really happens at the most fundamental levels of nature? *Introducing Particle Physics* explores the very frontiers of our knowledge, even showing how particle physicists are now using theory and experiment to probe our very concept of what is real. From the earliest history of the atomic theory through to supersymmetry,

micro-black holes, dark matter, the Higgs boson, and the possibly mythical graviton, practising physicist and CERN contributor Tom Whyntie gives us a mind-expanding tour of cutting-edge science. Featuring brilliant illustrations from Oliver Pugh, *Introducing Particle Physics* is a unique tour through the most astonishing and challenging science being undertaken today.

Adventures in the Anthropocene Gaia Vince, 2014-10-20 A science journalist travels the world to explore humanity's ecological devastation—and its potential for renewal in this “compelling read” (Guardian, UK). We live in times of profound environmental change. According to a growing scientific consensus, the dramatic results of man-made climate change have ushered the world into a new geological era: the Anthropocene, or Age of Man. As an editor at *Nature*, Gaia Vince couldn't help but wonder if the greatest cause of this dramatic planetary change—humans' singular ability to adapt and innovate—might also hold the key to our survival. To investigate this provocative question, Vince travelled the world in search of ordinary people making extraordinary changes to the way they live—and, in many cases, finding new ways to thrive. From Nepal to Patagonia and beyond, Vince journeys into mountains and deserts, forests and farmlands, to get an up close and personal view of our changing environment. Part science journal, part travelogue, *Adventures in the Anthropocene* recounts Vince's journey, and introduces an essential new perspective on the future of life on Earth.

Inflight Science Brian Clegg, 2011-04-07 The perfect companion to any flight - a guide to the science on view from your window seat. There are few times when science is so immediate as when you're in a plane. Your life is in the hands of the scientists and engineers who enable tons of metal and plastic to hurtle through the sky at hundreds of miles an hour. *Inflight Science* shows how you stay alive up there - but that's only the beginning. Brian Clegg explains the ever changing view, whether it's crop circles or clouds, mountains or river deltas, and describes simple experiments to

show how a wing provides lift, or what happens if you try to open a door in midair (don't!). On a plane you'll experience the impact of relativity, the power of natural radiation and the effect of altitude on the boiling point of tea. Among the many things you'll learn is why the sky is blue, the cause of thunderstorms and the impact of volcanic ash in an enjoyable tour of mid-air science. Every moment of your journey is an opportunity to experience science in action: Inflight Science will be your guide.

The Black Flamingo Dean Atta, 2020-05-26 Stonewall Book Award Winner * A Time Magazine Best YA Book Of All Time A fierce coming-of-age verse novel about identity and the power of drag, from acclaimed poet and performer Dean Atta. Perfect for fans of Elizabeth Acevedo, Jason Reynolds, and Kacen Callender. Michael is a mixed-race gay teen growing up in London. All his life, he's navigated what it means to be Greek-Cypriot and Jamaican—but never quite feeling Greek or Black enough. As he gets older, Michael's coming out is only the start of learning who he is and where he fits in. When he discovers the Drag Society, he finally finds where he belongs—and the Black Flamingo is born. Told with raw honesty, insight, and lyricism, this debut explores the layers of identity that make us who we are—and allow us to shine. In this uplifting coming-of-age novel told in accessible verse, Atta chronicles the growth and glory of Michael Angeli, a mixed-race kid from London, as he navigates his cultural identity as Cypriot and Jamaican as well as his emerging sexuality. (Publishers Weekly, An Anti-Racist Children's and YA Reading List)

The Cheltenham Festival Robin Oakley, 2014-03-03 The Cheltenham Festival is nowadays the biggest event in the racing year “in visitor numbers eclipsing Royal Ascot, the Grand National or the Derby. In 2011 it is a hundred years since the 1911 running of the National Hunt Chase marked the birth of the Festival, providing the perfect occasion for Robin Oakley's new history. This is a work of both history and celebration “telling the story of how three days of jump racing beneath Cleeve

Hill in Cheltenham became a vast sporting event attracting an average of 50,000 spectators per day. Before the War it saw legendary horses like Golden Miller; after the War the Irish invasion began “both horses and spectators; in the Sixties, Arkle, the greatest jumps horse of all time duelling with Mill House in the Gold Cup. In recent years there have been Cheltenham favourites like Desert Orchid, winning a gruelling Gold Cup in the mud, Dawn Run, Best Mate (2 Gold Cups), hurdlers like Istabraq and Persian War, and the grey hero One Man. But also it is a story of the craic and the characters, like the Irishman who won enough on Istabraq to pay off his mortgage, then lost it again on the Champion Chase, and reflected, Ach, it was only a small house anyway”! This is a book for both the committed Festival-goer, Guinness in hand, and every armchair racing fan.

Gastronaut Stefan Gates, 2006 An irreverent journey through the culinary world of the exotic, the bizarre, and the truly extraordinary, *Gastronaut* is equal parts cookbook and quest book. This hilarious journey through some of the strangest food experiences, past and present, is divided into three levels of escalating difficulty.

Survivors: The Animals and Plants that Time has Left Behind (Text Only) Richard Fortey, 2011-09-01 This ebook edition does not include illustrations. An awe-inspiring journey through the eons and across the globe, in search of visible traces of evolution in the living creatures which have survived from earlier times and whose stories speak to us of seminal events in the history of life.

The Science of Everyday Life Marty Jopson, 2015-09-17 Have you ever wondered why ice floats and water is such a freaky liquid? Or why chillies and mustard are both hot but in different ways? Or why microwaves don't cook from the inside out? In this fascinating scientific tour of household objects, *The One Show* presenter and all-round Science Bloke Marty Jopson has the answer to all of these, and many more, baffling questions about the chemistry and physics of the everyday stuff we

use every day.

Fatherhood Peter Howarth, 1999-02-01 This collection of essays is concerned with fatherhood. It includes disparate viewpoints—funny, poignant, and philosophical, and reflects on the first inklings of male broodiness, the nine months of pregnancy, and the moment of birth and beyond.

Reflections of Alan Turing Dermot Turing, 2021-04-22 Everyone knows the story of the codebreaker and computer science pioneer Alan Turing. Except ... When Dermot Turing is asked about his famous uncle, people want to know more than the bullet points of his life. They want to know everything – was Alan Turing actually a codebreaker? What did he make of artificial intelligence? What is the significance of Alan Turing's trial, his suicide, the Royal Pardon, the £50 note and the film *The Imitation Game*? In *Reflections of Alan Turing*, Dermot strips off the layers to uncover the real story. It's time to discover a fresh legacy of Alan Turing for the twenty-first century.

Crucial Interventions: An Illustrated Treatise on the Principles & Practice of Nineteenth-Century Surgery Richard Barnett, 2015-11-23 A beautifully illustrated look at the evolution of surgery, as revealed through rare technical illustrations, sketches, and oil paintings The nineteenth century saw major advances in the practice of surgery. In 1750, the anatomist John Hunter described it as “a humiliating spectacle of the futility of science”; yet, over the next 150 years the feared, practical men of medicine benefited from a revolution in scientific progress and the increased availability of instructional textbooks. Anesthesia and antisepsis were introduced. Newly established medical schools improved surgeons’ understanding of the human body. For the first time, surgical techniques were refined, illustrated in color, and disseminated on the printed page. *Crucial Interventions* follows this evolution, drawing from magnificent examples of rare surgical textbooks from the mid-nineteenth century. Graphic and sometimes unnerving yet beautifully rendered, these fascinating illustrations,

acquired from the Wellcome Collection's extensive archives, include step-by-step surgical techniques paired with depictions of medical instruments and depictions of operations in progress. Arranged for the layman (from head to toe) *Crucial Interventions* is a captivating look at the early history of one of the world's most mysterious and macabre professions.
